Certification 1z0-1080-25 Test Questions & 1z0-1080-25 Passing Score Feedback

It is our unshakable faith and our 1z0-1080-25 practice materials will offer tremendous help. The quality and value of the 1z0-1080-25 guide prep are definitely 100 percent trust-able. We guarantee that you can pass the exam at one time even within one week

based on 1z0-1080-25 Exam Braindumps regularly 98 to 100 percent of former exam candidates have achieved their success by them. We provide tracking services to all customers who purchase our 1z0-1080-25 learning questions 24/7.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 2	• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 3	• Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.
Topic 4	• Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.
Topic 5	• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 6	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 7	• Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 8	• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 9	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 10	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 11	• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 12	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 13	• Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 14	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 15	• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 16	• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.

Topic 17	• Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.

Oracle Planning 2025 Implementation Professional Sample Questions (Q50-Q55):

NEW QUESTION # 50
Which client requirement aligns with using a custom BSO plan type along with or in place of the Workforce module?

- A. The client requires more than three custom dimensions.
- B. Because of sparse dimensionality, aggregation times are slow in the Workforce module.
- C. The Operations department requires a more granular level of detail than the Sales department in the Entity dimension.
- D. The client has 10 dimensions in the application and needs to report at each intersection.
- E. The client would like to plan salary by Position.

Answer: B

NEW QUESTION # 51
In Financials, you can leverage out-of-the-box calculations to aggregate and prepare actual, plan, and forecast data. Which calculation rule would you run to update reports or analyze data at various levels of the business hierarchy?

- A. Prepare Forecast
- B. Calculate Actuals
- C. Rollup
- D. Prepare Plans

Answer: C

NEW QUESTION # 52
Which card in the Application cluster allows you to enable modules?

- A. Cube Editor
- B. Settings
- C. Configure
- D. Enable Features
- E. Tools

Answer: C

Explanation:
In Oracle Planning 2024, the Application cluster in the navigator includes cards for managing application settings and features. The card that allows you to enable modules (e.g., Workforce, Projects) is:
* A. Settings: Incorrect. Settings is not a card in the Application cluster; it's typically a broader system- level option, not specific to module enablement.
* B. Configure: Correct. The Configure card in the Application cluster provides access to the Enable Features page, where administrators can turn on modules like Financials, Workforce, or Projects.
* C. Tools: Incorrect. The Tools card offers utilities (e.g., diagnostics, job scheduling), not module enablement.
* D. Enable Features: Incorrect. While "Enable Features" is the specific action/page, it is accessed via the Configure card, not a standalone card in the Application cluster.
* E. Cube Editor: Incorrect. Cube Editor is for managing cube structures (e.g., dimensions), not enabling modules.
The Oracle documentation specifies that the Configure card is the entry point for enabling modules, making B the correct answer.

NEW QUESTION # 53

Which statement describes infolets?

- A. Infolets are a form type that provides flexible row management where dimension and member row cells and all data cells are unprotected.
- B. Infolets help you organize, track, and prioritize your workload.
- C. Infolets are predefined dashboards that give you insight into the overall project financials and expense and revenue metrics.
- D. Infolets give business process designers control over how various roles or groups interact with a business process.
- E. Infolets help you quickly analyze data and understand key business questions by presenting a visual overview of high-level, aggregated information.

Answer: E

Explanation:

In Oracle Planning 2024 Implementation, infolets are a feature designed to provide users with quick, visual insights into critical business data. They are not full dashboards, task management tools, or process control mechanisms, but rather compact, high-level representations of aggregated information.

* C. Infolets help you quickly analyze data and understand key business questions by presenting a visual overview of high-level, aggregated information: This statement accurately describes infolets.

They are visual tiles or widgets that display summarized data (e.g., KPIs, trends) to help users grasp key business insights at a glance. Infolets are typically found on the home page or navigation clusters and are customizable to highlight specific metrics relevant to the user's role or application.

* A. Infolets are predefined dashboards that give you insight into the overall project financials and expense and revenue metrics: While infolets provide insights, they are not full "predefined dashboards." Dashboards are more comprehensive, whereas infolets offer concise, targeted views of data.

* B. Infolets help you organize, track, and prioritize your workload: This describes task management or navigation features (e.g., task lists), not infolets, which focus on data visualization rather than workload management.

* D. Infolets give business process designers control over how various roles or groups interact with a business process: Infolets are not about process design or role interaction; they are about displaying data, not controlling processes.

* E. Infolets are a form type that provides flexible row management where dimension and member row cells and all data cells are unprotected: Infolets are not a form type; they are separate from forms and focus on visualization, not data entry or row management.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Using Infolets" (docs.oracle.com, updated 2024). Describes infolets as "visual overviews of high-level, aggregated information to quickly analyze data and answer business questions."

* Oracle Planning 2024 Implementation Study Guide: Defines infolets as tools for presenting summarized data visually for quick analysis.

NEW QUESTION # 54

A company has enabled Financials and would now like to make changes to the initial configuration. Which three changes can be made?

- A. Changing the selected cash flow method
- B. Adding custom dimensions
- C. Enabling Income Statement
- D. Renaming custom dimensions
- E. Enabling rolling forecast
- F. Enabling Expense

Answer: B,D,E

NEW QUESTION # 55
