

# Guaranteed NSE6\_FSR-7.3 Success & Guaranteed NSE6\_FSR-7.3 Questions Answers

BTW, DOWNLOAD part of Itbraindumps NSE6\_FSR-7.3 dumps from Cloud Storage: <https://drive.google.com/open?id=1mSUrMjZG2AXvml54IkOPf8gNqabs>

The NSE6\_FSR-7.3 guide dump from our company is compiled by a lot of excellent experts and professors in the field. In order to help all customers pass the exam in a short time, these excellent experts and professors tried their best to design the study version, which is very convenient for a lot of people who are preparing for the NSE6\_FSR-7.3 exam. You can find all the study materials about the exam by the study version from our company. More importantly, we can assure you that if you use our NSE6\_FSR-7.3 Certification guide, you will never miss any important and newest information. We will send you an email about the important study information every day in order to help you study well. We believe that our NSE6\_FSR-7.3 exam files will be most convenient for all people who want to take an exam.

## Fortinet NSE6\_FSR-7.3 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Security Management: This section covers how Security Engineers implement role-based access control (RBAC) and set up team structures within FortiSOAR to streamline security management.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• SOC and SOAR Overview: Security Engineers can gain an understanding of SOC and SOAR deployment requirements, including licensing management for FortiSOAR.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• System Monitoring and Maintenance: For FortiSOAR Administrators, this domain covers using various tools for system monitoring to ensure consistent performance. This includes how to regularly oversee FortiSOAR processes, along with other critical functions.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• System Configuration: FortiSOAR requires careful setup of applications for FortiSoar System Administrators. It covers system fixtures, and proxy settings to function optimally.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• System Operation: For System Engineers, this section covers Elasticsearch data management that may need to be externalized or migrated to accommodate system needs. Additionally, this section covers configuring the recommendation engine and utilizing the war room functionality.</li> </ul>

## My Review On Fortinet NSE6\_FSR-7.3 Exam Questions

NSE6\_FSR-7.3 Guide Quiz helped over 98 percent of exam candidates get the certificate. Before you really attend the NSE6\_FSR-7.3 exam and choose your materials, we want to remind you of the importance of holding a certificate like this one. Obtaining a NSE6\_FSR-7.3 certificate like this one can help you master a lot of agreeable outcomes in the future, like higher salary, the opportunities to promotion and being trusted by the superiors and colleagues.

### Fortinet NSE 6 - FortiSOAR 7.3 Administrator Sample Questions (Q11-Q16):

#### NEW QUESTION # 11

Refer to the exhibit.

The screenshot shows the FortiSOAR 7.3 Administrator configuration page for SMTP service. The page includes the following configuration sections:

- SMTP:** A dropdown menu is set to "SMTP". Below it, a note says "Please ensure your SMTP service is configured." The email address field contains "csadmin@internal.lab".
- Monitoring Interval (Minutes):** A text input field contains the value "5". A note below says "The monitoring job will run at this schedule".
- System Health Thresholds:** A note says "A notification will be generated when the resource consumption on the server is high. Define the respective thresholds below:". There are six input fields:
  - Memory Utilization (%): 80
  - CPU Utilization (%): 80
  - Disk Utilization (%): 80
  - Swap Memory Utilization (%): 50
  - Workflow Queue Threshold: 100
  - WAL Files Size (GB): 20
- Cluster Health:** A note says "An email notification will also be generated if there are missed heartbeats from any of the cluster nodes, or if the replication lag is high. Define the respective thresholds below:". There are two input fields:
  - Missed Heartbeat Count: 3
  - Replication Lag (GB): 3

How long after the syops-ha service goes down will the heartbeat missed notification be sent to the administrator?

- A. 60 minutes
- B. 15 minutes
- C. 5 minutes
- D. 3 minutes

**Answer: A**

Explanation:

In FortiSOAR's high availability (HA) setup, if the cyops-ha service becomes unresponsive, the system is configured to send a "heartbeat missed" notification after a specified period, which in this case is 60 minutes. This delay allows for transient issues to be resolved without triggering immediate alerts, while also ensuring that administrators are informed of prolonged service disruptions. Timely notifications about the cyops-ha service's status help maintain the reliability and responsiveness of the HA environment.

#### NEW QUESTION # 12

What two permissions must you assign to a user to allow the purge of audit logs for all users? (Choose two answers)

- A. Delete permission on the Audit Log Activities module
- B. Delete permission on the People module
- C. Delete permission on the Users module
- D. Delete permission on the Security module

**Answer: A,D**

Explanation:

Comprehensive and Detailed Explanation From FortiSOAR 7.3 Exact Extract study guide:

According to the FortiSOAR 7.3 Administration Guide under the "Audit Logs" and "Role-Based Access Control (RBAC)" sections, managing the lifecycle of system logs requires elevated administrative privileges.

To perform a manual purge of audit logs, the system validates permissions across two specific areas:

\* Audit Log Activities Module: The user must have Delete permissions on this specific module because it is the repository where the actual log records are stored. Without "Delete" rights here, the application cannot remove the database entries.

\* Security Module: Because the purging of audit logs is a sensitive security operation that affects the system's accountability trail, FortiSOAR requires the Delete permission on the Security module. This acts as a secondary administrative guardrail to ensure only authorized security administrators can permanently remove audit trails.

Permissions on the People or Users modules (Options C and D) are used for managing user profiles and account attributes, but they do not grant the authority to manipulate system-level audit databases.

#### NEW QUESTION # 13

Which two ports must be open between FortiSOAR HA nodes?\* (Choose two.)

- A. Port 5432
- B. Port 6380
- C. Port 9200
- D. Port 25

**Answer: A,C**

Explanation:

In a FortiSOAR HA configuration, certain ports must be open for communication between nodes. Port 5432 is required for PostgreSQL database communication, which is essential for data replication between HA nodes.

Port 9200 is used by Elasticsearch, which FortiSOAR leverages for indexing and search functions across the nodes. These ports must be accessible between nodes to ensure seamless operation and data consistency within the cluster.

#### NEW QUESTION # 14

Which service on FortiSOAR is the playbook scheduler?

- A. uwsgi
- B. celeryd
- C. cyops-torcat
- D. colcrybeatd

**Answer: D**

Explanation:

In FortiSOAR, the service responsible for the playbook scheduling functionality is colcrybeatd. This service manages the timing and execution of scheduled playbooks, allowing for the automation of various tasks at specified intervals. It ensures that playbooks

execute according to their configured schedules, which can include tasks such as data ingestion, threat detection, or incident response actions. Proper functioning of this service is essential for the reliable automation of time-dependent processes within FortiSOAR.

### NEW QUESTION # 15

Refer to the exhibit.

The screenshot shows the Fortinet FortiSOAR configuration interface. At the top, there is a dropdown menu for 'SMTP' and a text field for the email address 'c.admin@internal.lab'. Below this, a message states 'Please ensure your SMTP service is configured.' The 'Monitoring Interval (Minutes)' is set to 5. The 'System Health Thresholds' section includes: Memory Utilization (%) at 80, CPU Utilization (%) at 80, Disk Utilization (%) at 80, Swap Memory Utilization (%) at 50, Workflow Queue Threshold at 100, and WAL Files Size (GB) at 20. The 'Cluster Health' section includes: Missed Heartbeat Count at 3 and Replication Lag (GB) at 3. A large watermark 'itbraindumps.com' is visible across the center of the page.

How long after the syops-ha service goes down will the heartbeat missed notification be sent to the administrator?

- A. 60 minutes
- B. 15 minutes
- C. 5 minutes
- D. 3 minutes

**Answer: A**

Explanation:

In FortiSOAR's high availability (HA) setup, if the cyops-ha service becomes unresponsive, the system is configured to send a "heartbeat missed" notification after a specified period, which in this case is 60 minutes.

This delay allows for transient issues to be resolved without triggering immediate alerts, while also ensuring that administrators are informed of prolonged service disruptions. Timely notifications about the cyops-ha service's status help maintain the reliability and responsiveness of the HA environment.

### NEW QUESTION # 16

.....

A calm judgment is worth more than a thousand hasty discussions. I know that when you choose which our NSE6\_FSR-7.3 exam materials to buy, it will be very tangled up. This is a responsible performance for you. But you can't casually make a choice because of tangle. And our NSE6\_FSR-7.3 Study Materials won't let you regret. You can just free download the demos of the NSE6\_FSR-7.3 practice guide to have a check our quality.
