### 312-38 Latest Learning Materials | Reliable 312-38 Exam Registration

We provide 24-hour online service for all customers who have purchased 312-38 test guide. You can send us an email to ask questions at anytime, anywhere. For any questions you may have during the use of 312-38 exam questions, our customer service staff will be patient to help you to solve them. At the same time, if you have problems with downloading and installing, 312-38 Torrent prep also has dedicated staff that can provide you with remote online guidance. In order to allow you to use our products with confidence, 312-38 test guide provide you with a 100% pass rate guarantee. Once you unfortunately fail the exam, we will give you a full refund, and our refund process is very simple.

We provide a wide range of learning and preparation methodologies to the customers for the EC-COUNCIL 312-38 complete training. After using the EC-COUNCIL 312-38 exam materials, success would surely be the fate of customer because, self-evaluation, highlight of the mistakes, time management and sample question answers in comprehensive manner, are all the tools which are combined to provide best possible results. 312-38 Exam Materials are also offering 100% money back guarantee to the customers in case they don't achieve passing scores in the 312-38 exam in the first attempt.

PracticeMaterial 312-38 product in above-mentioned three formats carries most probable real exam questions. Every person who attempts the exam has different preparation style. Some want to do in-depth study while some prefer quick EC-Council Certified Network Defender CND test preparation. PracticeMaterial has introduced these three formats so every applicant of the test can prepare as per unique learning styles. In addition, we offer up to 1 year of free questions updates, free demos, discounts, and a 24/7 customer support. Don't miss these incredible offers. Purchase real exam questions today.

As is known to us, people who want to take the 312-38 exam include different ages, different fields and so on. It is very important for company to design the 312-38 exam prep suitable for all people. However, our company has achieved the goal. We can promise that the 312-38 test questions from our company will be suitable all people. There are many functions about our study materials beyond your imagination. You can purchase our 312-38 reference guide according to your own tastes. We believe that the understanding of our study materials will be very easy for you. We hope that you can choose the 312-38 test questions from our company, because our products know you better.

What are you waiting for? Unlock your potential and download PracticeMaterial actual 312-38 questions today! Start your journey to a bright future, and join the thousands of students who have already seen success by using EC-COUNCIL Dumps of PracticeMaterial, you too can achieve your goals and get the EC-Council Certified Network Defender CND (312-38) certification of your dreams. Take the first step towards your future now and buy 312-38 exam dumps. You won't regret it!

## EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q391-Q396):

### NEW QUESTION # 391

John works as an Incident manager for TechWorld Inc. His task is to set up a wireless network for his organization. For this, he needs to decide the appropriate devices and policies required to set up the network.

Which of the following phases of the incident handling process will help him accomplish the task?

- A. Containment
- B. Recovery
- C. Preparation
- D. Eradication

**Answer: C**

Explanation:

Preparation is the first step in the incident handling process. It includes processes like backing up copies of all key data on a regular basis, monitoring and updating software on a regular basis, and creating and implementing a documented security policy. To apply this step a documented security policy is formulated that outlines the responses to various incidents, as a reliable set of instructions during the time of an incident. The following list contains items that the incident handler should maintain in the preparation phase i.e. before an incident occurs:

Establish applicable policies

Build relationships with key players

Build response kit

Create incident checklists

Establish communication plan

Perform threat modeling

Build an incident response team

Practice the demo incidents

Answer option A is incorrect. The Containment phase of the Incident handling process is responsible for supporting and building up the incident combating process. It ensures the stability of the system and also confirms that the incident does not get any worse. The Containment phase includes the process of preventing further contamination of the system or network, and preserving the evidence of the contamination.

Answer option D is incorrect. The Eradication phase of the Incident handling process involves the cleaning-up of the identified harmful incidents from the system. It includes the analyzing of the information that has been gathered for determining how the attack was committed. To prevent the incident from happening again, it is vital to recognize how it was conceded out so that a prevention technique is applied.

Answer option B is incorrect. Recovery is the fifth step of the incident handling process. In this phase, the Incident Handler places the system back into the working environment. In the recovery phase the Incident Handler also works with the questions to validate that the system recovery is successful. This involves testing the system to make sure that all the processes and functions are working normal. The Incident Handler also monitors the system to make sure that the systems are not compromised again. It looks for additional signs of attack.

### NEW QUESTION # 392

The \_\_\_\_\_ mechanism works on the basis of a client-server model.

- A. Host-based
- B. Network-based
- C. Push-based
- D. Pull-based

**Answer: D**

### NEW QUESTION # 393

Which of the following topologies is a type of physical network design where each computer in the network is connected to a central device through an unshielded twisted-pair (UTP) wire?

- A. Bus topology
- B. Ring topology
- **C. Star topology**
- D. Mesh topology

**Answer: C**

Explanation:

Star topology is a type of physical network design where each computer in the network is connected to a central device, called hub, through an unshielded twisted-pair (UTP) wire. Signals from the sending computer go to the hub and are then transmitted to all the computers in the network. Since each workstation has a separate connection to the hub, it is easy to troubleshoot. Currently, it is the most popular topology used for networks.

Star Topology:

□ Answer option A is incorrect. Mesh network topology is a type of physical network design where all devices in a network are connected to each other with many redundant connections. It provides multiple paths for the data traveling on the network to reach its destination. Mesh topology also provides redundancy in the network. It employs the full mesh and partial mesh methods to connect devices. In a full mesh topology network, each computer is connected to all the other computers. In a partial mesh topology network, some of the computers are connected to all the computers, whereas some are connected to only those computers with which they frequently exchange data.

Mesh Topology:

□ Answer option D is incorrect. Bus topology is a type of physical network design where all computers in the network are connected through a single coaxial cable known as bus. This topology uses minimum cabling and is therefore, the simplest and least expensive topology for small networks. In this topology, 50 ohm terminators terminate both ends of the network. A Bus topology network is difficult to troubleshoot, as a break or problem at any point along the cable can cause the entire network to go down.

Bus Topology:

□ Answer option C is incorrect. Ring topology is a type of physical network design where all computers in the network are connected in a closed loop. Each computer or device in a Ring topology network acts as a repeater. It transmits data by passing a token around the network in order to prevent the collision of data between two computers that want to send messages at the same time. If a token is free, the computer waiting to send data takes it, attaches the data and destination address to the token, and sends it. When the token reaches its destination computer, the data is copied. Then, the token gets back to the originator. The originator finds that the message has been copied and received and removes the message from the token. Now, the token is free and can be used by the other computers in the network to send data. In this topology, if one computer fails, the entire network goes down.

Ring Topology:

### NEW QUESTION # 394

Which of the following plans is documented and organized for emergency response, backup operations, and recovery maintained by an activity as part of its security program that will ensure the availability of critical resources and facilitates the continuity of operations in an emergency situation?

- A. Business Continuity Plan
- B. Continuity Of Operations Plan
- **C. Contingency Plan**
- D. Disaster Recovery Plan

**Answer: C**

Explanation:

Contingency plan is prepared and documented for emergency response, backup operations, and recovery maintained by an activity as the element of its security program that will ensure the availability of critical resources and facilitates the continuity of operations in an emergency situation.

A contingency plan is a plan devised for a specific situation when things could go wrong. Contingency plans are often devised by governments or businesses who want to be prepared for anything that could happen.

Contingency plans include specific strategies and actions to deal with

specific variances to assumptions resulting in a particular problem, emergency, or state of affairs. They also include a monitoring process and "triggers" for initiating planned actions. They are required to help governments, businesses, or individuals to recover from serious incidents in the minimum time with minimum cost and disruption.

Answer option B is incorrect. A disaster recovery plan should contain data, hardware, and software that can be critical for a business. It should also include the plan for sudden loss such as hard disc crash. The business should use backup and data recovery utilities to limit the loss of data.

Answer option D is incorrect. The Continuity Of Operation Plan (COOP) refers to the preparations and institutions maintained by the United States government, providing survival of federal government operations in the case of catastrophic events. It provides procedures and capabilities to sustain an organization's essential.

COOP is the procedure documented to ensure persistent critical operations throughout any period where normal operations are unattainable.

Answer option C is incorrect. Business Continuity Planning (BCP) is the creation and validation of a practiced logistical plan for how an organization will recover and restore partially or completely interrupted critical (urgent) functions within a predetermined time after a disaster or extended disruption. The logistical plan is called a business continuity plan.

### NEW QUESTION # 395

You have just set up a wireless network for customers at a coffee shop. Which of the following are good security measures to implement? Each correct answer represents a complete solution. Choose two.

- A. Using WPA encryption
- B. Not broadcasting SSID
- C. Using WEP encryption
- D. MAC filtering the router

**Answer: A,C**

Explanation:

With either encryption method (WEP or WPA), you can give the password to the customers who need it, and even change it frequently (daily if you like). So this won't be an inconvenience for the customers.

### NEW QUESTION # 396

.....

Many candidates may take the price into consideration while buying 312-38 exam materials. The price of 312-38 exam materials is quite reasonable, you can afford it no matter you are students or the employees in the company. Furthermore the 312-38 Exam Materials is high-quality, so that it can help you to pass the exam just one time, we will never let your money gets nothing returns. If you indeed fail the exam, money back will be guaranteed.
