

Network Appliance NS0-185 Valid Test Practice, Reliable NS0-185 Test Answers

2026 Latest Bootcamp PDF NS0-185 PDF Dumps and NS0-185 Exam Engine Free Share: https://drive.google.com/open?id=1VzFDpxFXYFb1f6RFcap1cr6wtAtBno_Z

The NS0-185 guide dump from our company is compiled by a lot of excellent experts and professors in the field. In order to help all customers pass the exam in a short time, these excellent experts and professors tried their best to design the study version, which is very convenient for a lot of people who are preparing for the NS0-185 exam. You can find all the study materials about the exam by the study version from our company. More importantly, we can assure you that if you use our NS0-185 Certification guide, you will never miss any important and newest information. We will send you an email about the important study information every day in order to help you study well. We believe that our NS0-185 exam files will be most convenient for all people who want to take an exam.

As the saying goes, to develop study interest requires to giving learner a good key for study, this is promoting learner active development of internal factors. The most function of our NS0-185 question torrent is to help our customers develop a good study habits, cultivate interest in learning and make them pass their exam easily and get their NS0-185 Certification. All workers of our company are working together, in order to produce a high-quality product for candidates.

Reliable NS0-185 Test Answers - NS0-185 Valid Test Testking

Everyone is looking for ways to improve their ability. How can you stand out? Perhaps you can beat them in time. Our NS0-185 exam materials don't require you to spend a lot of time learning, you can go to the NS0-185 exam after you use them for twenty to thirty hours. This means that you can pass several exams when someone else passes an exam! Is it amazing? Yes, and only with our NS0-185 Practice Engine, you can achieve all of these for we are the leader in this career for over ten years.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q46-Q51):

NEW QUESTION # 46

When creating a new 3.8 TB SSD-based aggregate, what is the default RAID type used with ONTAP 9.8?

- A. RAID 4
- B. RAID-TEC
- C. RAID DP
- D. RAID 0

Answer: C

Explanation:

ONTAP automatically selects RAID-DP as the default RAID type for SSD-based aggregates, including 3.8 TB SSDs, in ONTAP 9.8.

RAID-DP provides double-parity protection, allowing the aggregate to withstand two simultaneous disk failures without data loss. RAID-TEC is reserved for very large aggregates and is not the default. RAID 4 and RAID 0 do not provide adequate protection for production systems.

Therefore, the correct answer is D (RAID DP).

NEW QUESTION # 47

What is the next step if you must escalate an open case?

- A. Open a new case.
- B. Trigger AutoSupport again.
- C. Upload support data to Engineering.
- **D. Call NetApp Support and ask to speak to the duty manager.**

Answer: D

NEW QUESTION # 48

You are expanding an existing cluster that uses BES-53248 cluster interconnect switches. You connected the new controllers to ports 0/17 through 0/20. However, you are unable to join the new nodes to the cluster.

Which action must be taken to solve the problem?

- A. Install the CSHM configuration file.
- B. Reboot the controllers.
- **C. Install the reference configuration file.**
- D. Install the license file.

Answer: C

Explanation:

Broadcom BES-53248 cluster interconnect switches require a Reference Configuration File (RCF) to define supported port roles, speeds, breakout behavior, ISLs, and node-facing ports. By default, only a subset of ports is enabled for cluster connectivity.

Ports 0/17 through 0/20 are not active for node connections unless explicitly configured by the correct RCF.

When new controllers are cabled to ports that are not enabled or correctly configured for cluster interconnect traffic, the ONTAP nodes cannot establish cluster LIF communication and therefore cannot join the cluster.

Installing the correct RCF configures these ports with the required VLANs, MTU, flow control, and speed settings so that cluster traffic can pass.

A license file is not required for basic cluster interconnect functionality. The Cluster Switch Health Monitor (CSHM) configuration file enables monitoring, not port functionality. Rebooting controllers does not resolve switch-side configuration issues.

Therefore, installing the reference configuration file is the required corrective action.

NEW QUESTION # 49

After installing an AFF A700 with ADPv2, one shelf was powered off and disks were not assigned.

Which two resources will help you find a solution? (Choose two.)

- **A. Active IQ Config Advisor**
- B. Active IQ Digital Advisor
- **C. NetApp Knowledge Base**
- D. NetApp Documentation Center

Answer: A,C

NEW QUESTION # 50

What are two ONTAP storage efficiency technologies that would be used on an AFF A400 cluster? (Choose two.)

- A. thin provisioning
- B. FlexClone volumes
- C. FlashCache
- D. Flash Pool

Answer: A,B

Explanation:

AFF systems are all-flash platforms that rely heavily on software-based efficiency technologies built into ONTAP. Two such technologies are FlexClone volumes and thin provisioning.

FlexClone enables instant, space-efficient copies of volumes or files without duplicating data blocks. This is especially useful for testing, development, backups, and rapid provisioning scenarios. On AFF systems, FlexClone operations are nearly instantaneous and incur minimal overhead.

Thin provisioning allows logical storage to be allocated without immediately consuming physical capacity.

This ensures maximum utilization of flash storage and prevents over-provisioning, which is critical in all-flash environments.

Flash Pool and FlashCache are hybrid-storage technologies and are not applicable to AFF A400 systems, which do not use HDDs or PCIe read-cache modules.

Therefore, the correct answers are B and D.

NEW QUESTION # 51

.....

BootcampPDF provides the most reliable and authentic NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) prep material there is. The 3 kinds of Network Appliance NS0-185 preparation formats ensure that there are no lacking points in a student when he attempts the actual NS0-185 exam. The NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) exam registration fee varies between 100\$ and 1000\$, and a candidate cannot risk wasting his time and money, thus we ensure your success if you study from the updated Network Appliance NS0-185 practice material. We offer the demo version of the actual Network Appliance NS0-185 questions so that you may confirm the validity of the product before actually buying it, preventing any sort of regret.

Reliable NS0-185 Test Answers: https://www.bootcamppdf.com/NS0-185_exam-dumps.html

The NS0-185 practice test content is very easy and simple to understand, Users of our NS0-185 actual exam can give you good answers, Network Appliance NS0-185 Valid Test Practice We don't want you to prepare and practice the old questions and waste time, Network Appliance NS0-185 Valid Test Practice You will have more spare time to do other things, NS0-185 prep torrent provides students with a new set of learning modes which free them from the rigid learning methods.

Thinking requires exercising judgment and making choices that NS0-185 suit the times and the programming language idioms and frameworks that you use, Referring to Old and New Column Values.

The NS0-185 Practice Test content is very easy and simple to understand, Users of our NS0-185 actual exam can give you good answers, We don't want you to prepare and practice the old questions and waste time.

How to Get Network Appliance NS0-185 Certification within the Target Period?

You will have more spare time to do other things, NS0-185 prep torrent provides students with a new set of learning modes which free them from the rigid learning methods.
