Hot C-ACDET-2506 PDF Questions | High Pass-Rate C-ACDET-2506: SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite 100% Pass

Market is a dynamic place because a number of variables keep changing, so is the practice materials field of the C-ACDET-2506 practice exam. Our C-ACDET-2506 exam dumps are indispensable tool to pass it with high quality and low price. By focusing on how to help you effectively, we encourage exam candidates to buy our C-ACDET-2506 practice test with high passing rate up to 98 to 100 percent all these years. Our SAP exam dumps almost cover everything you need to know about the exam. As long as you practice our C-ACDET-2506 Test Question, you can pass exam quickly and successfully. By using them, you can not only save your time and money, but also pass C-ACDET-2506 practice exam without any stress.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q34-Q39):

NEW QUESTION # 34

If you add a custom field to the ContractWorkspace class, which other class(es) will that field be added to?

- A. AbstractContractWorkspace
- B. SalesContractRequest and InternalContractRequest
- C. Internal ContractWorkspace and SalesContractWorkspace
- D. ContractRequest

Answer: C

NEW QUESTION # 35

During the configuration of a new custom field, after it's been saved but before the field has been published, you realize that you set the wrong field type. What is the next step you should take to resolve the issue?

- A. Change the field type by selecting the intended type in the dropdown and Save
- B. **Delete the field and create a new field with the same name and the intended field type**
- C. Mark the field as Hidden, and create a new field with a slightly different name and the intended field type
- D. Clear and recreate the field with the same field name and the intended field type

Answer: B

Explanation:

Once a custom field has been saved, its field type cannot be changed—even if the field has not yet been published. The correct approach is to delete the incorrect field and create a new one with the intended type, optionally using the same name to maintain naming consistency. Clearing or hiding the field does not solve the issue, and the system does not allow type changes via the UI once saved. This approach is standard in SAP Ariba field management to avoid data integrity issues.

NEW QUESTION # 36

Which scenarios are applicable when moving templates from the test site to the production site by ICM? Note: There are 2 correct answers to this question.

- A. **Batch imports are available for templates when migrating configuration bundles.**
- B. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.
- C. **Draft templates on the source site are skipped.**
- D. New templates that successfully migrated to the production site are in Draft state.

Answer: A,C

NEW QUESTION # 37

What are the key characteristics of a Bluefield deployment scenario? (Select 2 correct answers)

- A. Many team members have a naive perception of deploying software solutions
- B. The Test site has been configured using the SAP Bluefield template
- C. **The Production site may have live transactions**
- D. **The customer already has an SAP Ariba Strategic Sourcing suite solution deployed**

Answer: C,D

Explanation:

A Bluefield deployment means the customer already has an SAP Ariba solution deployed (B), and the production system may be live with ongoing transactions (C). This requires careful, incremental migration to avoid disruption. There is no specific "Bluefield template" for test sites (D), and team perceptions (A) are irrelevant.

NEW QUESTION # 38

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? (Select 3 correct answers)

- A. **The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.**
- B. Discard any other packages that appear in My Action Items.
- C. **Make sure you update the string resource files in the production site before migrating the corresponding configurations from test to production site.**
- D. **If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.**
- E. Publish the form template within the test site in order to add the form fields in the package.

Answer: A,C,D

Explanation:

When migrating field configurations in SAP Ariba, it's essential to prepare all dependent components to avoid migration errors.

* **Enumerations (B):** These must be imported into Production before migrating fields that reference them, since the fields depend on the enumerated values to validate configurations.

* **String Resource Files (C):** These contain translations and label customizations. They should be uploaded and updated in Production first to ensure that migrated fields have the proper localized text.

* **Flex Master Data (E):** Since fields referencing FMD templates rely on these data structures, the templates and their associated data must exist in Production before migrating the fields that depend on them. Discarding unrelated packages (A) or publishing form templates (D) is unrelated or unnecessary for field migration workflows; fields and forms are handled separately. SAP best practices emphasize preparing all referenced master data and resource files to ensure smooth and error-free field migration.

NEW QUESTION # 39

.....

It is not hard to find that there are many different kinds of products in the education market now. It may be difficult for users to determine the best way to fit in the complex choices. We can tell you with confidence that the C-ACDET-2506 study materials are superior in all respects to similar products. First, users can have a free trial of C-ACDET-2506 Learning Materials, to help users better understand the C-ACDET-2506 study materials. If the user discovers that the product is not appropriate for him, the user can choose another type of learning material.
