FCP_FML_AD-7.4 New Dumps Sheet, Exam FCP_FML_AD-7.4 Bootcamp

Our FCP_FML_AD-7.4 practice prep is so popular and famous for it has the advantage that it can help students improve their test scores by improving their learning efficiency. Therefore, users can pass FCP_FML_AD-7.4 exams with very little learning time. For another example, there are some materials that apply to students with professional backgrounds that are difficult for some industry rookie to understand. But our FCP_FML_AD-7.4 Learning Materials are compiled to simple language for our customers to understand easily.

Fortinet FCP_FML_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	• Email Security: This section of the exam measures skills of a Network Security Administrator and deals with implementing security controls to filter and manage email threats. Candidates must configure session-based filtering, spam detection methods, malware protection, APT mitigation, and content filtering. The section also includes email archiving configurations for compliance and storage.
Topic 2	• Server Mode and Transparent Mode: This section of the exam measures skills of a Network Security Administrator and explains how to deploy and manage FortiMail in different operation modes. It includes configuring server mode to handle mail directly and deploying FortiMail in transparent mode where it acts as a gateway to filter email traffic without altering the existing mail infrastructure.
Topic 3	• Email Flow and Authentication: This section of the exam measures skills of a Messaging Security Engineer and focuses on configuring FortiMail to handle email flow securely. It includes enabling and matching authentication protocols, setting up secure MTA features, and implementing access control, IP policies, and recipient-based policies to control mail delivery and security.
Topic 4	• Encryption: This section of the exam measures skills of a Messaging Security Engineer and addresses the implementation of encryption methods in FortiMail. It covers traditional SMTP encryption and identity-based encryption (IBE). Candidates are expected to configure these technologies and manage IBE users for secure email communication.
Topic 5	• Initial Deployment and Basic Configuration: This section of the exam measures skills of a Network Security Administrator and covers the foundational setup of FortiMail. It includes understanding SMTP and email flow, performing initial configurations such as selecting operation mode, system settings, and defining protected domains. It also involves deploying FortiMail in high-availability clusters to ensure service continuity.

Fortinet FCP - FortiMail 7.4 Administrator Sample Questions (Q41-Q46):

NEW QUESTION # 41

While reviewing logs, an administrator discovers that an incoming email was processed using policy IDs 0:4:9:INTERNAL. Which two statements describe what this policy ID means? (Choose two.)

- A. The FortiMail configuration is missing an access delivery rule.
- B. Access control policy number 9 was used.
- C. FortiMail is applying the default behavior for relaying inbound email.
- D. The email was processed using IP-based policy ID 4.

Answer: C,D

NEW QUESTION # 42

Refer to the exhibits, which shows a DLP scan profile configuration (DLP Scan Rule 1 and DLP Scan Rule 2) from a FortiMail device.

DLP Scan Rule 1

Message Scan Rule

Name:

Comment:

Scan Rule

Match all conditions **Match any condition**

+ New... Edit... Delete Total 3

ID ...	Condition
1	Body contains sensitive data "Credit_Card_Number"
2	Attachment contains sensitive data "Credit_Card_Number"
3	Subject contains Credit Card

DLP Scan Rule 2

Message Scan Rule

Name:

Comment:

Scan Rule

Conditions **Exceptions**

+ New... Edit... Delete Total 1

ID ...	Condition
1	Sender contains sales@example.com

Which two message types will trigger this DLP scan rule? (Choose two.)

- A. An email that contains credit card numbers in the body, attachment, and subject will trigger this scan rule.
- B. An email message that contains credit card numbers in the body will trigger this scan rule.
- C. An email message with a subject that contains the term "credit card" will trigger this scan rule.

- D. An email sent from sales@internal.lab will trigger this scan rule, even without matching any conditions.

Answer: B,C

Explanation:

Any message whose subject line contains the phrase "credit card" meets one of the "Match any condition" criteria, so it triggers the rule.

Any message whose body contains a detected credit-card number likewise meets a condition and triggers the rule.

NEW QUESTION # 43

Refer to the exhibit, which shows an nslookup output of MX records of the example.com domain.

```

C:\> nslookup -type=mx example.com
Server:      PriNS
Address:     10.200.3.254

Non-authoritative answer:
example.com  MX preference = 10, mail exchanger = mx.hosted.com
example.com  MX preference = 20, mail exchanger = mx.example.com
  
```

Which two MTA selection behaviors for the example.com domain are correct? (Choose two.)

- A. The primary MTA for the example.com domain is mx.hosted.com
- B. mx.example.com will receive approximately twice the number of email as mx.hosted.com because of its preference value.
- C. The external MTAs will send email to mx.example.com only if mx.hosted.com is unreachable.
- D. The PriNS server should receive all email for the example.com domain.

Answer: A,C

NEW QUESTION # 44

Refer to the exhibit which shows a command prompt output of a telnet command.

```

C:\WINDOWS\system32\cmd.exe
C:\> telnet mx example.com 25
200 FE200F3A15000009,example.com ESMTD Smtpd; Thu, 21 Jun 2021 17:06:43 -0400
  
```

Which configuration change must you make to prevent the banner from displaying the FortiMail serial number?

- A. Change the host name
- B. Add a protected domain
- C. Configure a local domain name
- D. Change the operation mode

Answer: A

NEW QUESTION # 45

Refer to the exhibit, which shows an antivirus action profile.

Antivirus Action Profile **FORTINET**

AntiVirus Action Profile

Domain: system

Name: AV_Action

Comment:

☒ Tag subject [VIRUS]

☐ Insert header

+ New... Edit... Delete Total: 0

Header Name	Header Value

☐ Insert disclaimer default at Start of message

☐ Deliver to alternate host

☐ Deliver to original host

☐ BCC

☒ Replace infected / suspicious body or attachment --None-- +

☒ Remove URL detected by FortiSandbox

☐ Archive to account --None-- +

☐ Notify with profile --None-- +

☐ Final action Discard

What are two expected outcomes if FortiMail applies this antivirus action profile to an email?
(Choose two.)

- A. A replacement message will be added to the email.
- B. Virus content will be removed from the email.
- C. The original email will be sent to the system quarantine.
- D. The sanitized email will be sent to the recipient's personal quarantine.

Answer: A,B,C

Explanation:

A replacement message will be added to the email.

Because the "Replace infected/suspicious body or attachment" action is enabled, any detected virus object is stripped out and replaced with a stub or notice.

Virus content will be removed from the email.

FortiMail strips the infected parts of the message as part of that replacement action.
