### NEW QUESTION # 20

Showitoff is an organisation specialising in the design and production of wall decorating materials for the domestic market. During an ISO 14001 certification audit of the site, the auditor comes across an open, walled area just outside the maintenance department. It contains various scraps of wood and metal as well as several rusty components. They are lying on an oily floor. When asked about it, the EMS Manager states that he presumes that the materials come from maintenance work.

The auditor interviews the Maintenance Manager in his department. He notes that shelves containing various spares are well labelled and neatly stacked. He asked about the "dump" outside and is told that it contains some excess materials that the Manager likes to keep in case they come in handy at some stage. The auditor points out that the "dump" might be classed under regulations as a landfill site, which requires an operating licence. The Maintenance Manager is not aware of such a licence.

Which three statements represent good audit practice?

- A. The auditor should advise the organisation to get rid of all the "dumps".
- B. The auditor should raise a nonconformity against ISO 14001.
- C. The auditor should check the information given by the Maintenance Manager with the EMS Manager.
- D. The auditor should check whether the organisation has permission to operate a landfill site.
- E. The auditor should consider surveying more areas of the site for other "dumps".
- F. The auditor should ask the Maintenance Manager to clean up the "dump".

**Answer: C**

Explanation:

Audit findings can be conformity, nonconformity, or opportunity for improvement.

A conformity simply confirms that the requirements have been met no further action is required from the auditee.

Nonconformities require corrective actions.

Opportunities for improvement may trigger voluntary action but not mandatory response.

Diverging opinions are handled during the audit but don't require post-audit response unless linked to nonconformity.
