

New MB-500 Test Questions & MB-500 Test Collection

What's more, part of that PremiumVCEDump MB-500 dumps now are free: <https://drive.google.com/open?id=1UJS5xfYYJQ9zgvEdCT8ZuOa-kOodBbd8>

Our MB-500 free demo provides you with the free renewal in one year so that you can keep track of the latest points happening. As the questions of exams of our MB-500 exam dumps are more or less involved with heated issues and customers who prepare for the exams must haven't enough time to keep trace of exams all day long, our MB-500 Practice Engine can serve as a conducive tool for you make up for those hot points you have ignored. You will be completed ready for your MB-500 exam.

Target Audience and Prerequisites

One of the first things that you need to know about the Microsoft MB-500 Exam is that it is designed for those developers who work with Operations & Finance apps within Microsoft Dynamics 365. There are quite a few skills that the candidates need to develop before attempting this test and some of them are as follows: implementing permission policies & security requirements; creating technical designs as well as implementation details; analyzing and manipulating data; monitoring performance; performing testing; customizing user interfaces; developing business logic with the help of X++.

To be eligible for this certification exam, the students also need to have knowledge and experience with data structures & frameworks. In addition, they should be conversant with technologies, such as SQL Server Management Studio, LCS tools, Azure DevOps, and Visual Studio.

NEW QUESTION # 133

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You must create a new attribute class in which to mark other classes in the ISV solution and their respective methods with the error levels Warning and Error. You have the following class: the numbers are included for reference only.)

```

01
02 public class Vehicle
03 {
04
05     public int bike()
06     {
07     }
08
09     public int automobile()
10     {
11     }
12
13     public int bicycle()
14     {
15     }
16 }

```

You need to ensure that the compiler will report an error if code calls the bike method.

Solution:

Create the following attribute class:

```
public class ISVObsoleteAttribute extends SysAttribute
{
    ErrorWarning errorWarningEnum;
    str explanation;
    public void new(ErrorWarning _errorWarningEnum, str _explanation)
    {
        super();
        errorWarningEnum = _errorWarningEnum;
        explanation = _explanation;
    }
}
```

Insert the following code at line 04:

```
[SysObsoleteAttribute("Deprecated. Please use the bicycle class instead.", false)]
```

Does The solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 134

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are adding a new field to the SalesTable form.

You must use an extension to add a status field onto the form.

Answer Area		
Environment types	Tool	Environment type
User Acceptance Testing (UAT) only	Activity Monitoring	
Build only	SQL Insights	
User Acceptance Testing (UAT) and Build	System Diagnostics	

You need to create the extension in the Application Object Tree (AOT) and add the extension to the demoExtensions model.

Solution: Add a new form object to the project and name the form SalesTable.Extension.

Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Instead navigate to the user interface forms section for the SalesTable form and create an extension.

Note: In Dynamics 365 Finance and Operations, the new fields will need to be added via a table extension.

Create the extensions on the SalesTable.

NEW QUESTION # 135

A company uses Dynamics 365 Finance. The company creates an asset library.

You need to upload assets for a solution to the asset library.

Which asset types should you use? To answer, drag the appropriate asset types to the correct activities. Each asset type may be

used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Asset type	Answer Area	Activity	Asset type
GER configuration		Upload a logo of various sizes to be used in other environments.	
Localized financial report		Upload an electronic report to be used for a free text invoice in Dynamics 365 Finance.	
Marketing asset		Upload a region-specific solution developed for a ledger account in the form of an ISV.	
Retail SDK			

Answer:

Explanation:

Asset type	Answer Area	Activity	Asset type
GER configuration		Upload a logo of various sizes to be used in other environments.	Marketing asset
Localized financial report		Upload an electronic report to be used for a free text invoice in Dynamics 365 Finance.	GER configuration
Marketing asset		Upload a region-specific solution developed for a ledger account in the form of an ISV.	Localized financial report
Retail SDK			

Explanation:

Asset type	Answer Area	Activity	Asset type

NEW QUESTION # 136

A company has a Dynamics 365 Finance and Operations environment.

You need to implement indices for new tables.

Which types of indexes should you use? To answer, drag the appropriate types of indexes to the correct requirements. Each type of index may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Index types	Requirement	Index type
Primary	Provide a unique key for each record in a table.	
Clustered	Organize the data for a table according to the physical order of the specified column.	
Non-Clustered	Quickly reference data that is found by using a specified set of columns.	

Answer:

Explanation:

Answer Area		
Index types	Requirement	Index type
Primary	Provide a unique key for each record in a table.	Primary
Clustered	Organize the data for a table according to the physical order of the specified column.	Clustered
Non-Clustered	Quickly reference data that is found by using a specified set of columns.	Non-Clustered

Explanation:

Requirement	Index type
Provide a unique key for each record in a table.	Primary
Organize the data for a table according to the physical order of the specified column.	Clustered
Quickly reference data that is found by using a specified set of columns.	Non-Clustered

Box 1: Primary

Box 2: Clustered

A clustered index is a special type of index that reorders the way records in the table are physically stored.

Box 3: Non-clustered
