It is apparent that a majority of people who are preparing for the Fire-Inspector-II exam would unavoidably feel nervous as the exam approaching, since you have clicked into this website, you can just take it easy now--our Fire-Inspector-II learning materials. Our company has spent more than 10 years on compiling study materials for the exam, and now we are delighted to be here to share our Fire-Inspector-II Study Materials with all of the candidates for the exam in this field. There are so many striking points of our Fire-Inspector-II preparation exam.

Our Fire-Inspector-II study materials provide free trial service for consumers. If you are interested in our Fire-Inspector-II study materials, and you can immediately download and experience our trial question bank for free. Through the trial you will have different learning experience on Fire-Inspector-II exam guide, you will find that what we say is not a lie, and you will immediately fall in love with our products. As a key to the success of your life, the benefits that our Fire-Inspector-II Study Materials can bring you are not measured by money. Fire-Inspector-II test torrent can help you pass the exam in the shortest time.

Certification Fire-Inspector-II Training | Test Fire-Inspector-II Dumps Free

The desktop practice test format comes with all features of the web-based practice exam. TestInsides has made all of the different formats so the exam applicants won't face any additional issues and prepare themselves with the real questions and crack International Code Council Fire-Inspector-II Certification test for the betterment of their futures. One can set the time and questions numbers of practice exams (desktop and web-based) according to their needs. TestInsides is giving multiple mock exams to the customers so they can practice and make themselves perfect.

International Code Council 67 - Fire Inspector II Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26

Given: In automobile refinishing spray booths where drying by heat is done in the spray booth, the spray booth shall be equipped with interlocks between the spraying and drying apparatus and the ventilating system. These interlocks shall be arranged to purge the spray vapors from the spray booth for a minimum period of ___ minutes before the drying apparatus can be operated.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

In automobile refinishing spray booths where drying by heat occurs inside the same spray booth, fire codes require interlocks to prevent ignition hazards.

Before activating the drying apparatus, the ventilation system must purge the booth of spray vapors for at least 5 minutes to remove flammable concentrations.

Reference to Fire Inspector Documentation:

1. 2021 International Fire Code (IFC) - Section 2404.7.3 (Drying Operations in Spray Booths) IFC 2404.7.3 mandates that spray booths must have interlocks to purge vapors for a minimum of 5 minutes before activating the drying process.

This ensures that flammable vapors are removed before heat sources operate, reducing fire risks.

2. NFPA 33 - Standard for Spray Application Using Flammable or Combustible Materials (2021 Edition) - Section 15.4.6 NFPA 33, Section 15.4.6 confirms the requirement for a 5-minute ventilation purge cycle before heat drying.

Detailed Explanation of Answer Choices:

Option A (Incorrect): 2 minutes is insufficient for adequate vapor removal.

Option B (Incorrect): 3 minutes does not meet the minimum safety requirement.

Option C (Incorrect): 4 minutes is slightly below the code-mandated requirement.

Option D (Correct): 5 minutes is the minimum required purge time per IFC 2404.7.3 and NFPA 33.

Thus, the correct and verified answer is: D. 5.

NEW QUESTION # 27

Given: A code official permits a sprinkler system to substitute for a required second exit from a small basement.

How long must records related to this decision be maintained by the code official?

- A. Until the building is sold
- B. Five years
- C. For as long as the building and the condition exist
- D. Three years

Answer: C

Explanation:

Retention of Fire Code-Related Records

According to the International Fire Code (IFC) 2021, Section 104.6, records related to code enforcement decisions, including modifications or substitutions (such as a sprinkler system replacing a second exit), must be retained for as long as the building and the condition exist.

This ensures that future inspections, property owners, and authorities can verify past decisions and compliance history.

2. Why the Records Must Be Retained Permanently

Modifications that impact life safety (such as exit requirements) must remain on record for the lifetime of the building to ensure ongoing compliance and safety.

If the condition (sprinkler substitution for an exit) still exists, any future inspector or building official must be able to verify the original approval and rationale.

3. Verification of Other Options

Option A (Five years) - Incorrect, as fire code modifications must remain on record permanently if they affect egress or fire protection systems.

Option B (Three years) - Incorrect, as this timeframe applies to temporary inspection reports, not major code modifications.

Option C (Until the building is sold) - Incorrect, as ownership changes do not affect the need for record retention on fire safety decisions.

Reference Sources:

International Fire Code (IFC) 2021 - Section 104.6 (Fire Code Record Retention Requirements) NFPA 1: Fire Code (Retention of

Code-Related Decisions) ICC Fire Inspector II Study Guide (2021) Thus, the correct and verified answer is: D. For as long as the building and the condition exist. #

NEW QUESTION # 28

Use, dispensing, and mixing of flammable liquids in open systems shall have continuous mechanical ventilation at a minimum rate of ____ CFM per sq. ft. of floor area.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

Reference to Ventilation Requirements for Flammable Liquids:

The International Fire Code (IFC 2021), Section 5004.3.7.3, and NFPA 30 (Flammable and Combustible Liquids Code), Section 18.5.4.1 specify the ventilation requirements for the use, dispensing, and mixing of flammable liquids in open systems.

Continuous mechanical ventilation must be provided at a minimum rate of 2 CFM per square foot of floor area.

Reason for Ventilation Requirements:

Flammable liquids release vapors that can ignite at low concentrations, creating fire and explosion hazards.

Proper ventilation removes vapors to prevent them from reaching flammable limits in the air.

Clarification of Incorrect Answer Choices:

A: 1 CFM per sq. ft. # Incorrect

Too low to effectively control flammable vapor accumulation.

C: 3 CFM per sq. ft. # Incorrect

While more ventilation can be beneficial, the minimum required by code is 2 CFM per sq. ft.

D: 4 CFM per sq. ft. # Incorrect

Exceeds the code-mandated minimum requirement, though higher ventilation rates may be required based on specific hazards.

Conclusion:

The correct and verified answer is B (2 CFM per sq. ft.), based on IFC 5004.3.7.3 and NFPA 30 Section 18.5.4.1, ensuring safe handling of flammable liquids in open systems.

NEW QUESTION # 29

Given: Scheduling inspections should be done to obtain a high level of efficiency. When scheduling inspections at multiple occupancies on the same day, the inspector should:

- A. select occupancies in the same general area.
- B. select occupancies with historically low violations.
- C. only identify critical violations.
- D. set limits on the time spent at each occupancy.

Answer: A

Explanation:

Efficient scheduling minimizes travel time and maximizes inspection coverage, a practical aspect of fire inspection management (not explicitly detailed in the IFC but implied in Section 106.2, Inspections).

Selecting occupancies in the same geographic area (C) reduces travel, allowing more time for thorough inspections. Option A undermines the comprehensive nature of inspections required by IFC Section 106.1.

Option B could compromise inspection quality, not efficiency. Option D focuses on violation history, which doesn't inherently improve scheduling efficiency and may skew priorities. Thus, C is the most logical and IFC-aligned choice.

NEW QUESTION # 30

An acceptance test for a fire alarm system in a new apartment building should be scheduled after:

- A. each zone is completed.
- B. the contractor verifies full compliance.

- C. the system has been installed and operating for one year.
- D. the hydrostatic test of the underground main is completed.

Answer: B

Explanation:

IFC Section 901.5 (Acceptance Tests) requires fire protection systems, including fire alarms, to be tested upon completion to ensure compliance with NFPA 72 (National Fire Alarm and Signaling Code) and the IFC. The contractor's verification of full compliance (B) signals readiness for the official acceptance test by the fire code official, ensuring all components are installed and functional. Option A (zone-by-zone testing) is impractical for final acceptance. Option C ties the test to water supply, irrelevant to alarms. Option D (one year) is excessive and not required by IFC or NFPA 72 for initial acceptance. Thus, B is correct.

NEW QUESTION # 31

.....

As we know, there are nothing best, only something better for we are keeping developing and face competition all the time. Taht is why our Fire-Inspector-II study guide is regularly updated by our experts for keeping it always compatible to the needs and requirements of our worthy customers all over the world. The result is that you will always find our Fire-Inspector-II Exam Braindumps are the latest and valid. Come to buy our Fire-Inspector-II learning quiz, you will pass your exam easily!

Certification Fire-Inspector-II Training: <https://www.testinsides.top/Fire-Inspector-II-dumps-review.html>

But keep in mind that the Fire-Inspector-II certification test is a worthwhile and challenging certificate, Thousands of Fire-Inspector-II certification holders provide helpful input to TestInsides, Thirdly, perfect Fire-Inspector-II practice materials like us even provide you the opportunities to own goal, ideal struggle, better work, and create a bright future, Of course you can freely change another Fire-Inspector-II exam guide to prepare for the next exam.

This includes archive areas, comments, the Fire-Inspector-II post body, and more, But even this level of readability is still less than that of the printed page, But keep in mind that the Fire-Inspector-II Certification test is a worthwhile and challenging certificate.

Free PDF International Code Council - Accurate New Fire-Inspector-II Exam Testking

Thousands of Fire-Inspector-II certification holders provide helpful input to TestInsides, Thirdly, perfect Fire-Inspector-II practice materials like us even provide you the opportunities Certification Fire-Inspector-II Training to own goal, ideal struggle, better work, and create a bright future.

Of course you can freely change another Fire-Inspector-II exam guide to prepare for the next exam, But with proper planning, firm commitment, and TestInsides Fire-Inspector-II Questions, you can pass this milestone easily.
