

ExamDiscuss SSE-Engineer PDF Questions and Practice Test Software

ACTUAL PALO ALTO SSE-ENGINEER CERTIFICATION PRACTICE TEST

SSE-Engineer Sample Questions

NWEXAM.COM

Get complete detail on Palo Alto SSE-Engineer exam guide to crack Palo Alto Networks Security Service Edge Engineer. You can collect all information on SSE-Engineer tutorial, practice test, books, study material, exam questions, and syllabus. Firm your knowledge on Network Security and get ready to crack SSE-Engineer certification. Explore all information on SSE-Engineer exam with number of questions, passing percentage and time duration to complete test. This Palo Alto Security Service Edge Engineer (SSE-Engineer) PDF gives you the opportunity to identify any knowledge gaps so you can refine your study strategy and ensure a good score in SSE-Engineer exam.

P.S. Free & New SSE-Engineer dumps are available on Google Drive shared by ExamDiscuss: <https://drive.google.com/open?id=1vyqyr1CXyzNNfUmjRr4qKUb40nwTiNUv>

These features have made ExamDiscuss SSE-Engineer pdf questions format the most reputable prep material for the quick and restrictions-free exam preparation. As laptops, tablets, and smartphones support this Palo Alto Networks SSE-Engineer pdf format, you can easily learn from your comfort zone in your free time.

The certification is necessary to get a job in your desired Palo Alto Networks company. Success in the test gives you an edge over the others because you will have certified skills that will make a good impression on the interviewer. Most people preparing for the SSE-Engineer Exam are confused about preparation. How will they get real and updated Palo Alto Networks Security Service Edge Engineer (SSE-Engineer) exam questions?

>> Valid SSE-Engineer Test Answers <<

SSE-Engineer Free Brain Dumps - SSE-Engineer Reliable Dumps Sheet

Comparing to other training classes, our SSE-Engineer dumps pdf can not only save you lots of time and money, but also guarantee you pass exam 100% in your first attempt. Our test engine enjoys great popularity among the dumps vendors because it allows you practice our SSE-Engineer Real Questions like the formal test anytime. We will offer you one-year free update SSE-Engineer braindumps after one-year.

Palo Alto Networks SSE-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Prisma Access Services: This section of the exam measures the skills of Cloud Security Architects and covers advanced features within Prisma Access. Candidates are assessed on how to configure and implement enhancements like App Acceleration, traffic replication, IoT security, and privileged remote access. It also includes implementing SaaS security and setting up effective policies related to security, decryption, and QoS. The section further evaluates how to create and manage user-based policies using tools like the Cloud Identity Engine and User ID for proper identity mapping and authentication.
Topic 2	<ul style="list-style-type: none"> Prisma Access Troubleshooting: This section of the exam measures the skills of Technical Support Engineers and covers the monitoring and troubleshooting of Prisma Access environments. It includes the use of Prisma Access Activity Insights, real-time alerting, and a Command Center for visibility. Candidates are expected to troubleshoot connectivity issues for mobile users, remote networks, service connections, and ZTNA connectors. It also focuses on resolving traffic enforcement problems including security policies, HIP enforcement, User-ID mismatches, and split tunneling performance issues.
Topic 3	<ul style="list-style-type: none"> Prisma Access Planning and Deployment: This section of the exam measures the skills of Network Security Engineers and covers foundational knowledge and deployment skills related to Prisma Access architecture. Candidates must understand key components such as security processing nodes, IP addressing, DNS, and compute locations. It evaluates routing mechanisms including routing preferences, backbone routing, and traffic steering. The section also focuses on deploying Prisma Access service infrastructure for mobile users using VPN clients or explicit proxy and configuring remote networks. Additional topics include enabling private application access using service connections, Colo-Connect, and ZTNA connectors, implementing identity authentication methods like SAML, Kerberos, and LDAP, and deploying Prisma Access Browser for secure user access.
Topic 4	<ul style="list-style-type: none"> Prisma Access Administration and Operation: This section of the exam measures the skills of IT Operations Managers and focuses on managing Prisma Access using Panorama and Strata Cloud Manager. It tests knowledge of multitenancy, access control, configuration, and version management, and log reporting. Candidates should be familiar with releasing upgrades and leveraging SCM tools like Copilot. The section also evaluates the deployment of the Strata Logging Service and its integration with Panorama and SCM, log forwarding configurations, and best practice assessments to maintain security posture and compliance.

Palo Alto Networks Security Service Edge Engineer Sample Questions (Q36-Q41):

NEW QUESTION # 36

When a review of devices discovered by IoT Security reveals network routers appearing multiple times with different IP addresses, which configuration will address the issue by showing only unique devices?

- A. Add the duplicate entries to the ignore list in IoT Security.
- B. Create a custom role to merge devices with the same hostname and operating system.
- C. Merge individual devices into a single device with multiple interfaces.
- D. Delete all duplicate devices, keeping only those discovered using their management IP addresses.

Answer: C

Explanation:

When network routers appear multiple times with different IP addresses in IoT Security, it is likely because they have multiple interfaces with separate IPs. Merging these entries into a single device with multiple interfaces ensures that the system correctly identifies each router as a unique entity while maintaining visibility across all its interfaces. This approach prevents unnecessary duplicates, improves asset management, and enhances security monitoring.

NEW QUESTION # 37

A customer using Prisma Access (Managed by Panorama) wants to monitor traffic patterns across all remote networks and use Strata Logging Service to gather insights on network usage. An engineer notices that some network data is missing from the Application Command Center (ACC).

What should the engineer do to ensure complete data visibility?

- A. Reconfigure the Prisma Access remote networks to log directly to Panorama instead of using Strata Logging Service.
- B. Verify that the Panorama web interface has been configured to aggregate logs from both the Panorama data and RN-SPNs.
- **C. Ensure that log forwarding profiles are applied to all Prisma Access policies and directed to Strata Logging Service.**
- D. Enable the Use Data for Pre-Defined Reports' setting in the Logging and Reporting configuration on Panorama.

Answer: C

Explanation:

For complete data visibility in Prisma Access (Managed by Panorama), log forwarding profiles must be applied to all security policies to ensure that traffic logs are correctly sent to Strata Logging Service. If log forwarding is missing or misconfigured, some traffic data may not appear in the Application Command Center (ACC), leading to incomplete insights. Verifying and correctly assigning log forwarding ensures that all relevant network activity is captured and available for analysis.

NEW QUESTION # 38

A large retailer has deployed all of its stores with the same IP address subnet. An engineer is onboarding these stores as Remote Networks in Prisma Access. While onboarding each store, the engineer selects the "Overlapping Subnets" checkbox.

Which Remote Network flow is supported after onboarding in this scenario?

- A. To mobile users
- B. To the internet
- **C. To private applications**
- D. To remote network

Answer: C

Explanation:

When the "Overlapping Subnets" checkbox is selected during the Remote Network onboarding process in Prisma Access, the deployment enables Private Application access using Prisma Access for Users (ZTNA or Private Access). This feature is designed to handle scenarios where multiple sites use the same IP subnet by leveraging NAT (Network Address Translation) and segmentation to avoid conflicts.

Since overlapping subnets can create routing challenges for direct remote network-to-remote network communication, Prisma Access does not support Remote Network-to-Remote Network or Mobile User communication in this case. Private application access is supported as Prisma Access correctly routes requests based on application-layer intelligence rather than IP-based routing.

NEW QUESTION # 39

Which two configurations must be enabled to allow App Acceleration for SaaS applications? (Choose two.)

- **A. Trusted Root CA for the CA certificate**
- **B. Forward Trust Certificate for the CA certificate**
- C. Acceleration agent for the client machines
- D. QoS for user traffic

Answer: A,B

Explanation:

To enable App Acceleration for SaaS applications in Prisma Access, the following configurations must be enabled:

Trusted Root CA for the CA certificate ensures that Prisma Access can validate and trust the SaaS application's certificates, allowing seamless inspection and acceleration of traffic without security warnings.

Forward Trust Certificate for the CA certificate enables SSL decryption for SaaS applications, allowing Prisma Access to optimize traffic and apply acceleration techniques while maintaining security policies.

NEW QUESTION # 40

A customer is implementing Prisma Access (Managed by Strata Cloud Manager) to connect mobile users, branch locations, and business-to-business (B2B) partners to their data centers.

The solution must meet these requirements:

The mobile users must have internet filtering, data center connectivity, and remote site connectivity to the branch locations.

The branch locations must have internet filtering and data center connectivity.

The B2B partner connections must only have access to specific data center internally developed applications running on non-standard ports.

The security team must have access to manage the mobile user and access to branch locations.

The network team must have access to manage only the partner access.

How can the engineer configure mobile users and branch locations to meet the requirements?

- A. Use Explicit Proxy and Remote Networks to filter internet traffic and provide access to data center resources using service connections.
- B. Use Explicit Proxy to filter internet traffic and provide access to data center resources using service connections.
- C. Use GlobalProtect to filter internet traffic and provide access to data center resources using service connections.
- **D. Use GlobalProtect and Remote Networks to filter internet traffic and provide access to data center resources using service connections.**

Answer: D

Explanation:

To meet the customer's requirements, GlobalProtect and Remote Networks should be used as follows:

* GlobalProtect: This enables secure access for mobile users, ensuring internet filtering, data center connectivity, and access to branch locations.

* Remote Networks: This is used to provide security and connectivity for branch locations, ensuring internet filtering and data center access.

* Service Connections: These allow both mobile users and branch locations to securely connect to the data center for internal resources.

This configuration ensures that mobile users and branch locations can securely access the internet while maintaining a segregated and secure connection to internal resources. It also aligns with Prisma Access's best practices for security enforcement, traffic filtering, and centralized management.

NEW QUESTION # 41

.....

It is a universally accepted fact that the SSE-Engineer exam is a tough nut to crack for the majority of candidates, but there are still a lot of people in this field who long to gain the related certification so that a lot of people want to try their best to meet the challenge of the SSE-Engineer Exam. A growing number of people know that if they have the chance to pass the exam, they will change their present situation and get a more decent job in the near future.
