## Latest PL-600 Exam Question - PL-600 Latest Guide Files

With the arrival of experience economy and consumption, the experience marketing is well received in the market. If you are fully attracted by our PL-600 training practice and plan to have a try before purchasing, we have free trials to help you understand our products better before you completely accept our PL-600 study dumps. you must open the online engine of the study materials in a network environment for the first time. In addition, the PL-600 Study Dumps don't occupy the memory of your computer. When the online engine is running, it just needs to occupy little running memory. At the same time, all operation of the online engine of the PL-600 training practice is very flexible as long as the network is stable.

## Microsoft Power Platform Solution Architect Sample Questions (Q14-Q19):

### NEW QUESTION # 14

You need to recommend technology for accessing historical job placement data.  
What should you recommend?

- A. Power Automate flows
- **B. Virtual tables**
- C. Power BI
- D. Power Virtual Agents chatbots

**Answer: B**

Explanation:

A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external data source. Virtual tables appear in your app to users as regular table rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

#### Scenario:

- \* First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.
- \* The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.
- \* The solution must provide a worker appointment booking system that can access worker historical job placement data.
- \* First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.

Topic 3, Fabrikam, inc.

#### Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

#### Background

Fabrikam, Inc. manufactures industrial metal cutting machines. The company installs and services the machines for customers. Fabrikam has manufacturing plants in Canada, France, and China. The company also has regional service organizations that are responsible for installation and maintenance of the machines.

#### Current environment

##### Overview

Operations for the company are managed very informally. Only a small number of long-term employees are aware of all manufacturing processes. The company has been experiencing quality issues associated with its manufacturing operations and installations.

The company wants to implement a way to capture quality inspection results for each machine produced.

Current inspection checklists are stored in the Files section of a Teams channel for inspectors. Inspectors commonly print the incorrect inspection checklist.

The company has specific inspection stations for certain inspection steps. Each station has the gauges and equipment required for related inspection steps. There is often a backlog at specific inspection stations. This results in delays in shipping machines to customers.

##### Accounting system

- \* The current system does not handle shop floor or manufacturing planning functionality.
- \* Machines are assigned serial numbers and placed in stock until they are shipped to customers.
- \* Employee information is maintained only within the accounting system. Access to the information is strictly controlled due to privacy regulations and company policies.

##### Other systems

\* The company has an enterprise Microsoft 365 subscription. The company uses Microsoft 365 only for sending and receiving email. The company uses photos of employees to generate employee badges.

Photos are uploaded into Microsoft 365 user profiles.

\* The company recently started using Dynamics 365 Field Service to manage and maintain the machines that it installs for its customers. The app has not been customized.

\* The company has added roles, skills, and certification proficiencies to Dynamics 365 Field Service resources to support both customer onsite inspections and final manufacturing inspections.

#### Requirements

##### Quality inspection app

Fabrikam is evaluating Microsoft Power Platform to determine whether it can meet the company's requirements for a manufacturing defect and quality inspection solution. Each machine produced must be subjected to a quality inspection at various points during production. Each machine must undergo a more extensive quality inspection before the machine can be shipped to the customer.

##### Inspection orders

\* Inspection orders must:

- \* Allow entry of quality ratings of passed or failed for each quality metric identified for the machine being rated.

- \* Include information about the person who performed each inspection step and any comments made by the inspector.
- \* Be automatically marked as failed if one inspection step rating is marked as failed.
- \* Be automatically marked for re-inspection should a machine fail inspection. The new inspection order must be created by using the originating inspection order as a template.
- \* Inspectors must fill in findings comments and upload at least one photo for any inspection step that is marked as failed.

#### Inspection standardization

Standardized checklists must be stored in the solution for use by inspectors. A copy must be created when a new inspection is initiated. The solution must:

- \* Prevent an inspector from proceeding to the next step of the checklist until required information for a step is entered.
- \* Support the addition of steps to inspections to support custom features added to a machine for a customer.
- \* Support the direct input of measurements from testing gauges to avoid incorrect readings being entered by inspectors.
- \* Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance. Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.
- \* Support the ability to store photo references within each inspection step to document defects found during inspections.

#### Security

- \* Users must be active employees of Fabrikam.
- \* When a user signs into the inspection solution, the solution must display a picture of the employee who has signed in.
- \* Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.
- \* You must prevent users from changing inspection order data once an inspection is marked as final.

#### Analytics and reporting

The solution must:

- \* Provide metrics including existing and upcoming demand by inspection station, average time spent per user at a station, and average time a machine spends at each inspection point.
- \* Provide metrics per inspector including number of inspections performed by month, and number of inspections per rating type (pass, fail).
- \* Provide a printed quality certificate to be included with each machine.

#### Issues

During initial testing of the solution, testers report that they cannot see the photos taken during a previously failed inspection.

### NEW QUESTION # 15

You need to design the quality inspection order data model.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Obtain the serial number and other machine attributes for use in the inspection order.	<input type="checkbox"/> Use a virtual table. <input type="checkbox"/> Import to a custom table. <input type="checkbox"/> Create a lookup to Dynamics 365 Field Service.
Configure the relationship between inspection orders and inspection ratings.	<input type="checkbox"/> Create a one-to-many relationship and set the behavior to Parental. <input type="checkbox"/> Create a many-to-many relationship and set the behavior to Parental. <input type="checkbox"/> Create a one-to-many relationship and set the behavior to Cascade None. <input type="checkbox"/> Create a many-to-many relationship and set the behavior to Cascade None.

**Answer:**

**Explanation:**

Requirement	Action
Obtain the serial number and other machine attributes for use in the inspection order.	<ul style="list-style-type: none"> <li>Use a virtual table.</li> <li>Import to a custom table.</li> <li>Create a lookup to Dynamics 365 Field Service.</li> </ul>
Configure the relationship between inspection orders and inspection ratings.	<ul style="list-style-type: none"> <li>Create a one-to-many relationship and set the behavior to Parental.</li> <li>Create a many-to-many relationship and set the behavior to Parental.</li> <li>Create a one-to-many relationship and set the behavior to Cascade None.</li> <li>Create a many-to-many relationship and set the behavior to Cascade None.</li> </ul>

### NEW QUESTION # 16

You are designing a Microsoft Power Platform solution.

You need to identify the non-functional requirements for the organization.

Which three non-functional requirements should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. customer maintenance procedures
- B. usability of business process flows
- C. time-to-load forms
- D. solution regulatory compliance
- E. business rules to identify top customers

Answer: A,B,D

### NEW QUESTION # 17

A company plans to create a Microsoft Power Platform solution that integrates with Dynamics 365 Sales. The solution must meet the following requirements:

\* Connect directly with a Microsoft Azure SQL database as an external data source at run time where specific data is available in the Dynamics 365 Sales solution without the need for data replication.

\* An external system needs to send data to the company's Dynamics 365 Sales solution.

You need to recommend the most suitable solution to integrate Dynamics 365 Sales with both systems.

What should you recommend? To answer, select the appropriate option in the answer area.

**Answer Area**

<p style="text-align: center;"><b>Integration requirement</b></p> <p style="text-align: center;">Have read-only visibility of data from an external Azure SQL database.</p> <hr/> <p style="text-align: center;">External system sends data to Dynamics 365 Sales.</p>	<p style="text-align: center;"><b>Solutions</b></p> <div style="border: 1px solid gray; padding: 5px; margin-bottom: 10px;"> <p>Use virtual tables.</p> <p>Use a custom plug-in.</p> <p>Use Dynamics 365 Web API.</p> <p>Use a web resource to display data.</p> </div> <div style="border: 1px solid gray; padding: 5px;"> <p>Use a custom plug-in.</p> <p>Use Dynamics 365 Web API.</p> <p>Use a web resource to display data.</p> </div>
--	---

Answer:

Explanation:

**Answer Area**

**Integration requirement**

Have read-only visibility of data from an external Azure SQL database.

External system sends data to Dynamics 365 Sales.

**Solutions**

Use virtual tables.  
 Use a custom plug-in.  
 Use Dynamics 365 Web API.  
 Use a web resource to display data.

Use a custom plug-in.  
 Use Dynamics 365 Web API.  
 Use a web resource to display data.

**NEW QUESTION # 18**

A company is creating a Microsoft Power Platform app to enable employees to log daily time entries. Employee user accounts are in multiple Azure AD tenants and are not located in the tenant that is running the app. Employees must be added as Azure AD guest accounts within the tenant that will be running the app. Employees must access the model-driven app by being a member of a security team. The security team has been assigned the Employee Security role. Employees must create personal views of records to view within the system. You need to implement a security solution. Which privilege should you use?

- A. Team
- B. Azure AD security group
- C. Direct basic level
- D. Shared app access

**Answer: A**

**NEW QUESTION # 19**

.....

The PL-600 practice questions at TestKingFree PL-600 cover all the key topics and areas of knowledge necessary to get success on the first try. The product of TestKingFree is designed by professionals and is regularly updated to reflect the latest changes in the content. The TestKingFree recognizes that students may have different learning styles and preferences. Therefore, the TestKingFree offers PDF format, desktop practice exam software, and PL-600 Exam Questions to help customers prepare for the PL-600 exam successfully.

**Latest PL-600 Exam Question:** <https://www.testkingfree.com/Microsoft/PL-600-practice-exam-dumps.html>
