Microsoft SC-100시험대비 덤프 최신 데모 - SC-100시험패스 인증덤프문제

PassTIP의 Microsoft인증 SC-100덤프를 구매하시면 1년동안 무료 업데이트서비스버전을 받을수 있습니다. 시험문제가 변경되면 업데이트 하도록 최선을 다하기예PassTIP의 Microsoft인증 SC-100덤프의 유효기간을 연장시켜드리는 셈입니다.퍼펙트한 구매후는 서비스는PassTIP의 Microsoft인증 SC-100덤프를 구매하시면 받을수 있습니다.

최신 Microsoft Certified: Cybersecurity Architect Expert SC-100 무료 샘플 문제 (Q101-Q106):

질문 # 101

You have a Microsoft Entra tenant named contoso.com.

You have a partner company that has a multi-tenant application named App1. App1 is registered to a Microsoft Entra tenant named fabrikam.com.

You need to ensure that the users in contoso.com can authenticate to App1.

What should you recommend creating in contoso.com?

- A. a system-assigned managed identity
- B. a user-assigned managed identity
- C. an application object
- D. a service principal

정답: D

설명:

A service principal is needed in a tenant to authenticate users to a Microsoft Entra multi-tenant application located in another tenant. When a user from a different tenant signs in to a multi-tenant application, a service principal is automatically created in the user's tenant upon consent to the application's permissions. This service principal acts as the application's identity within that specific tenant, enabling authentication and access to resources secured by that tenant.

질문 # 102

You need to recommend a multi-tenant and hybrid security solution that meets to the business requirements and the hybrid requirements. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

정답:

설명:

Explanation:

Microsoft

To centralize subscription management:

Azure AD B2C

To enable the management of on-premises resources:

Azure Arc

질문 # 103

You have the Azure subscriptions shown in the following table.

Name	Linked Microsoft Entra tenant	Description
Sub1	contoso.com	Contains an Azure Backup vault named Vault1
Sub2	contososecurity.com	Used to manage security resources

The tenants contain the groups shown in the following table.

Name	Tenant	Members
Group1	contoso.com	Administrators who manage Azure Backup for Sub1
Group2	contososecurity.com	Administrators who manage security for Sub1 and Sub2

You perform the following actions:

- * Configure multi-user authorization (MUA) for Vault1 by using a resource guard deployed to Sub2.
- * Enable all available MUA controls for Vault1.
- * In contoso.com, create a Privileged Identity Management (PIM) assignment named Assignment1.
- * Configure Assignment1 to enable Group1 to activate the Contributor role for Vault1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
To enable MUA for Vault1, a resource guard must be deployed to Sub1.	<input type="radio"/>	<input type="radio"/>
A user in Group2 must approve changes made by a user in Group1 to the backup policies of Vault1.	<input type="radio"/>	<input type="radio"/>
A user in Group1 that activates Assignment1 can disable soft delete for the backups of Vault1, without the approval of a user in Group2.	<input type="radio"/>	<input type="radio"/>

정답:

설명:

Answer Area

Statements	Yes	No
To enable MUA for Vault1, a resource guard must be deployed to Sub1.	<input type="radio"/>	<input checked="" type="radio"/>
A user in Group2 must approve changes made by a user in Group1 to the backup policies of Vault1.	<input checked="" type="radio"/>	<input type="radio"/>
A user in Group1 that activates Assignment1 can disable soft delete for the backups of Vault1, without the approval of a user in Group2.	<input type="radio"/>	<input checked="" type="radio"/>

질문 # 104

You have a Microsoft 365 subscription.

You are designing a user access solution that follows the Zero Trust principles of the Microsoft Cybersecurity Reference Architectures (MCRA).

You need to recommend a solution that automatically restricts access to Microsoft Exchange Online, SharePoint Online, and Teams in near-real-time (NRT) in response to the following Azure AD events:

- A user account is disabled or deleted.
- The password of a user is changed or reset.
- All the refresh tokens for a user are revoked.
- Multi-factor authentication (MFA) is enabled for a user.

Which two features should you include in the recommendation? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- **A. continuous access evaluation**
- B. Azure AD Application Proxy
- C. Azure AD Privileged Identity Management (PIM)
- **D. Conditional Access**
- E. a sign-in risk policy

정답: A,D

설명:

<https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/concept-continuous-access-evaluation>

질문 # 105

Your company plans to move all on-premises virtual machines to Azure. A network engineer proposes the Azure virtual network design shown in the following table.

Virtual network name	Description	Peering connection
Hub VNet	Linux and Windows virtual machines	VNet1, VNet2
VNet1	Windows virtual machines	Hub VNet
VNet2	Linux virtual machines	Hub VNet
VNet3	Windows virtual machine scale sets	VNet4
VNet4	Linux virtual machine scale sets	VNet3

You need to recommend an Azure Bastion deployment to provide secure remote access to all the virtual machines. Based on the virtual network design, how many Azure Bastion subnets are required?

- A. 0
- B. 1
- C. 2
- D. 3
- **E. 4**

정답: E

설명:

<https://docs.microsoft.com/en-us/azure/bastion/vnet-peering>

<https://docs.microsoft.com/en-us/learn/modules/connect-vm-with-azure-bastion/2-what-is-azure-bastion>

질문 # 106
