Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

A major innovation in the SAP S/4HANA environment is the shift from "detective" compliance to "preventative" compliance. By integrating compliance into real-time operational execution, SAP fundamentally changes the role of the auditor and the compliance officer. Traditionally, compliance was a retrospective process where transactions were reviewed in batches after they had occurred. This often led to the discovery of errors or policy violations weeks or months later, necessitating costly and time-consuming manual remediation.

The key benefit of SAP's real-time approach is that it eliminates the need for manual compliance checks.

By embedding automated "guardrails" directly into the business processes—such as automated Sanctioned Party Screening in Sales or Segregation of Duties checks in Procurement—the system prevents non-compliant transactions from being finalized in the first place. This "clean at the core" approach ensures that the data in the Universal Journal is inherently compliant. This not only reduces the risk of fines and reputational damage but also significantly lowers the operational cost of the finance function by removing the labor-intensive

"check-the-checker" tasks that traditionally plagued the period-end close.
