You will get a lot of personal and professional benefits after passing the EC-COUNCIL 312-49v11 test. The EC-COUNCIL 312-49v11 exam is a valuable credential that will assist you to advance your career. The EC-COUNCIL 312-49v11 is a way to increase your knowledge and skills. You can also trust on TopExamCollection and start Computer Hacking Forensic Investigator (CHFI-v11) 312-49v11 test preparation with EC-COUNCIL 312-49v11 practice test material.

Solutions is one of the top platforms that has been helping Computer Hacking Forensic Investigator (CHFI-v11) exam candidates for many years. Over this long time period countless candidates have passed their dream Computer Hacking Forensic Investigator (CHFI-v11) (312-49v11) certification exam. They all got help from Exams. Solutions 312-49v11 Practice Questions and easily passed their exam. The EC-COUNCIL 312-49v11 exam questions are designed by experience and qualified 312-49v11 certification expert.

## Exam 312-49v11 Questions - Exam 312-49v11 Braindumps

Most of the experts in our company have been studying in the professional field for many years and have accumulated much experience in our 312-49v11 practice questions. Our company is considerably cautious in the selection of talent and always hires employees with store of specialized knowledge and skills. All the members of our experts and working staff maintain a high sense of responsibility, which is why there are so many people choose our 312-49v11 Exam Materials and to be our long-term partner.

## EC-COUNCIL Computer Hacking Forensic Investigator (CHFI-v11) Sample Questions (Q23-Q28):

### NEW QUESTION # 23

In the wake of a cyberattack, a large e-commerce platform experiences widespread system downtime, leading to significant financial losses and tarnished customer trust. As they scramble to regain control, it becomes evident that sensitive customer data has been compromised, posing a threat to data security and the platform's reputation. Amidst the aftermath of the cyberattack on the e-commerce platform, which of the following consequences is not the result of a lack of forensic readiness?

- A. Inability to collect legally sound evidence
- B. Data manipulation, deletion, and theft
- C. Limited collaboration with legal and IT
- D. System downtime

Answer: D

**Explanation:**

According to the CHFI v11 objectives under Computer Forensics Fundamentals, Forensic Readiness, and Incident Response Integration, forensic readiness refers to an organization's ability to efficiently collect, preserve, analyze, and present digital evidence while minimizing the cost and impact of investigations. A lack of forensic readiness primarily affects how well an organization can respond to, investigate, and legally defend itself after an incident—not whether the incident causes operational disruption. System downtime (Option B) is a direct operational impact of a cyberattack, such as a DDoS attack, ransomware infection, or system compromise. While poor preparedness may prolong recovery, downtime itself is not caused by the absence of forensic readiness; it is caused by the attack's technical and operational effects. Therefore, system downtime is not a consequence of lacking forensic readiness.

In contrast, the other options are well-documented consequences of poor forensic readiness in CHFI v11.

Lack of preparation often results in inability to collect legally sound evidence (Option D), which affects court admissibility. Limited collaboration with legal and IT teams (Option C) occurs when roles, procedures, and escalation paths are not predefined.

Additionally, without proper controls and monitoring, data manipulation, deletion, and theft (Option A) may go undetected or untraceable.

The CHFI Exam Blueprint v4 emphasizes forensic readiness as a strategic capability focused on evidence integrity, compliance, and investigative efficiency, not on preventing or causing system downtime, making Option B the correct and exam-aligned answer.

**NEW QUESTION # 24**

A large multinational corporation, specializing in financial services, recently experienced a potential data breach that affected their critical business systems. As part of the forensic investigation, the organization must quickly restore its servers, both fully and at a granular level, to determine the extent of the breach and verify the integrity of sensitive financial data. The forensic team needs a comprehensive and reliable tool that can perform full image-level backups of their servers, as well as allow for selective file and folder restores in order to investigate individual systems and recover specific documents and configuration files. The tool should be able to handle both physical and virtual environments efficiently, ensuring minimal downtime and accurate data recovery.

Given the organization's need for rapid and reliable recovery, the forensic team must choose a tool that can restore entire systems in case of failure while also offering the flexibility to restore individual files or folders from the backup image. This capability is critical for isolating the compromised systems and recovering vital business records that may have been affected by the breach. The organization requires a solution that not only restores data but also provides the ability to maintain business continuity during the investigation, ensuring that systems are up and running as quickly as possible while maintaining forensic integrity.

Which of the following forensic tools would be best suited for this task?

- A. Snagit
- B. Ezvid
- C. VMware vSphere Hypervisor
- **D. Macrium Reflect Server**

**Answer: D**

**Explanation:**

This scenario directly aligns with CHFI v11 objectives under Data Acquisition and Duplication and Digital Forensic Imaging and Recovery Tools. In large-scale enterprise investigations—especially within financial institutions—CHFI v11 emphasizes the importance of tools that support full disk imaging, rapid system recovery, and granular restoration to ensure both forensic analysis and business continuity.

Macrium Reflect Server is specifically designed for server environments and supports full image-level backups, differential and incremental imaging, and selective file and folder recovery from forensic images.

This allows investigators to restore entire systems to operational status quickly while simultaneously extracting specific files, logs, or configuration data needed to assess breach impact and verify data integrity.

Importantly, Macrium Reflect supports both physical and virtual systems, making it suitable for complex enterprise infrastructures.

Snagit and Ezvid are multimedia screen-recording tools with no forensic or recovery capability, while VMware vSphere Hypervisor is a virtualization platform rather than a forensic imaging or recovery solution.

CHFI v11 stresses that appropriate tool selection is critical to preserving evidence integrity while minimizing operational downtime.

Therefore, Macrium Reflect Server is the most suitable and CHFI-aligned tool for rapid, reliable, and forensically sound system and data recovery in this scenario.

**NEW QUESTION # 25**

The efforts to obtain information before a trial by demanding documents, depositions, questions and answers written under oath, written requests for admissions of fact, and examination of the scene is a description of what legal term?

- A. Spoliation
- B. Detection
- C. Discovery
- D. Hearsay

**Answer: C**

#### NEW QUESTION # 26

Netstat is a tool for collecting Information regarding network connections. It provides a simple view of TCP and UDP connections, and their state and network traffic statistics.

Which of the following commands shows you the TCP and UDP network connections, listening ports, and the identifiers?

- A. netstat -r
- B. netstat -b
- C. netstat -s
- D. netstat -ano

**Answer: D**

#### NEW QUESTION # 27

When setting up a wireless network with multiple access points, why is it important to set each access point on a different channel?

- A. Avoid over-saturation of wireless signals
- B. So that the access points will work on different requecncies
- C. Avoid cross talk
- D. Multiple access points can be set up on the same channel without any issues

**Answer: C**

#### NEW QUESTION # 28

.....

The aim of TopExamCollection is to support you in passing the EC-COUNCIL 312-49v11 certification exam. TopExamCollection present actual EC-COUNCIL 312-49v11 practice test questions for you. The world's skilled professionals share their best knowledge with TopExamCollection and create this set of actual Computer Hacking Forensic Investigator (CHFI-v11) 312-49v11

**Exam 312-49v11 Questions:** <https://www.topexamcollection.com/312-49v11-vce-collection.html>

This specification helps them to remove Computer Hacking Forensic Investigator (CHFI-v11) (312-49v11) exam fear and attempt the final test confidently, With their lower price, the advantage of TopExamCollection 312-49v11 Computer Hacking Forensic Investigator (CHFI-v11) Practice Questions is enormous and unmatched, The language of our 312-49v11 study materials is easy to be understood and suitable for any learners, The 312-49v11 latest question from our company can help people get their 312-49v11 certification in a short time.

Some sites offer access to many different 312-49v11 online retailers, Make sure that you can connect over your own local network before proceeding. This specification helps them to remove Computer Hacking Forensic Investigator (CHFI-v11) (312-49v11) exam fear and attempt the final test confidently.

### **100% Pass 2026 312-49v11: Reliable New Computer Hacking Forensic Investigator (CHFI-v11) Exam Labs**

With their lower price, the advantage of TopExamCollection 312-49v11 Computer Hacking Forensic Investigator (CHFI-v11) Practice Questions is enormous and unmatched, The language of our 312-49v11 study materials is easy to be understood and suitable for any learners.

The 312-49v11 latest question from our company can help people get their 312-49v11 certification in a short time, The Company reserves the right to change these Terms and Conditions without prior notice.
