And our CSC2 Test Guide benefit exam candidates by improving their ability of coping the exam in two ways, first one is their basic knowledge of it.

CSI Canadian Securities Course Exam2 Sample Questions (Q114-Q119):

NEW QUESTION # 114

What is the main benefit of investing in preferred shares?

- A. Priority to receive fixed dividends ahead of common shareholders.
- B. Guaranteed dividend payment.
- C. Higher potential for capital appreciation than common shares.
- D. Priority to claim assets ahead of debt holders.

Answer: A

Explanation:

Preferred shares provide investors with priority to receive fixed dividends ahead of common shareholders.

This fixed income feature makes preferred shares similar to debt instruments but with characteristics of equity. While preferred shareholders have no guaranteed dividend payment (subject to the company's discretion and profitability), they are entitled to receive dividends before any distribution to common shareholders.

Preferred shares do not have a higher potential for capital appreciation compared to common shares, as they are typically designed for income rather than growth. Additionally, preferred shareholders have a lower claim on assets compared to debt holders.

NEW QUESTION # 115

Which type of ETF is also referred to as smart beta ETF?

- A. Standard
- B. Synthetic
- C. Index-based
- D. Rules-based

Answer: D

Explanation:

Rules-based ETFs, also known as smart beta ETFs, use predetermined rules or algorithms to select and weight securities in their portfolios. These ETFs aim to outperform traditional market-capitalization-weighted ETFs by targeting specific factors such as value, momentum, quality, or volatility.

* Strategic Factor Weighting: Securities are weighted based on fundamental or quantitative factors, not just market capitalization.

* Higher Returns Potential: These ETFs are designed to capture excess returns (alpha) relative to a benchmark.

* Lower Costs: Smart beta strategies often combine active and passive management elements at a lower cost than traditional active funds.

* A. Rules-based: Correct answer. Smart beta ETFs are built on rule-based frameworks designed to achieve specific investment objectives.

* B. Standard: Refers to traditional, market-cap-weighted ETFs, not smart beta.

* C. Synthetic: Refers to ETFs that use derivatives to replicate returns of an underlying index, unrelated to smart beta.

* D. Index-based: Includes standard ETFs tracking an index but does not apply specifically to smart beta.

Characteristics of Smart Beta ETFs: Explanation of Options: References:

* CSC Volume 2, Chapter 19: Smart Beta and Rules-Based ETFs, which describes their unique features, benefits, and strategies.

NEW QUESTION # 116

What risk exists for an investor unable to readily exit a position in an alternative investment near current prices?

- A. Default.
- B. Trading.
- C. Liquidity.
- D. Deal breakage.

Answer: C

NEW QUESTION # 117

What is the primary difference between industry standards and industry ratios?

- A. Comparing against industry standards provides more fair and thorough analysis results rather than comparing against the average of the industry.
- B. Industry standards change each year, while industry ratios remain relatively static.
- C. Industry standards are presented as specific numbers, while industry ratios are presented as a range.
- D. Industry standards provide a consistent benchmark over time, while industry ratios change each year.

Answer: C

NEW QUESTION # 118

The following financial information is available for fund SKE:

What is SKE fund's net asset value per share?

- A. \$10, 00
- B. \$11, 90
- C. \$12,00
- D. \$9,90

Answer: B

Explanation:

A white sheet with black text Description automatically generated

Explanation of Answer Options:

- * Option A (\$9.90): Incorrect; this value does not reflect the subtraction of liabilities.
- * Option B (\$11.90): Correct; it accounts for the subtraction of liabilities and proper division by outstanding units.
- * Option C (\$12.00): Incorrect; it represents the market value of assets per unit without deducting liabilities.
- * Option D (\$10.00): Incorrect; this value does not align with the given data or calculations.

References to Canadian Securities Course Exam 2 Study Materials:
