

Pass Guaranteed 2026 Professional CompTIA XK0-006: CompTIA Linux+ Certification Exam Pass Guarantee

BONUS!!! Download part of Getcertkey XK0-006 dumps for free: <https://drive.google.com/open?id=1KvE8HkazFfS8CxLmfPyj4V0kJcmgxaly>

Research indicates that the success of our highly-praised XK0-006 test questions owes to our endless efforts for the easily operated practice system. Most feedback received from our candidates tell the truth that our XK0-006 guide torrent implement good practices, systems as well as strengthen our ability to launch newer and more competitive products. In fact, you can totally believe in our XK0-006 Test Questions for us 100% guarantee you pass exam. If you unfortunately fail in the exam after using our XK0-006 test questions, you will also get a full refund from our company by virtue of the proof certificate.

Getcertkey has many CompTIA Linux+ Certification Exam (XK0-006) practice questions that reflect the pattern of the real CompTIA Linux+ Certification Exam (XK0-006) exam. Getcertkey allows you to create a CompTIA Linux+ Certification Exam (XK0-006) exam dumps according to your preparation. It is easy to create the CompTIA XK0-006 Practice Questions by following just a few simple steps. Our CompTIA Linux+ Certification Exam (XK0-006) exam dumps are customizable based on the time and type of questions.

>> XK0-006 Pass Guarantee <<

Why do you need to get help from Getcertkey CompTIA XK0-006 Exam Questions?

Thousands of people will crowd into our website to choose the XK0-006 study materials. So people are different from the past. Learning has become popular among different age groups. Our XK0-006 guide questions truly offer you the most useful knowledge. You can totally trust us. We are trying our best to meet your demands. Why not give our XK0-006 Practice Engine a chance? Our products will live up to your expectations.

CompTIA Linux+ Certification Exam Sample Questions (Q75-Q80):

NEW QUESTION # 75

Users cannot access a server after it has been restarted. At the server console, the administrator runs the following commands:

```

$ ss -lnt
State      Recv-Q Send-Q           LocalAddress:Port PeerAddress:Port Process
LISTEN     0      32      0.0.0.0:53       0.0.0.0:*
LISTEN     0     128      0.0.0.0:22       0.0.0.0:*
LISTEN     0    1024      0.0.0.0:443      0.0.0.0:*
LISTEN     0   4096      0.0.0.0:5355     0.0.0.0:*
LISTEN     0      512 192.168.0.1:4711 0.0.0.0:*

$ sudo firewall-cmd --list-all
FedoraServer (active)
  target: default
  icmp-block-inversion: no
  interfaces: enp3s0
  sources:
  services: cockpit dhcp dhcpv6-client dns dns-over-tls https
  [...]

$ uptime
14:52:35 up 1 day, 3:08, 1 user, load average: 0.05, 0.07, 0.07

$ ping server1 -c 5
PING server1 (192.168.0.2) 56(84) bytes of data.
64 bytes from server1 (192.168.0.2): icmp_seq=1 ttl=64 time=0.436 ms
64 bytes from server1 (192.168.0.2): icmp_seq=2 ttl=64 time=0.644 ms
...

--- server1 ping statistics ---
5 packets transmitted, 5 received, 0% packet loss, time 4004ms
rtt min/avg/max/mdev = 0.436/0.560/0.644/0.086 ms

$ dig server1
[...]
;; QUESTION SECTION:
;server1. IN A
;; ANSWER SECTION:
server1. 0 IN A 192.168.0.2
[...]
```

Which of the following is the cause of the issue?

- A. The server load average is too high.
- B. The wrong protocol is being used to connect to the web server.
- C. The DNS entry does not have a valid IP address.
- **D. The SSH service has not been allowed on the firewall.**

Answer: D

Explanation:

The server is running and responding to pings, and DNS resolves correctly (dig server1 → 192.168.0.2). The ss -lnt output shows SSH (port 22) is listening, but the firewall (firewall-cmd -- list-all) does not list SSH among the allowed services. Therefore, external users cannot connect because the firewall is blocking SSH.

NEW QUESTION # 76

A Linux user frequently tests shell scripts located in the /home/user/scripts directory. Which of the following commands allows the

user to run the program by invoking only the script name?

- A. export TERM=\$TERM=/home/user/scripts
- B. export alias /home/user/scripts='/bin'
- C. export SHELL=\$SHELL=/home/user/scripts
- D. export PATH=\$PATH:/home/user/scripts

Answer: D

Explanation:

By appending /home/user/scripts to the PATH environment variable, the user can execute scripts from that directory by simply typing the script name without specifying the full path.

NEW QUESTION # 77

A user sends a request to access a virtual server via SSH. Which of the following commands is used to open the SSH standard port?

- A. iptables-save | grep dport-22/tcp
- B. firewall-cmd --remove-service=ssh --permanent
- C. iptables -A INPUT -p tcp --dport sshd -j ACCEPT
- D. firewall-cmd --permanent --add-port=22/tcp

Answer: D

Explanation:

The firewall-cmd --permanent --add-port=22/tcp command (commonly firewall-cmd) opens TCP port 22 in the permanent firewall ruleset so that SSH traffic is allowed. After running it, you'd issue firewall-cmd --reload to apply the change.

NEW QUESTION # 78

Which of the following best describes JSON?

- A. A file format for exchanging information or data between systems
- B. A programming language that developers use to build dynamic websites
- C. An open-source platform that facilitates the creation and administration of isolated environments
- D. A software-based technique that allows a computer to simulate one or more machines so they appear to be real

Answer: A

Explanation:

JSON (JavaScript Object Notation) is a lightweight data-interchange format that is easy for humans to read and write, and easy for machines to parse and generate. JSON is commonly used to transmit data between a server and a client, as it is language-independent and can be used in many environments.

NEW QUESTION # 79

A systems administrator receives reports about connection issues to a secure web server. Given the following firewall and web server outputs:

Firewall output:

Status: active

To	Action	From
443/tcp	DENY	Anywhere
443/tcp (v6)	DENY	Anywhere (v6)

Web server output:

```
tcp LISTEN 0 4096 *:443 *:*
```

Which of the following commands best resolves this issue?

- A. ufw allow 80/tcp
- B. ufw delete deny https/tcp
- C. ufw disable
- D. ufw allow 4096/tcp

Answer: B

Explanation:

The firewall output shows that port 443/tcp (HTTPS) is explicitly denied, even though the web server is correctly listening on it. Removing the deny rule for HTTPS (ufw delete deny https/tcp) resolves the issue while still keeping the firewall active and secure.

NEW QUESTION # 80

.....

Only 20-30 hours on our XK0-006 learning guide are needed for the client to prepare for the test and it saves our client's time and energy. Most people may wish to use the shortest time to prepare for the test and then pass the test with our XK0-006 study materials successfully because they have to spend their most time and energy on their jobs, learning, family lives and other important things. Our XK0-006 Study Materials can satisfy their wishes and client only needs to spare little time to prepare for the XK0-006 test and focus their main attentions on their major things.
