Salesforce - Plat-Admn-202 - High Pass-Rate Discount Salesforce Certified Platform App Builder Code

you may like our Plat-Admn-202 exam materials since they contain so many different versions. You can use it anytime, anywhere. Of course, you don't have to worry about the difference in content. The contents of all versions of Plat-Admn-202 learning engine are the same. You only need to consider which version of the Plat-Admn-202 study questions is more suitable for you, and then buy it. Of course, we don't mind if you buy more than one version, as long as you think it is suitable.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	• Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
Topic 2	• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.
Topic 3	• App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.

Topic 4	• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.
Topic 5	• User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.

Reliable Plat-Admn-202 Practice Materials - Plat-Admn-202 Real Study Guide - PassTorrent

Salesforce is one of the most powerful and rapidly growing fields nowadays. Everyone is trying to get the Salesforce Plat-Admn-202 certification to improve their futures with it. Success in the test plays an important role in the up gradation of your CV and getting a good job or working online to achieve your dreams. The students are making up their minds for the Salesforce Plat-Admn-202 test but they are mostly confused about where to prepare for it successfully on the first try. This confusion leads to choosing outdated material and ultimately failure in the test. The best way to avoid failure is using updated and real questions.

Salesforce Certified Platform App Builder Sample Questions (Q73-Q78):

NEW QUESTION # 73
Cloud Kicks recently implemented the application lifecycle management process to its release management strategy.
Which category handles bug fixes and simple changes?

- A. Minor
- B. Patch
- C. Major
- D. Rollback

Answer: B

Explanation:
The category that handles bug fixes and simple changes is minor. A minor release is a type of release that introduces small enhancements or fixes to existing functionality, such as correcting spelling errors or improving performance. A minor release usually has a low impact on users and does not require extensive testing or training. A patch release is a type of release that addresses critical issues or defects that affect the functionality or security of an application, such as fixing broken links or resolving vulnerabilities. A patch release usually has a high impact on users and requires immediate deployment. A major release is a type of release that introduces new functionality or features to an application, such as adding new objects or components or changing business processes. A major release usually has a high impact on users and requires extensive testing and training. A rollback is not a type of release, but an action that reverses a release that has been deployed to an environment, such as undoing changes or restoring previous versions. A rollback may be necessary if a release causes errors or issues that affect the functionality or performance of an application.

NEW QUESTION # 74
At Universal containers, all US Sales reps should be able to view the US Team dashboard, however, only the US sales directors should be able to see the data in the component and view its source report. How can an app builder ensure the proper access is granted?

- A. Make the dashboard dynamic and give US Sales Reps the view my teams dashboard permission
- B. Share the dashboard folder with roles and subordinates of the US Sales Director and share the report folder with the role of US Sales Director
- C. Make the US Sales Director the running user and share the dashboard folder with the role US Sales Rep
- D. Share the dashboard with the public group US Sales Reps and share the dashboard source reports folder with the US Sales Director profile

Answer: B

Explanation:

Sharing the dashboard folder with roles and subordinates of the US Sales Director and sharing the report folder with the role of US Sales Director will ensure that only the US sales directors can see the data in the component and view its source report, while all US sales reps can view the US Team dashboard. Making the US Sales Director the running user will show only his or her data in the component, not the whole team's data. Making the dashboard dynamic will show different data depending on who is viewing it, not based on their role. Sharing the dashboard with the public group US Sales Reps and sharing the dashboard source reports folder with the US Sales Director profile will not prevent other profiles from accessing the reports if they have access to the report folder.

NEW QUESTION # 75
Universal Containers wants to collaborate with its customers within Salesforce and has decided to enable the Allow Customer Invitations in the Chatter settings.
Which permission is granted to customers when invited to a Chatter group?

- A. The ability to invite members to groups of which they are a member.
- B. The ability to interact with members of their groups.
- C. The ability to @mention accounts of which they are a contact.
- D. The ability to request access to public groups.

Answer: B

Explanation:

When the Allow Customer Invitations setting is enabled, customers (external users) can be invited to specific Chatter groups as external members, allowing collaboration and communication within those groups only.
Why A (The ability to interact with members of their groups) is correct:Exact Extract:"External users invited to Chatter groups can post, comment, and interact with members of the groups they belong to, but can't access information outside those groups." - Salesforce Help | External Users in Chatter Groups Why not B:External users cannot @mention accounts; they can only mention members of their groups.
Why not C:External users cannot invite others to groups - only internal members or group owners can.
Why not D:External users cannot request to join public groups unless invited.

NEW QUESTION # 76
Due to the complexity of the Universal Containers sandbox release schedule and requirements, it is advised that change sets are used as often as possible to migrate from one environment to another.
Which three common items can an app builder move when using a change set?
Choose 3 answers

- A. Web-to-lead
- B. Standard fields
- C. Apex class
- D. Custom object
- E. Custom field

Answer: C,D,E

Explanation:
The common items that can be moved using a change set are custom object, Apex class, and custom field. These are metadata

components that can be deployed from one environment to another using change sets. Web-to-lead and standard fields are not metadata components that can be moved using change sets.

NEW QUESTION # 77

Service agents at Ursa Major Solar want a more condensed case view. Service agents also want to be able to modify the associated contact and account records from the case page layout on the Lightning record page.
Which two components should an app builder use to meet these requirements?
Choose 2 answers

- A. Tabs
- B. Path
- C. Rich text
- D. Related record

Answer: A,D

Explanation:
Related record and Tabs. These are correct because the related record component allows service agents to view and edit fields from a related record on the same page, and the tabs component allows service agents to switch between different views of related lists or other components on the same page.

NEW QUESTION # 78

......
