## Interactive 300-435 Questions & Latest 300-435 Test Answers

As long as you get to know our 300-435 exam questions, you will figure out that we have set an easier operation system for our candidates. Once you have a try, you can feel that the natural and seamless user interfaces of our 300-435 study materials have grown to be more fluent and we have revised and updated 300-435 learning braindumps according to the latest development situation. Without doubt, we are the best vendor in this field and we also provide the first-class service for you.

## Cisco Automating and Programming Cisco Enterprise Solutions Sample Questions (Q207-Q212):

### NEW QUESTION # 207

Drag and Drop Question

An engineer must audit Cisco Catalyst Center managed devices to verify configuration sync status. The engineer must authenticate and GET the device list and return the JSON content into a registered variable for later checks. Drag and drop the code snippets from the bottom onto the boxes in the code to construct the artifact. Not all options are used. Options may be used more than once.

**Answer:**

**Explanation:**

Explanation:

The Ansible task must use the uri module to call Cisco Catalyst Center APIs. Both the authentication request and the device inventory request specify the HTTP verb with method.

Because the engineer needs the JSON body for later validation, the inventory call must set return\_content to true. The result is then stored with register so later tasks can inspect the returned device data.

### NEW QUESTION # 208

A Cisco DNA Center script must be written to retrieve a list of interfaces on a switch. Drag and drop the API calls that are needed to return the list of interfaces using the Command Running APIs from the left into the correct sequence on the right.

**Answer:**

Explanation:

### NEW QUESTION # 209

Refer to the exhibits. An engineer creates a Python scripts using ncclient to display interface information. The code must be completed so that it can be tested. Which expression completes the highlighted section in the format call?

- A. intf\_config[0]
- B. intf\_config
- C. intf\_info
- D. intf\_get

**Answer: C**

Explanation:

Section: Network Device Programmability

Explanation

Explanation:

The highlighted format cell for print is for the host.

### NEW QUESTION # 210

Refer to the exhibit. Cisco SD-WAN deployment must be troubleshooted using vManage APIs. A call to vEdge Hardware Health API returns the data in the exhibit (only a portion is shown). If this JSON is converted to a Python dictionary and assigned to the variable "d", how the status is accessed that is indicated on line 16?

- A. d['data'][0]['statusList'][0]['status']
- B. d['data']['statusList']['status']
- C. d['data'][0]['statusList'][0]['status']
- D. d[data][0][statusList][0][status]

**Answer: C**

Explanation:

The correct way to access the value 'up' (line 16) in the given Python dictionary structure is d['data'][0]['statusList'][0]['status'].

### NEW QUESTION # 211

Which consumption pattern requires call states when working with an API?

- A. asynchronous API calls
- B. synchronous API calls
- C. paging API calls
- D. batch API calls
