Once you buy CIPT exam materials of us, we will send the downloading link to you automatically, and you can start your training immediately. Once the order finish, your personal information such as your name and your email address will be concealed. In addition, CIPT Exam Dumps provide you with free update for 365

days, namely you can get the latest information about the exam.

IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q157-Q162):

NEW QUESTION # 157
After downloading and loading a mobile app, the user is presented with an account registration page requesting the user to provide certain personal details. Two statements are also displayed on the same page along with a box for the user to check to indicate their confirmation:

Statement 1 reads: "Please check this box to confirm you have read and accept the terms and conditions of the end user license agreement" and includes a hyperlink to the terms and conditions.

Statement 2 reads: "Please check this box to confirm you have read and understood the privacy notice" and includes a hyperlink to the privacy notice.

Under the General Data Protection Regulation (GDPR), what lawful basis would you primarily except the privacy notice to refer to?

- A. Legal obligation.
- B. Legitimate interests.
- C. Consent.
- D. Vital interests.

Answer: C

Explanation:
Consent (A): Under GDPR, consent is required when processing personal data based on the user's agreement, particularly when accepting terms and conditions and privacy notices. Reference: GDPR Article 6(1)(a).
Vital interests (B): This lawful basis is used in emergency situations where processing is necessary to protect someone's life. Reference: GDPR Article 6(1)(d).
Legal obligation (C): This basis is used when processing is necessary to comply with the law. Reference:
GDPR Article 6(1)(c).
Legitimate interests (D): While legitimate interests can be a lawful basis, the primary basis for the scenario described involving explicit user confirmation is consent. Reference: GDPR Recital 47, Article 6(1)(f).

NEW QUESTION # 158
Which of the following is one of the fundamental principles of information security?

- A. Accessibility.
- B. Accountability.
- C. Confidentiality.
- D. Connectivity.

Answer: C

Explanation:
The fundamental principles of information security are often summarized by the CIA triad, which stands for Confidentiality, Integrity, and Availability. Confidentiality ensures that information is not disclosed to unauthorized individuals, entities, or processes. It is crucial in protecting personal and sensitive data from unauthorized access and breaches. This principle is widely recognized and referenced in various information security standards and frameworks, such as ISO/IEC 27001 and NIST SP 800-53.
Reference:
ISO/IEC 27001:2013, Information technology - Security techniques - Information security management systems - Requirements.
NIST Special Publication 800-53 (Rev. 5), Security and Privacy Controls for Information Systems and Organizations.

NEW QUESTION # 159
Which of the following is considered a client-side IT risk?

- A. Security policies focus solely on internal corporate obligations.
- B. An employee stores his personal information on his company laptop.
- C. An organization increases the number of applications on its server.
- D. IDs used to avoid the use of personal data map to personal data in another database.

Answer: B

Explanation:
Client-side IT risks refer to vulnerabilities or threats that originate from the end-user's side. When an employee stores personal information on a company laptop, it poses a security risk as this data can be exposed through loss, theft, or improper handling of the device.
References:
* IAPP CIPT Study Guide: IT Risks and Mitigation.
* IAPP Certified Information Privacy Technologist (CIPT) Handbook: Section on Client-Side Risks.

NEW QUESTION # 160

A valid argument against data minimization is that it?

- A. Can limit business opportunities.
- B. Can have an adverse effect on data quality.
- C. Decreases the speed of data transfers.
- D. Increases the chance that someone can be identified from data.

Answer: C

NEW QUESTION # 161

Which of the following provides a mechanism that allows an end-user to use a single sign-on (SSO) for multiple services?

- A. International Organization for Standardization.
- B. PCI Data Security Standards Council
- C. The Open ID Federation.
- D. Personal Information Protection and Electronic Documents Act.

Answer: C

Explanation:
OpenID Connect, a part of the OpenID Federation, is a standard that enables single sign-on (SSO) functionality, allowing end-users to authenticate once and gain access to multiple services. This mechanism simplifies user experience by reducing the number of login credentials needed and enhances security by relying on a trusted identity provider. The IAPP notes that federated identity management solutions like OpenID Connect are essential for modern authentication processes, improving both security and user convenience (IAPP, "Identity and Access Management").

NEW QUESTION # 162

......

It can be difficult to prepare for the Certified Information Privacy Technologist (CIPT) (CIPT) certification test when you're already busy with daily tasks. But, you can successfully prepare for the examination despite your busy schedule if you choose updated and real IAPP CIPT exam questions.
