

# AZ-120 Question Explanations & Test AZ-120 Simulator

P.S. Free 2026 Microsoft AZ-120 dumps are available on Google Drive shared by Pass4training: [https://drive.google.com/open?id=1UaytrN9rp\\_Yr8sLlrDlIXfuxjOANwgdC](https://drive.google.com/open?id=1UaytrN9rp_Yr8sLlrDlIXfuxjOANwgdC)

Our Microsoft AZ-120 practice materials are suitable to exam candidates of different levels. And after using our AZ-120 learning prep, they all have marked change in personal capacity to deal with the Microsoft AZ-120 Exam intellectually. The world is full of chicanery, but we are honest and professional in this area over ten years.

Now it is a society of abundant capable people, and there are still a lot of industry is lack of talent, such as the IT industry is quite lack of technical talents. Microsoft certification AZ-120 exam is one of testing IT technology certification exams. Pass4training is a website which provide you a training about Microsoft Certification AZ-120 Exam related technical knowledge.

>> AZ-120 Question Explanations <<

## 2026 Perfect AZ-120 – 100% Free Question Explanations | Test AZ-120 Simulator

Our AZ-120 learning materials are carefully compiled by industry experts based on the examination questions and industry trends in the past few years. The knowledge points are comprehensive and focused. You don't have to worry about our learning from AZ-120 exam question. We assure you that our AZ-120 learning materials are easy to understand and use the fewest questions to convey the most important information. As long as you follow the steps of our AZ-120 quiz torrent, your mastery of knowledge will be very comprehensive and you will be very familiar with the knowledge points. This will help you pass the exam more smoothly. The AZ-120 learning materials are of high quality, mainly reflected in the adoption rate. As for our AZ-120 Exam Question, we guaranteed a higher passing rate than that of other agency. More importantly, we will promptly update our AZ-120 quiz torrent based on the progress of the letter and send it to you. 99% of people who use our AZ-120 quiz torrent has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our AZ-120 exam question is 99%. So our product is a good choice for you. Choose our AZ-120 learning materials, you will gain a lot and lay a solid foundation for success.

## Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q72-Q77):

## NEW QUESTION # 72

You plan to migrate an SAP environment to Azure.

You need to create a design to facilitate end-user access to SAP applications over the Internet, while restricting user access to the virtual machines of the SAP application servers.

What should you include in the design?

- A. Deploy an internal Azure Standard Load Balancer for incoming connections
- B. Configure point-to-site VPN connections for each user
- **C. Use an SAP Web Dispatcher to route all incoming connections**
- D. Configure a public IP address for each SAP application server

**Answer: C**

Explanation:

- \* A public internet user can reach the SAP Web-Dispatcher over port 443
- \* The SAP Web-Dispatcher can reach the SAP Application server over port 443
- \* The App Subnet accepts traffic on port 443 from 10.0.0.0/24
- \* The SAP Application server sends traffic on port 30015 to the SAP DB server
- \* The DB subnet accepts traffic on port 30015 from 10.0.1.0/24.
- \* Public Internet Access is blocked on both App Subnet and DB Subnet.

Topic 1, Litware, inc

Case Study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all question include on this exam in the time provided.

To answer the question included in a case study, you will need to reference information that is provided in the case study. Case studies might contain and other resources that provide information about the scenario that is describe in the case study. Each question is independent of the other question in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To Start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such the content requirements, existing environment, and problem statements, if the case study has an All Information tab, note that the information displayed its identical to the information displayed on the subsequence tabs. When you are ready to answer a question click the Question button to return to the question.

Overview

Litware, inc. is an international manufacturing company that has 3,000 employees.

Litware has two main offices. The offices are located in Miami, FL, and Madrid Spain.

Existing Environment

Infrastructure

Litware currently uses a third-party provider to host a datacenter in Miami and a disaster recovery datacenter in Chicago, it.

The network contains an Active Directory domain named litware.com.Litware has two third-party applications hosted in Azure.

Litware already implemented a site-to-site VPN connection between the on-premises network and Azure.

SAP Environment

Litware currently runs the following SAP products:

- \* Enhancement Pack 6 for SAP ERP Central Component 6.0 (SAP ECC 6.0)
- \* SAP Extended Warehouse Management (SAP EWM)
- \* SAP Business Warehouse (SAP BW)
- \* SAP NetWeaver Process Integration (PI)
- \* SAP Solution Manager

All users run on the Windows Server platform. All databases use Microsoft SQL Server. Currently, you have 20 production servers.

You have 30 non-production servers including five testing severs, five development servers, five quality assurance (QA) servers, and 15 pre=production servers.

Currently, all SAP applications are in the litware.com domain.

Problem Statements

The current version of SAP ECC has a transaction that, when run in batches overnight, tables eight hours to complete. You confirm that upgrading to SAP Business Suite on HANA will improve performance because of code changes and the SAP HANA database

platform.

Litware is dissatisfied with the performance of its current hosted infrastructure vendor. Litware experienced several hardware failures and the vendor struggled to adequately its 24/7 business operation.

Business Goals

Litware identifies the following business goals:

- \* Increase the performance of SAP ECC application by moving to SAP HANA. All other database will remain on SQL Server.
- \* Move away from the current infrastructure vendor to increase the stability and availability of the SAP services.
- \* Use the new Environment, Health and Safety (EH&S) in Recipe Management function.
- \* Ensure that any migration activities can be completed within a 48-hour period during a weekend.

Planned Changes

Litware identifies the following planned changes:

- \* Migrate SAP to Azure.
- \* Upgrade and migrate SAP ECC to SAP business Suite on HANA Enhancement Pack 8.

Technical Requirements

Litware identifies the following technical requirements:

- \* Implement automated backups.
- \* Support load testing during the migrate.
- \* Identify opportunities to reduce costs during the migration.
- \* Continue to use the Litware.com domain for all SAP landscapes.
- \* Ensure that all SAP applications and databases are highly available.
- \* Remove all SAP components from the on-premises network once the migrate is complete.
- \* Minimize the purchase of additional SAP licenses. SAP HANA license were already purchased.
- \* Ensure that SAP can provide technical support for all the SAP landscapes deployed to Azure.

### NEW QUESTION # 73

You plan to deploy an SAP environment on Azure that will use Azure Availability Zones.

Which load balancing solution supports the deployment?

- A. Azure Basic Load Balancer
- **B. Azure Standard Load Balancer**
- C. Azure Application Gateway v1 SKU

**Answer: B**

Explanation:

When you deploy Azure VMs across Availability Zones and establish failover solutions within the same Azure region, some restrictions apply:

You can't use an Azure Basic Load Balancer to create failover cluster solutions based on Windows Server Failover Clustering or Linux Pacemaker. Instead, you need to use the Azure Standard Load Balancer SKU.

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-machines/workloads/sap/sap-ha-availability-zones>

Topic 1, Contoso Ltd

Existing Environment

Active Directory

The network contains an on-premises Active Directory domain named ad.contoso.com. User email addresses use a domain name of contoso.com.

SAP Environment

The current SAP environment contains the following components:

SAP Solution Manager

SAP ERP Central Component (SAP ECC)

SAP Supply Chain Management (SAP SCM)

SAP application servers that run Windows Server 2008 R2

SAP HANA database servers that run SUSE Linux Enterprise Server 12 (SLES 12) Problem Statements Contoso identifies the following issues in its current environment:

The SAP HANA environment lacks adequate resources.

The Windows servers are nearing the end of support.

The datacenters are at maximum capacity.

Requirements

Planned Changes

Contoso identifies the following planned changes:

Deploy Azure Virtual WAN.

Migrate the application servers to Windows Server 2016.

Deploy ExpressRoute connections to all of the offices and manufacturing facilities.

Deploy SAP landscapes to Azure for development, quality assurance, and production.

All resources for the production landscape will be in a resource group named SAPProduction.

Business goals

Contoso identifies the following business goals:

Minimize costs whenever possible.

Migrate SAP to Azure without causing downtime.

Ensure that all SAP deployments to Azure are supported by SAP.

Ensure that all the production databases can withstand the failure of an Azure region.

Ensure that all the production application servers can restore daily backups from the last 21 days.

Technical Requirements

Contoso identifies the following technical requirements:

Inspect all web queries.

Deploy an SAP HANA cluster to two datacenters.

Minimize the bandwidth used for database synchronization.

Use Active Directory accounts to administer Azure resources.

Ensure that each production application server has four 1-TB data disks.

Ensure that an application server can be restored from a backup created during the last five days within 15 minutes.

Implement an approval process to ensure that an SAP administrator is notified before another administrator attempts to make changes to the Azure virtual machines that host SAP.

It is estimated that during the migration, the bandwidth required between Azure and the New York office will be 1 Gbps. After the migration, a traffic burst of up to 3 Gbps will occur.

Proposed Backup Policy

An Azure administrator proposes the backup policy shown in the following exhibit.

□ Azure Resource Manager Template

An Azure administrator provides you with the Azure Resource Manager template that will be used to provision the production application servers.

□

#### NEW QUESTION # 74

You have an SAP environment that is managed by using VMware vCenter.

You plan to migrate the SAP environment to Azure.

You need to gather information to identify which compute resources are required in Azure.

What should you use to gather the information?

- A. SAP Quick Sizer and SAP HANA system replication
- **B. Azure Migrate and SAP EarlyWatch Alert reports**
- C. Azure Site Recovery Deployment Planner and SAP HANA Cockpit
- D. Azure Site Recovery and SAP Quick Sizer

**Answer: B**

Explanation:

Azure Migrate is a Microsoft service that helps an enterprise assess how its on-premises workloads will perform, and how much they will cost to host, in the Azure public cloud.

An enterprise can use Azure Migrate to discover information about the VMware VMs running within its own data center, including CPU and memory usage, as well as performance history.

SAP EarlyWatch Alert (EWA) is a monitoring service for SAP customers, to monitor SAP systems in the solution landscape.

Incorrect Answers:

D: SAP HANA Cockpit is an administrative tool with a web interface for a correspondingly named database engine, a part of SAP ERP software. It allows both offline and cloud operations for managing databases, References:

<https://searchcloudcomputing.techtarget.com/definition/Azure-Migrate>

#### NEW QUESTION # 75

You have an SAP environment on Azure.

our on-premises network connects to Azure by using a site-to-site VPN connection.

6u need to alert technical support if the network bandwidth usage between the on-premises network and Azure exceeds 900 Mbps

10 minutes.

What should you use?

- A. Azure Network Watcher
- **B. Azure Monitor**
- C. NIPING
- D. Azure Enhanced Monitoring for SAP

**Answer: B**

Explanation:

Explanation

You set up alerts on Azure VPN Gateway metrics. Azure Monitor provides the ability to set up alerts for Azure resources. You can set up alerts for virtual network gateways of the "VPN" type.

Metric: AverageBandwidth: Average combined bandwidth utilization of all site-to-site connections on the gateway.

Reference:

<https://docs.microsoft.com/bs-latn-ba/azure/vpn-gateway/vpn-gateway-howto-setup-alerts-virtual-network-gatew>

### NEW QUESTION # 76

You plan to migrate an SAP HANA instance to Azure.

You need to gather CPU metrics from the last 24 hours from the instance.

Solution: You use Monitoring from the SAP HANA Cockpit.

Does this meet the goal?

- **A. Yes**
- B. No

**Answer: A**

Explanation:

The SAP HANA cockpit provides a single point of access to a range of SAP HANA administration and monitoring tasks. It is used to monitor and ensure the overall health of the system.

The HANA Monitoring dashboard also visualizes key HANA Metrics of SAP HANA system.
