## New FCP\_FML\_AD-7.4 Test Answers & FCP\_FML\_AD-7.4 Latest Dumps Ppt

When you first contact our software, different people will have different problems. Maybe you are not comfortable with our FCP\_FML\_AD-7.4 exam question and want to know more about our products and operations. As long as you have questions, you can send e-mail to us, we have online staff responsible for ensuring 24-hour service to help you solve all the problems about our

FCP\_FML\_AD-7.4 test prep. After you purchase our FCP\_FML\_AD-7.4 quiz guide, we will still provide you with considerate services. Maybe you will ask whether we will charge additional service fees. We assure you that we are focused on providing you with guidance about our FCP\_FML\_AD-7.4 Exam Question, but all services are free. If you encounter installation problems, we will have professionals to provide you with remote assistance. Of course, we will humbly accept your opinions on our FCP\_FML\_AD-7.4 quiz guide. If you have good suggestions to make better use of our FCP\_FML\_AD-7.4 test prep, we will accept your proposal and make improvements. Each of your progress is our driving force. We sincerely serve for you any time.

## Fortinet FCP - FortiMail 7.4 Administrator Sample Questions (Q62-Q67):

### NEW QUESTION # 62

An organization has different groups of users with different needs in email functionality, such as address book access, mobile device access, email retention periods, and disk quotas.

Which FortiMail feature specific to server mode can be used to accomplish this?

- A. Email group profiles
- B. Access profiles
- C. Domain-level service settings
- **D. Resource profiles**

**Answer: D**

Explanation:

In FortiMail's server mode, Resource Profiles let you group mailboxes by things like disk-quota limits and message-retention periods, while corresponding Access Profiles control services such as address-book and mobile (ActiveSync) access. By defining different resource profiles for each user class, you can give each group its own quota and retention settings (and pair them with matching access profiles for service access).

### NEW QUESTION # 63

Refer to the exhibit, which shows a command prompt output of a telnet command.

```
C:\WINDOWS\system32\cmd.exe
C:\> telnet mx example.com 25
200 FE200F3A15000009.example.com ESMTSP Smtpd: Thu, 21 Jun 2021 17:06:43 -0400
```

Which configuration change must you make to prevent the banner from displaying the FortiMail serial number?

- A. Configure a local domain name
- B. Add a protected domain
- C. Change the operation mode
- **D. Change the host name**

**Answer: D**

### NEW QUESTION # 64

A FortiMail administrator is investigating a sudden increase in DSNs being delivered to their protected domain. After searching the logs, the administrator identifies that the DSNs were not generated because of any outbound email sent from their organization.

Which FortiMail antispam technique can the administrator enable to prevent this scenario?

- A. FortiGuard IP Reputation
- B. Spoofed header detection
- **C. Bounce address tag validation**
- D. Spam outbreak protection.

**Answer: C**

### NEW QUESTION # 65

Refer to the exhibit, which displays an encryption profile configuration.

The screenshot shows the 'Encryption Profile' configuration window. The 'Name' field contains 'IBE\_Push'. The 'Comment' field is empty. The 'Protocol' dropdown is set to 'IBE'. Under the 'IBE Configuration' section, the 'Access method' dropdown is set to 'Push', the 'Maximum size (KB) for Push method' text box contains '1024', the 'Encryption algorithm' dropdown is set to 'AES 256', and the 'Action on failure' dropdown is set to 'Enforce TLS'. A 'FORTINET' logo is visible in the background.

What happens if the attachment size of an IBE email exceeds 1024 KB?

- A. Pull delivery will be used.
- B. TLS will be used.
- C. AES 256 will be used.
- D. The email message will not be delivered.

**Answer: B**

Explanation:

When the attachment exceeds the 1 024 KB push limit, the push attempt is treated as a failure and FortiMail falls back to the configured "Action on failure," which here is to enforce TLS encryption.

#### NEW QUESTION # 66

A FortiMail administrator is investigating a sudden increase in DSNs being delivered to their protected domain. After searching the logs, the administrator identifies that the DSNs were not generated because of any outbound email sent from their organization.

Which FortiMail antispam technique can the administrator enable to prevent this scenario?

- A. FortiGuard IP Reputation
- B. Spam outbreak protection
- C. Spoofed header detection
- D. Bounce address tag validation

**Answer: D**

Explanation:

Enabling Bounce Address Tag Validation prevents FortiMail from accepting forged bounce messages (backscatter) for mail it never actually sent, stopping those unsolicited DSNs from reaching your users.

#### NEW QUESTION # 67

.....

The top features of Itexamguide FCP\_FML\_AD-7.4 exam questions are the availability of Fortinet certification exam in three different formats, real, valid, and updated FCP\_FML\_AD-7.4 exam questions, subject matter experts verified FCP\_FML\_AD-7.4 Exam Questions, free demo download facility, 1 year updated FCP\_FML\_AD-7.4 exam questions download facility, affordable price and 100 percent Fortinet FCP\_FML\_AD-7.4 exam passing money back guarantee.
