只有最有效的B2C-Commerce-Architect指南才能提供100%通過的承諾&關於Salesforce Certified B2C Commerce Architect

VCESoft的IT專家團隊利用他們的經驗和知識不斷的提升考試培訓材料的品質，來滿足每位考生的需求，保證考生第一次參加Salesforce B2C-Commerce-Architect認證考試順利的通過，你們通過購買VCESoft的產品總是能夠更快得到更新更準確的考試相關資訊，VCESoft的產品的覆蓋面很大很廣，可以為很多參加IT認證考試的考生提供方便，而且準確率100%，能讓你安心的去參加考試，並通過獲得認證。

最新的 Salesforce Architect B2C-Commerce-Architect 免費考試真題 (Q40-Q45):

問題 #40

A new project for a Client will involve a few different Integrations to their middleware system resulting in four different web services. All will use the same credentials to the middleware. Each will have the same timeout, but will require a separate log file prefix. How should the Architect set this up with the Service framework using a minimal set of configuration?

- A. One Service Configuration, Four Service Profiles, One Service Credential.
- **B. Four Service Configurations, One Service Profile, One Service Credential.**
- C. Four Service Configurations, Four Service Profiles, Four Service Credentials
- D. Four Service Configurations, Four Service Profiles, One Service Credential

答案: B

解題說明:

For setting up multiple integrations that require the same credentials and timeout settings but need separate log file prefixes: Four Service Configurations are needed to specify the unique endpoint and other specifics for each of the four web services.

One Service Profile can be used for all these configurations because they share the same timeout and other settings, optimizing the configuration process.

One Service Credential is sufficient since all services authenticate with the same credentials, simplifying credential management and security handling.

This setup reduces redundancy and complexity in the service framework, ensuring a streamlined and efficient integration process while meeting all specified requirements.

問題 #41

A merchant uploads an image using the Content Image Upload module of Business Manager.

Which three modules can the merchant or developer use to display the image on the Storefront? Choose 3 answers

- A. ISML templates
- **B. Storefront catalogs**
- C. Payment types
- **D. Content slots**
- **E. Content assets**

答案: B,D,E

問題 #42

Our client notifies you that the iOS application made a few months ago for some reason now is experiencing a degradation service and some requests take too long to respond. What tool will use it in order to check if there is any issue with OCAPI calls?

- A. Pipeline Profiler filtering results with Extended script development mode.
- B. Log center filtering by request type OCAPI
- **C. Reports & Dashboard under Technical tab.**
- D. Code Profiler

答案: C

問題 #43

The Client wants to have a flash sale on a few products every day. These products are sold through B2C Commerce as well as in an in-store Point of Sale system that is tied to the same inventory.

An Architect analyzes the following proposed solution:

Inventory feed will continue to run daily but add a web-service call to compare and update B2C Commerce inventory in real time during checkout after a flash product's inventory reaches a threshold.

Which two risks should the Architect communicate to the Client about this solution?

Choose 2 answers

- **A. If the product inventory threshold that triggers the web service calls is reached too often. It will have a negative impact on site performance.**
- **B. If the external hosted web-service is unreliable. It could be a point of failure in the site's order placement flow.**
- C. The default rate limiter configuration for the web-service could cause the web-service to return an exception during high traffic.
- D. Because the job would still be configured to run daily there will be a degrade in performance during non-flash sales periods

答案: A,B

問題 #44

During the testing of the login form, QA finds out that the first time the user can log in, but every other login attempt from another computer leads to the homepage and the basket being emptied. Developers tried to debug the issue, but when they add a breakpoint to the login action, it is not hit by the debugger.

What should the Architect recommend developers to check?

- A. Add remote include for the login page
- B. Add disable cache page in the template ISML - `<is:cache status="off"/>`.

- C. Remove CSRF protection from Login Form Action.
- D. Check Login Form and any included templates for includes that enable page caching.

答案：D

解題說明：

When QA encounters issues with login persistence across multiple computers, where subsequent logins lead to a redirection and an emptied basket, the likely culprit could be unintended caching of login-related pages or processes. In Salesforce B2C Commerce, certain cache settings might inadvertently cause user sessions to be shared or not properly invalidated. The recommendation D, to check the login form and related templates for caching directives that might be erroneously caching login actions or user-specific data, addresses this potential issue. Developers should ensure that pages handling user sessions and authentication are configured to disable caching, thus preventing session data from being mistakenly retained or shared across different users.

問題 #45

.....

拿高薪，是每個人的夢想，但究竟能拿多少錢，得由你的職場身價決定。機會很多時候就在你面前。不管你是否喜歡這樣的機會，只有把握住，迎難而上才能獲得非凡的成就。通過 Salesforce 認證考試取得一張“金牌派司”無疑是證明和提升自己身價的一個有效方式。VCEsoft B2C-Commerce-Architect 題庫覆蓋了真實的 Salesforce B2C-Commerce-Architect 考試指南，適合全球考生適用。
