Which solution can you integrate with the Global Tax solutions to manage corporate income tax?

- A. SAP Global Trade Services
- B. SAP Document and Reporting Compliance
- **C. SAP Profitability and Performance Management**
- D. SAP Watch List Screening

答案： C

解題說明：

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

In the SAP Financial Management landscape, managing corporate income tax necessitates the ability to handle complex data modeling and high-volume calculations. SAP Profitability and Performance Management (PaPM) is the primary solution for this requirement. While SAP Document and Reporting Compliance is tailored for electronic invoicing and real-time statutory reporting, PaPM provides the sophisticated calculation engine required for tax provisioning, transfer pricing, and complex tax allocations. Integrating PaPM with Global Tax solutions allows finance teams to automate the consolidation of tax- relevant data from disparate sources. This ensures that the tax department utilizes the "Single Source of Truth" provided by the SAP S/4HANA Universal Journal. By leveraging PaPM, CFOs can ensure that their corporate income tax calculations are transparent, auditable, and compliant with evolving international standards like Pillar Two. This integration streamlines the end-of-year tax accounting process, moving it from a manual, spreadsheet-heavy task to an automated, defensible workflow that provides a clear view of the effective tax rate (ETR) and its impact on the organization's overall financial health.

問題 #66

問題 #67

Which solution helps multi-ERP system clients centralize their accounting and reporting system?

- A. SAP Analytics Cloud
- **B. SAP S/4HANA Cloud for central finance**

- C. SAP Integration Suite
- D. SAP Advanced Financial Closing

答案：B

解題說明：

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

Many large enterprises operate in a fragmented IT landscape where multiple ERP systems (both SAP and non- SAP) are used across different subsidiaries or regions. SAP S/4HANA Cloud for central finance is the specific deployment option designed to bridge these gaps without requiring a full-scale migration of all local systems at once. It allows organizations to replicate financial transactions from various source systems into a single, centralized SAP S/4HANA instance in real-time.

By using Central Finance, a company can create a centralized accounting and reporting system that serves as a "Single Source of Truth" for the entire group. This enables centralized processes such as "Central Payments," "Central Credit Management," and "Centralized Reporting." Instead of waiting for period-end extracts from dozens of different systems, the group finance team can see the total financial position of the company at any moment. This significantly simplifies the consolidation process and provides a clear path for digital transformation. It allows the CFO to harmonize data and processes at the corporate level while local entities continue to operate on their existing legacy systems, providing a low-risk, high-value approach to modernizing the finance function.
