When you are studying for the JN0-351 exam, maybe you are busy to go to work, for your family and so on. Time is precious for everyone to do the efficient job. If you want to get good JN0-351 prep guide, it must be spending less time to pass it. We are choosing the key point and the latest information to finish our JN0-351 Guide Torrent. It only takes you 20 hours to 30 hours to do the practice. After your effective practice, you can master the examination point from the JN0-351 exam torrent. Then, you will have enough confidence to pass the JN0-351 exam.

You can pass your Juniper JN0-351 certification exam in less time, without wasting time and money on outdated or unreliable Enterprise Routing and Switching, Specialist (JNCIS-ENT) (JN0-351) exam study materials. Don't let fear or a lack of resources hold you back from achieving your goals, trust ValidBraindumps Enterprise Routing and Switching, Specialist (JNCIS-ENT) (JN0-351) practice test material and achieve the highest marks in your Enterprise Routing and Switching, Specialist (JNCIS-ENT) (JN0-351) exam.

Latest Juniper JN0-351 Exam Simulator - JN0-351 Instant Download

Are you still staying up for the JN0-351 exam day and night? If your answer is yes, then you may wish to try our JN0-351 exam materials. We are professional not only on the content that contains the most accurate and useful information, but also on the after-sales services that provide the quickest and most efficient assistants. With our JN0-351 practice torrent for 20 to 30 hours, we can claim that you are ready to take part in your JN0-351 exam and will achieve your expected scores.

Juniper JN0-351 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Spanning Tree: Networking professionals explore the principles and advantages of the Spanning Tree Protocol (STP) to ensure loop-free topologies in Layer 2 networks.
Topic 2	<ul style="list-style-type: none">BGP: This topic focuses on the operational and conceptual elements of BGP, a cornerstone in enterprise networks.

Topic 3	<ul style="list-style-type: none"> • Layer 2 Switching or VLANs: This topic deepens the understanding of Layer 2 switching operations within the Junos OS, including VLAN concepts and benefits. Experienced networking professionals gain insights into configuration, monitoring, and troubleshooting techniques essential for network segmentation and efficiency.
Topic 4	<ul style="list-style-type: none"> • Layer 2 Security: This topic introduces Layer 2 protection mechanisms and firewall filters to fortify network security. Practical skills in configuring, monitoring, and troubleshooting these features prepare candidates to address exam objectives and real-world challenges effectively.

Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) Sample Questions (Q89-Q94):

NEW QUESTION # 89

An update to your organization's network security requirements document requires management traffic to be isolated in a non-default routing-instance. You want to implement this requirement on your Junos-based devices.

Which two commands enable this behavior? (Choose two.)

- A. `set routing-instances mgmt_junos interface em1`
- B. `set routing-instances mgmt_junos interface ge-0/0/0.0`
- C. `set system management-instance`
- D. `set routing-instances mgmt_junos`

Answer: C,D

Explanation:

To isolate management traffic in a non-default routing-instance on Junos-based devices, you can use the `set system management-instance` and `set routing-instances mgmt_junos` commands 1 2 .

* `set system management-instance` : This command associates the management interface (usually named `fxp0` or `em0` for Junos OS, or `re0.mgmt-*` or `re1.mgmt-*` for Junos OS Evolved) with the non-default virtual routing and forwarding (VRF) instance 1 . After you configure the non-default management VRF instance, management traffic no longer has to share a routing table with other control traffic or protocol traffic 1 .

* `set routing-instances mgmt_junos` : This command creates a new routing instance named `mgmt_junos` . The name of the dedicated management VRF instance is reserved and hardcoded as `mgmt_junos` ; you cannot configure any other routing instance by the name `mgmt_junos` 1 .

Therefore, options C and D are correct. Options A and B are not correct because they attempt to assign an interface to the `mgmt_junos` routing instance, which is not necessary for isolating management traffic 1 .

NEW QUESTION # 90

Exhibit

□ What does the * indicate in the output shown in the exhibit?

- A. The interface is down.
- B. The switch ports have a router attached.
- C. The interface is active.
- D. All interfaces have elected a root bridge.

Answer: C

Explanation:

* The exhibit shows the output of the command `show vlans brief` , which displays brief information about VLANs and their associated interfaces 1 .

* The output has four columns: Routing instance, VLAN name, Interfaces, and Tagging.

* The * symbol indicates that the interface is active, meaning that it is up and forwarding traffic 1 . This can be verified by the command `show interfaces terse` , which displays the status of the interfaces 2 .

NEW QUESTION # 91

Referring to the exhibit, all users connected to the same VLAN can communicate with each other, but not with users on other VLANs in this network.

What must be configured to enable communication between the VLANs?

- A. A single logical IRB interface must be created and assigned to all three VLANs.
- B. A separate routing device is required to forward traffic between the configured VLANs.
- C. The switch ports to which the users are connected should be configured as trunk ports.
- **D. A logical IRB interface must be created and assigned to each VLAN.**

Answer: D

NEW QUESTION # 92

Which two statements about DHCP snooping are correct? (Choose two.)

- **A. DHCP snooping inspects all DHCP packets on untrusted ports.**
- B. By default, the Junos OS treats access ports as trusted and trunk ports as untrusted.
- C. DHCP snooping uses ARP to add statically defined IP addresses to its database.
- **D. The DHCP database maps IP addresses, MAC addresses, and the associated VLAN.**

Answer: A,D

NEW QUESTION # 93

Which two statements are correct about using firewall filters on EX Series switches? (Choose two.)

- **A. You can deploy only stateless firewall filters on an EX Series switch.**
- B. You can deploy both stateless and stateful firewall filters on an EX Series switch.
- **C. You can apply firewall filters to both Layer 2 and Layer 3 traffic on an EX Series switch.**
- D. You can only apply firewall filters to Layer 2 traffic on an EX Series switch.

Answer: A,C

Explanation:

* A is correct because you can deploy only stateless firewall filters on an EX Series switch. A stateless firewall filter is a filter that evaluates each packet individually based on the header information, such as source and destination addresses, protocol, and port numbers. A stateless firewall filter does not keep track of the state or context of a packet flow, such as the sequence number, flags, or session information.

1. EX Series switches support only stateless firewall filters, which are also called access control lists (ACLs) or packet filters.

* C is correct because you can apply firewall filters to both Layer 2 and Layer 3 traffic on an EX Series switch. Layer 2 traffic is traffic that is switched within a VLAN or a bridge domain, while Layer 3 traffic is traffic that is routed between VLANs or networks. EX Series switches support three types of firewall filters: port (Layer 2) firewall filters, VLAN firewall filters, and router (Layer 3) firewall filters. You can apply these filters to different interfaces and directions to control the traffic entering or exiting the switch.

NEW QUESTION # 94

.....

Desktop Juniper JN0-351 Practice Exam Software is a one-of-a-kind and very effective software developed to assist applicants in preparing for the JN0-351 certification test. The Desktop JN0-351 Practice Exam Software that we provide includes a self-assessment feature that enables you to test your knowledge by taking simulated tests and evaluating the results. You can acquire a sense of the JN0-351 software by downloading a free trial version before deciding whether to buy it.
