You will be bound to pass your Plat-101 Exam since you have perfected yourself in taking the Plat-101 exam.

Salesforce Certified Platform Foundations Sample Questions (Q23-Q28):

NEW QUESTION # 23

A Salesforce associate tries to create a new user in a sandbox using Astrogetcloudy.org as the username and it fails.

What is the problem with creating the Astro3getcloudy.org' username?

- A. Salesforce usernames must include the user's full name and be formatted like an email address.
- B. Salesforce usernames must be formatted like an email address with .com at the end.
- **C. Salesforce usernames must be unique across all Salesforce orgs and that one is already in use.**

Answer: C

Explanation:

The problem with creating the Astrogetcloudy.org username is that Salesforce usernames must be unique across all Salesforce orgs and that one is already in use. Salesforce usernames are global identifiers that allow users to log in to any Salesforce org or instance. Therefore, usernames cannot be duplicated or reused by different users

NEW QUESTION # 24

Get Cloudy Consulting (GCC) is experiencing significant performance degradation.

What should GCC do to quickly verify if a performance incident has been reported on its instance of Salesforce?

- A. Open a case with Salesforce Support.
- B. Ask a question on the Trailblazer Community.
- **C. Check System Status on the Trust site.**

Answer: C

Explanation:

The best way for GCC to quickly verify if a performance incident has been reported on its instance of Salesforce is to check System Status on the Trust site. The Trust site is a website that provides real-time information on the availability, performance, security, and compliance of the Salesforce platform and services. GCC can use the Trust site to check the current and historical status of its instance, as well as to subscribe to notifications and alerts on any issues or maintenance events

NEW QUESTION # 25

A Salesforce associate is looking at a custom Contact list view and wants to show more information from the record.

What should they do to add the missing key columns?

- A. Edit sharing settings
- B. Edit list filters
- **C. Select Fields to Display**

Answer: C

Explanation:

Selecting Fields to Display is what the associate should do to add the missing key columns to the custom Contact list view. Selecting Fields to Display is a feature that allows the user to choose which fields to show as columns in the list view, and in what order. The user can select up to 15 fields to display, and drag and drop the fields to rearrange the column order. Editing list filters is a feature that allows the user to apply one or more criteria to filter the records that are displayed in the list view. The user can select a field, an operator, and a value for each filter, and combine multiple filters with AND or OR logic. Editing sharing settings is a feature that allows the user to control the access and visibility of records for different users and groups. The user can define the organization-wide default, role hierarchy, sharing rules, and manual sharing for each object.

NEW QUESTION # 26

What should be considered before changing the field type of a custom field?

- **A. There is possible data loss when changing the field type.**
- B. The field is a required field that cannot be changed.
- C. The field type can be changed for all custom field.

Answer: A

Explanation:

Changing the field type of a custom field may result in data loss if the new field type is incompatible with the existing data. For example, changing a text field to a number field may cause the loss of alphanumeric values. The field type can be changed for most custom fields, but not all. For example, changing a master-detail field to a lookup field is not allowed. The field being a required field does not affect the ability to change the field type.

NEW QUESTION # 27

A Salesforce associate wants to refresh a report and email it to an executive team each week.

Which functionality of Salesforce Reports should the associate use?

- A. Refresh
- B. Subscriptions
- C. Notifications

Answer: B

Explanation:

The functionality of Salesforce Reports that the associate should use to refresh a report and email it to an executive team each week is subscriptions. Subscriptions let you schedule reports to run at regular intervals and send notifications to you or other recipients by email or Chatter5. You can also set conditions for when the notifications are sent, such as when the report returns no results or the results change.

NEW QUESTION # 28

• • • • •
