Adobe Experience Manager Architect Master Sample Questions (Q18-Q23):

NEW QUESTION # 18

A client is migrating the content from a legacy website to an existing AEM implementation. An Architect evaluates the content of the legacy site and determine-that there are approximately 20.000 pages with a common structure, and a few hundred pages that do not follow a pattern. The client wants to complete the migration as soon as possible.

Which approach should the Architect recommend for the content migration?

- A. Use Site importer to import the content into AEM
- B. Recreate the entire content manually with a group of Content Authors
- C. Migrate all common pages using the ETL procedure with multiple rounds
- D. Migrate all common pages using the ETL procedure and use manual authoring for the rest

Answer: B

NEW QUESTION # 19

A client is migrating the content from a legacy website to an existing AEM implementation. An Architect evaluates the content of the legacy site and determine-that there are approximately 20.000 pages with a common structure, and a few hundred pages that do not follow a pattern. The client wants to complete the migration as soon as possible. Which approach should the Architect recommend for the content migration?

- A. Use Site importer to import the content into AEM
- B. Migrate all common pages using the ETL procedure with multiple rounds
- C. Migrate all common pages using the ETL procedure and use manual authoring for the rest
- D. Recreate the entire content manually with a group of Content Authors

Answer: C

Explanation:

"migrating all common pages using the ETL procedure and using manual authoring for the rest can reduce the time and effort required for the content migration".

NEW QUESTION # 20

A company with various departments wants to use tagging to improve search capability. Each department is restricted to use its own tags. How should an Architect organize the tags?

- A. Create a department sub-tag in each tag
- B. Use department ID as a prefix of each tag
- C. Create a namespace for each department
- D. Create tags in "departmentName:tagName" format

Answer: C

Explanation:

"creating a namespace for each department can allow organizing tags by different taxonomies and restricting access to them".

NEW QUESTION # 21

An Architect is performing infrastructure and capacity planning for Author servers for a customer using AEM 6.5. Which two factors would lead the Architect to pick a multi-author instance architecture setup? (Choose two.)

- A. Types of actions performed by Authors
- B. Website Traffic handled by servers
- C. Fail safeness of the servers
- D. Cache Efficiency on the dispatcher
- E. Number of Parallel Authors

Answer: C,D

NEW QUESTION # 22

A large AEM enterprise site is implementing authentication and requires a true optimal load balancing across the site's multi AEM publish instances. Which approach should an Architect take to meet this requirement?

- A. Configure the Dispatcher to run with a Dedicated System User
- B. Enable Round Robin processing in Dispatcher configuration
- C. Configure Sticky Connections
- D. Enable Encapsulated Token Option

Answer: B

NEW QUESTION # 23
