Adobe Experience Manager Sites Developer Expert Sample Questions (Q48-Q53):

NEW QUESTION # 48

A customer noticed slower Adobe Experience Manager performance in the last couple of days. The segment store size is almost double the size from the previous week.

To reduce the segment store size and maintain overall Adobe Experience Manager health, which two Adobe Experience Manager maintenance tasks should be executed Weekly? (Choose two.)

- A. Online Revision Cleanup
- B. Clientlib Dumps
- C. Datastore Garbage Collection
- D. Version Purge

Answer: A,C

NEW QUESTION # 49

A customer needs to create a user and due to security reasons, that user can only have access to /content/foo and none of the child nodes.

How should the Adobe Experience Manager Developer implement permission restrictions on the /content/foo node to meet this requirement?

- A. rep:glob = "child"
- B. rep:globs = "**"
- C. rep:glob = ""

Answer: C

NEW QUESTION # 50

A developer is tasked with designing a solution to accommodate multiple client projects within a single Adobe Experience Manager (AEM) instance, each requiring its own set of unique resources, code, and content.

Given the need for true multi-tenancy, where each tenant operates independently with zero knowledge of other tenants and no shared code, content, or common authors, which approach should the developer recommend?

- A. Encourage the use of component groups and allowedPaths properties to logically separate tenant-specific components and templates within the same AEM instance.
- B. Utilize AEM's out-of-the-box multi-tenancy capabilities to segregate tenants within the same author and publish instances, relying on access control lists (ACLs) and content path organization to ensure separation.
- C. Implement separate author and publish instances for each tenant, ensuring complete isolation of resources, code, and content, thereby achieving true multi-tenancy.

Answer: C

NEW QUESTION # 51

A developer is creating a set of SPA components, half of which do not require a custom component exporter. The developer needs to override the default exporter for the remaining components.

How can the developer meet this goal?

- A. Implement FallbackComponentImpl service
- B. Implement ImplementationPicker service
- C. Implement ComponentExporter service

Answer: C
