ITZert kann Ihnen nicht nur die ausgezeichnete Prüfungsunterlagen zur The Open Group OG0-093 Zertifizierung sondern auch guten Service bieten. Kaufen Sie ITZert Dumps, bekommen Sie einjährige kostenlose Aktualisierung von ITZert. Damit können Sie immer die neuesten The Open Group OG0-093 Prüfungsfragen besitzen. Falls Sie die The Open Group OG0-093 Prüfung nicht ausgereicht hätten, gibt ITZert Ihnen voll Geld zurück. Und dann machen Sie sich keine Sorge. Wir ITZert sind sehr zuversichtlich für unsere Dumps. Glauben Sie bitten auch an uns. Verpassen Sie bitte nicht ITZert zu Ihrem Erfolg. Wenn Sie das ignorieren, verlieren die Chance für einen einmaligen Erfolg.

Die OG0-093 Prüfung ist dafür konzipiert, das Wissen und die Fähigkeiten von IT-Profis zu testen, die eine Zertifizierung in TOGAF 9 anstreben. Es handelt sich um eine anspruchsvolle Prüfung, die eine erhebliche Vorbereitung und Studium erfordert. Das Bestehen der Prüfung kann jedoch eine wertvolle Referenz für IT-Profis sein, die ihre Karriere in der Unternehmensarchitektur vorantreiben möchten. Durch den Erwerb der TOGAF 9 Zertifizierung können IT-Profis ihr Wissen und ihre Expertise in Unternehmensarchitektur demonstrieren und einen Wettbewerbsvorteil auf dem Arbeitsmarkt erlangen.

Die TOGAF 9 -Zertifizierung wird im Bereich der Enterprise -Architektur sehr geschätzt, da das Know-how und die Fähigkeiten des Kandidaten in der Verwendung des TOGAF -Frameworks zur Entwicklung und Verwaltung von Unternehmensarchitektur verwendet werden. Die Zertifizierung wird global anerkannt und wird häufig von Organisationen benötigt, die Unternehmensarchitekten einstellen oder fördern möchten. Durch die Abgabe der OG0-093-Prüfung und die Erlangung der TOGAF 9-Zertifizierung können die Kandidaten ihre Karrieremöglichkeiten erweitern und ihr Engagement für hervorragende Leistungen in der Unternehmensarchitektur demonstrieren.

OG0-093 Neuesten und qualitativ hochwertige Prüfungsmaterialien bietet - quizfragen und antworten

Durch The Open Group OG0-093 Zertifizierungsprüfung wird sich viel Wandel bei Ihnen vollziehen. Beispielsweise werden Ihr Beruf und Leben sicher viel verbessert, weil die The Open Group OG0-093 Zertifizierungsprüfung sowieso eine ziemlich wichtige Prüfung ist. Aber so einfach ist es nicht, diese Prüfung zu bestehen.

Teil 1 der Prüfung deckt das grundlegende Wissen des TOGAF -Frameworks ab, einschließlich der grundlegenden Konzepte, der Schlüsselterminologie und der Kernprinzipien der Unternehmensarchitektur. Dieser Teil der Prüfung besteht aus 40 Multiple-Choice-Fragen, und Kandidaten haben 60 Minuten Zeit, um sie zu vervollständigen. Teil 2 der Prüfung hingegen konzentriert sich auf die

Anwendung des TOGAF-Frameworks in realen Szenarien. Dieser Teil der Prüfung besteht aus 8 komplexen szenariobasierten Fragen, und die Kandidaten haben 90 Minuten Zeit, um sie zu vervollständigen.

The Open Group TOGAF 9 Combined Part 1 and Part 2 OG0-093 Prüfungsfragen mit Lösungen (Q232-Q237):

232. Frage

Which of the following best describes capability based planning?

- A. A human resource planning technique that focuses on capable architects
- B. A business planning technique that focuses on horizontal capabilities
- **C. A business planning technique that focuses on business outcomes**
- D. A business planning technique that focuses on vertical capabilities

Antwort: C

233. Frage

Scenario

Please read this scenario prior to answering the Question

You are serving as an Enterprise Architect at a large aerospace company. It designs, manufactures and sells civil and military aviation products worldwide and manufactures in multiple countries both inside and outside of the European Union. The company has grown rapidly by acquisition and has inherited numerous different procurement processes and related IT systems.

Recently, several procurement processes, within the civil aviation business, have had problems related to the timing of purchases, which has led to excess inventory. The Vice President in charge of Supply Chain Management has made the decision to consolidate and reduce redundant procurement processes and systems. He has committed to the CEO that the business will move to a "Just-in-time" procurement system so as to keep inventory costs low.

The TOGAF standard is used for internal Enterprise Architecture activities. At present, there are no architectural assets in the Architecture Repository related to this initiative. All assets will need to be acquired, customized, or created from scratch. The company prefers to implement commercial off the shelf package applications with little customization. The CIO, who is the project sponsor, has stated that she is not concerned about preserving the existing procurement processes or systems.

This project is using an iterative approach for executing the Architecture Development Method (ADM). The architecture development project has completed the Architecture Vision Phase and has started a number of iteration cycles to develop the Architecture. As a packaged application is being considered, the next iteration will include both the Business and Application Architectures.

Stakeholder concerns that should be addressed by these architectures include:

1. What groups of people should be involved in procurement-related business processes?
2. What applications will these groups use once the architecture development is complete?
3. What non-procurement applications will need to be integrated with the new procurement applications?
4. What are the dependences between the non-procurement and the new procurement applications?

Refer to the Scenario

[Note: You may need to refer to the Architectural Artifacts chapter, section 31.6 (located in Part IV) within the reference text in order to answer this question.] You have been asked to identify the most appropriate catalogs, matrices, and diagrams to support the next iteration of Architecture development.

Based on the TOGAF standard, Version 9.2, which of the following is the best answer?

- A. You would describe the Baseline Business Architecture with an Organization/Actor catalog, a Business Service/Function catalog, and a Data Entity/Business Function matrix. You would describe the Baseline Application Architecture with an Application Portfolio catalog and an Application/Function matrix.
- B. You would describe the Target Business Architecture with a Business Interaction matrix, and a Business Service/Function catalog. You would describe the Target Application Architecture with an Application Communication diagram, an Application/Organization matrix, an Application Interaction matrix and an Interface catalog.
- C. You would describe the Baseline Business Architecture with a Baseline Business Process catalog, and an Object lifecycle catalog. You would describe the Baseline Application Architecture with an Interface catalog and a Technology Portfolio catalog.
- **D. You would describe the Target Business Architecture with a Business Service/Function catalog, an Organization/Actor catalog, and Data Lifecycle diagrams. You would describe the Target Application Architecture with Application Communication diagrams, an Application Interaction matrix, and an Application Portfolio catalog.**

Antwort: D

234. Frage

According to the TOGAF standard, which of the following define general rules and guidelines for the use of resources across the enterprise?

- A. Business scenarios
- B. Procurement policies
- C. Stakeholder concerns
- **D. Architecture principles**
- E. Functional Requirements

Antwort: D

235. Frage

Which one of the following best describes the purpose of a Change Request?

- A. To ensure that the results of a Compliance Assessment are distributed to the Architecture Board
- B. To ensure that information is communicated to the right stakeholder at the right time
- C. To review project progress and ensure the implementation is inline with the objectives
- **D. To request a dispensation or to kick-start a further cycle of architecture work**
- E. To act as a deliverable container for artifacts created during a project

Antwort: D

236. Frage

Scenario:

Please read this scenario prior to answering the question

Your role is that of a consultant to the Lead Enterprise Architect in a company that specializes in luxury electric cars and their powertrain components, and also produces battery-charging equipment. It has its own distribution network, its own showrooms, and sells directly to customers via the internet. The company has four manufacturing facilities, two in the North America, one in Europe, and one in Asia.

A challenge that the company is facing to scale up the number of vehicles coming off the production line to meet customer demand, while maintaining quality. At the moment there are supply chain storages for key electronic components related to the autonomous drive system. In response to this, the research arm of the company has pioneered the development of a new self-driving platform. This new design uses common off-the-shelf components that will allow for a significant increase in overall vehicle production. This new design is ready to go into production.

The company has a mature Enterprise Architecture practice that is supported by a cross-functional Architecture Board. The TOGAF standard is used for developing the automated manufacturing process and systems used to design, manufacture and test the new design. The Chief Information Officer and the Chief Operating Officer co-sponsor the Enterprise Architecture program. As part of putting the new self-driving platform into production, adjustments to the automated assembly processes need to be made. A pilot architecture project at a single location has defined an updated approach for controlling the automated test systems used to perform final quality assurance. The Chief Engineer, sponsor of the activity, and the Architecture Board have approved the plan for immediate implementation at each plant.

Architecture Contracts have been developed that detail the work needed to implement and deploy the new automated test system controller for each location. The Chief Engineer has expressed concern that a uniform process be employed at each location to ensure consistency and quality.

Refer to the Scenario

The Lead Enterprise Architect has asked you to recommend the best approach to address the Chief Engineer's concern. Based on the TOGAF standard, which of the following is the best answer?

- **A. You create an Architecture Contract to manage and govern the implementation and migration process. If the contract is issued to an external party, you ensure that it is a fully enforceable legal contract. For internal development projects, you decide it is adequate to utilize a memorandum of understanding between the Architecture Board and the implementation organization.**
You recommend that if a deviation from the Architecture Contract is detected, the Architecture Board grant a dispensation to

B. You review the applicable Architecture Contract for each location, ensuring that it addresses the project objectives, effectiveness metrics, acceptance criteria, and risk management. In cases where the contract is issued to an external party, you ensure that it is a legally enforceable contract.

- C. You use the Architecture Contracts to manage the architecture governance processes for the project across the locations. You deploy monitoring tools to assess the performance of each completed drive assembly at each location and develop change requirements if necessary.

- D. You create an Architecture Contract to manage and govern the implementation and migration process at each location. For internal development projects, you issue a memorandum of understanding between the Architecture Board and the implementation organization. For contracts issued to an external party, you ensure that it is a fully enforceable legal contract. You ensure that the Architecture Board reviews all deviations from the Architecture Contract, and considers whether or not to grant a dispensation to allow the implementation organization to customize the process to meet their local needs.
