SAP C-ACDET-2506 Practice Test For Supreme Achievement 2026

Our C-ACDET-2506 study materials include 3 versions and they are the PDF version, PC version, APP online version. You can understand each version's merits and using method in detail before you decide to buy our C-ACDET-2506 study materials. For instance, PC version of our C-ACDET-2506 training quiz is suitable for the computers with the Windows system and supports the MS Operation System. It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and the users can practice and learn our C-ACDET-2506 learning guide at any time.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details

Topic 1	• **Deploy and Migration:** This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	• **Field Configuration:** This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 3	• **Project Overview, Roles and Responsibilities:** This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q34-Q39):

NEW QUESTION # 34
Which of the following languages is used to define defaults on fields within SAP Ariba?

- A. JavaScript
- B. Python
- C. ABAP
- D. Ariba expression language

Answer: D

Explanation:
SAP Ariba uses its proprietary Ariba expression language, based on OGNL (Object-Graph Navigation Language), to define default value expressions on fields. This language supports logical conditions, comparisons, and public Java method calls to create dynamic defaulting logic. ABAP, Python, and JavaScript are not supported languages for field default expressions in SAP Ariba. This expression language provides a concise and powerful way to tailor defaults based on context.

NEW QUESTION # 35
How can you create a field label with italics?

- A. By selecting the option "Italic label"
- B. Formatting of a field label is not possible
- C. By marking the text in the field and select Ctrl-l
- D. By using standard HTML formatting like label can be added to the field label

Answer: D

NEW QUESTION # 36
During verification in Production, a stakeholder reports that the imported form template appears outdated.
What could be a likely reason for this?

- A. The Production site does not support custom form templates.
- B. The Test site template was not the latest version when exported.

- C. The Production site is missing certain parameter settings.
- D. The system automatically reverted the template to a previous version during import.

Answer: B

Explanation:
If an imported form template appears outdated in Production, the most common cause is that the version exported from Test was not the latest published version. SAP Ariba's export/import process is version-specific; only the selected version at export time is moved. If the latest updates weren't published or exported, Production will receive an older version.
SAP does not auto-revert templates to previous versions during import, and missing parameter settings typically do not affect template versions. Production supports custom templates as long as metadata and versions align.
Proper version control, including publishing the latest template version in Test before export, is essential to avoid this issue.

NEW QUESTION # 37
Which document must be returned to SAP before a Deployment Lead can be assigned to the project?

- A. Deployment Overview
- B. Enablement workbook
- C. Solution Design Matrix
- D. Delivery Engagement Readiness Checklist

Answer: D

NEW QUESTION # 38
Which of the following master data types requires manual migration from Test to Production in a Greenfield migration?

- A. Clause Library
- B. Enumerations
- C. Translations
- D. Relations and relation entries

Answer: B

Explanation:
In SAP Ariba Greenfield deployments, Enumerations (picklist value lists) require manual migration because they are not included in Intelligent Configuration Manager (ICM) bundles. Enumerations must be manually exported from Test and imported into Production to ensure correct picklist values for fields that depend on them.
Other master data types like Clause Library and Relations can be migrated using standard migration tools or processes. Translations are handled via AML & Translations Upload.
Ensuring enumerations are migrated correctly is critical because missing or inconsistent enumerations can cause field validation errors and disrupt system usage.

NEW QUESTION # 39
......

To help you get the SAP exam certification, we provide you with the best valid C-ACDET-2506 pdf prep material. The customizable and intelligence C-ACDET-2506 test engine will bring you to a high efficiency study way. The C-ACDET-2506 test engine contains self-assessment features like marks, progress charts, etc. Besides, the Easy-to-use C-ACDET-2506 layout will facilitate your preparation for C-ACDET-2506 real test. You can pass your C-ACDET-2506 certification without too much pressure.
