## Salesforce Public Sector Solutions Accredited Professional Sample Questions (Q87-Q92):

### NEW QUESTION # 87

A government agency recently migrated to Salesforce and is very excited to be on board, but their System Administrators have doubts about installing the Omnistudio package.

Which three tasks must be completed or checked before installing the Omnistudio Package?

- A. Enable Assets
- B. Enable Orders
- C. Enable Person Accounts
- D. Ensure the email deliverability access level is set to "All email"
- E. Confirm browser settings meet published minimum requirements

**Answer: A,C,D**

Explanation:

Enabling Assets, enabling Person Accounts, and ensuring the email deliverability access level is set to "All email" are three tasks that must be completed or checked before installing the Omnistudio Package. Assets are records that represent products or services sold to customers. Assets must be enabled to use some features of Omnistudio, such as FlexCards or DataRaptors. Person Accounts are records that store information about individual people who are not associated with a business account. Person Accounts must be enabled to use some features of Omnistudio, such as OmniScripts or DataPacks. Email deliverability access level determines what types of email can be sent from Salesforce. The email deliverability access level must be set to "All email" to install Omnistudio Package successfully. Reference: [https://help.salesforce.com/s/articleView?id=psc\\_admin\\_setup\\_omnistudio.htm&type=5&language=en\\_US](https://help.salesforce.com/s/articleView?id=psc_admin_setup_omnistudio.htm&type=5&language=en_US)

#### NEW QUESTION # 88

A Public Sector Organization (PSO) is implementing Public Sector Solutions. It has a requirement that they would like to keep a list of assessment indicators that their teams will use during inspections and have those indicators mapped to regulatory codes that team members can reference.

Leveraging the Public Sector Solutions data model, how can the Technical Consultant meet the requirement for the PSO?

- A. Create a master-detail relationship between Regulatory Code and Assessment Indicator
- B. Use the Regulatory Code Assessment Indicator junction object
- **C. Use the Assessment Indicator Regulatory Code junction object**
- D. Create a lookup relationship on both objects to a junction object called Regulatory Code Map

**Answer: C**

Explanation:

The Assessment Indicator Regulatory Code junction object is part of the Public Sector Solutions data model and it is used to create a many-to-many relationship between Assessment Indicators and Regulatory Codes. This allows the PSO to keep a list of assessment indicators and map them to multiple regulatory codes that team members can reference. #### NEW QUESTION # 89

A resident in the city of Richdale has concerns about unnecessary debris from construction at a nearby residence and has filed a complaint with the city. The city uses Public Sector Solutions for LPI (Licensing, Permitting & Inspections) to manage residential construction permits.

What three recommendations should a Technical Consultant provide to the city to handle complaints from residents and tie them back to existing residential construction permits?

- **A. Link Inspections and Visits to Permit Applications**
- **B. Configure Action Plans on Cases and Permits**
- C. Set up Business Rules Engine (BRE) to determine Complaint validity.
- D. Link Cases to Permits
- **E. Configure Inspections and Visits**

**Answer: A,B,E**

Explanation:

Linking inspections and visits to permit applications allows the city to track the progress and status of the inspections related to the complaints. Configuring inspections and visits enables the city to define the inspection types, schedules, checklists, and outcomes. Configuring action plans on cases and permits allows the city to automate the inspection tasks and workflows, assign them to inspectors, and collaborate on them using Chatter. Reference: <https://trailhead.salesforce.com/content/learn/modules/public-sector-solutions-design/configure-inspections-and-visits>

#### NEW QUESTION # 90

A Technical Consultant at the Department of Disaster Assistance is designing a solution for the eSignature related use cases. As part of the research, the architect discovered that Public Sector Solutions provide DocuSign integration without custom coding Which of

the three functionalities is readily available with this functionality?

- A. Approval process to invalidate a contract document that is pending signatures if a new contract document supersedes it.
- **B. Automatically invalidate a contract document that is pending signatures if a new contract document supersedes it.**
- C. Ability/Request to update the contents of the documents before signing by the reviewer
- **D. Send a contract document for review and signatures.**
- **E. Track the signed contract document and update the contract record status.**

**Answer: B,D,E**

Explanation:

Sending a contract document for review and signatures, tracking the signed contract document and updating the contract record status, and automatically invalidating a contract document that is pending signatures if a new contract document supersedes it are three functionalities that are readily available with DocuSign integration. DocuSign is an eSignature solution that can be integrated with Public Sector Solutions without custom coding. It can help public sector agencies to send, sign, and manage contracts and agreements electronically. DocuSign integration can provide features such as sending a contract document for review and signatures to multiple recipients, tracking the signed contract document and updating the contract record status in Salesforce, and automatically invalidating a contract document that is pending signatures if a new contract document supersedes it using DocuSign PowerForms. Reference:[https://help.salesforce.com/s/articleView?id=psc\\_admin\\_setup\\_docusign.htm&type=5&language=en\\_](https://help.salesforce.com/s/articleView?id=psc_admin_setup_docusign.htm&type=5&language=en_)

### NEW QUESTION # 91

A government agency wants to digitize hundreds of PDF forms for its employees.

Which Employee Experience for Public Sector feature(s) are most important to address this opportunity?

- **A. Salesforce OmniStudio, Flows, Employee and Public Sector Data Models, and Employee Community**
- B. Salesforce Flows, Customer Community, and Individual Account
- C. Salesforce Flows, Employee and Public Sector Data Models, and Employee Community
- D. Salesforce Flows, APEX, Custom Objects, and VisualForce

**Answer: A**

Explanation:

Salesforce OmniStudio, Flows, Employee and Public Sector Data Models, and Employee Community are the most important features of Employee Experience for Public Sector to address the opportunity of digitizing hundreds of PDF forms for employees. Employee Experience for Public Sector is a prebuilt app that comes with Public Sector Solutions. It can help public sector agencies to manage employee programs and benefits, such as leave requests or wellness surveys. Salesforce OmniStudio is a component of Public Sector Solutions that can help public sector agencies to create guided digital forms using OmniScripts. Flows are tools that can help public sector agencies to automate business processes using flows. Employee and Public Sector Data Models are components of Public Sector Solutions that can help public sector agencies to store and organize data using standard and custom objects. Employee Community is a component of Public Sector Solutions that can help public sector agencies to create a digital experience site for employees to access resources and services.
