C\_S4CFI\_2504 exam braindumps contain both questions and answers, and it's convenient for you to check the answers after practicing. You can try free demo before buying C\_S4CFI\_2504 Exam Materials, so that you can know what the complete version is like. We provide you with free update for 365 days after purchasing, and the update version for C\_S4CFI\_2504 exam dumps will be sent to you automatically. You just need to check your email and change your learning ways according to new changes.

## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Financial Accounting Sample Questions (Q27-Q32):

### NEW QUESTION # 27

In the Managed Fixed Assets app, assets that are created in the database but not activated or deactivated are displayed under which tab?

- A. Saved
- **B. Draft**
- C. Created
- D. Acquired

**Answer: B**

Explanation:

Comprehensive and Detailed in Depth Explanation:

In the "Manage Fixed Assets" app, assets in a pre-activation state are tracked separately.

\* B: Correct. "Draft" tab shows assets created but not yet activated or posted.

References: SAP Help Portal - "Manage Fixed Assets App."

### NEW QUESTION # 28

What can you do when executing a depreciation posting run?

Note: There are 3 correct answers to this question.

- A. You can process a depreciation test run for an individual asset
- **B. You can reverse the FI posting documents of the depreciation run**
- C. You can select to cancel the depreciation run if the program finds errors in individual assets
- **D. You can check the posted depreciation for each asset on the FI document**
- **E. You can run depreciation separately for each ledger**

**Answer: B,D,E**

Explanation:

Comprehensive and Detailed in Depth Explanation:

The "Depreciation Posting Run" app in SAP S/4HANA Cloud offers multiple functionalities.

A: Correct. Depreciation details are visible in the FI document.

B: Correct. Reversals are possible via the app.

C: Correct. Separate runs per ledger are supported in multi-ledger setups.

D, E: Incorrect. Cancellation and individual asset test runs are not standard features.

#### **NEW QUESTION # 29**

Which tasks are mandatory before you can migrate data for a specific object?

Note: There are 2 correct answers to this question.

- **A. Permission to migrate the data has been assigned**
- B. You select the same migration method previously used for other objects
- **C. Predecessor objects have been migrated**
- D. All previous migration projects are in the "Finished" status

**Answer: A,C**

Explanation:

Comprehensive and Detailed in Depth Explanation:

In the SAP S/4HANA Migration Cockpit, data migration for a specific object requires certain prerequisites to ensure data integrity and system consistency.

\* Option A (Predecessor objects have been migrated): This is correct because SAP S/4HANA migration follows a dependency-driven approach. Predecessor objects (e.g., master data like business partners or G/L accounts) must be migrated first to provide the foundational data required for dependent objects (e.g., transactional data like open items). This ensures referential integrity and prevents errors during the migration process.

\* Option D (Permission to migrate the data has been assigned): This is also correct. Migration in SAP S/4HANA Cloud requires proper authorization, typically assigned via roles in the SAP Fiori Launchpad (e.g., the "Data Migration Specialist" role). Without this, users cannot access or execute migration tasks, ensuring security and compliance with governance policies.

\* Option B (You select the same migration method previously used for other objects): This is incorrect. The migration method (e.g., file upload, staging tables) can vary by object and project requirements. SAP does not mandate using the same method across all objects.

\* Option C (All previous migration projects are in the "Finished" status): This is not a requirement.

While completing prior projects can be a best practice, the Migration Cockpit allows parallel or independent migration projects, provided dependencies are met.

#### **NEW QUESTION # 30**

Which master record object controls the use of a business partner in accounts payable?

- **A. Business partner role**
- B. Business partner grouping
- C. Business partner category
- D. Business partner classification

**Answer: A**

Explanation:

Comprehensive and Detailed in Depth Explanation:

In SAP S/4HANA Cloud, the business partner (BP) framework governs AP usage.

\* A: Correct. BP role (e.g., FLVN01 for vendors) defines AP functionality.
