Real Data-Architect Exam - Valid Data-Architect Test Sims

In fact, passing Data-Architect certification exam is just a piece of cake! But in realistic society, some candidates always say that this is difficult to accomplish. Therefore, Data-Architect certification has become a luxury that some candidates aspire to. When the some candidates through how many years attempted to achieve a goal to get Data-Architect Certification, had still not seen success hope, candidate thought always depth is having doubts unavoidably bog: can I get Data-Architect certification? When can I get Data-Architect certification? In this a succession of question behind, is following close on is the suspicion and lax.

Salesforce Certified Data Architect Sample Questions (Q37-Q42):

NEW QUESTION # 37

Get Cloudy Consulting needs to evaluate the completeness and consistency of contact information in Salesforce. Their sales reps often have incomplete information about their accounts and contacts. Additionally, they are not able to interpret the information in a consistent manner. Get Cloudy Consulting has identified certain "key" fields which are important to their sales reps.

What are two actions Get Cloudy Consulting can take to review their data for completeness and consistency? (Choose two.)

- A. Run a process that can fill in default values for blank fields.

- B. Run one report per key field, grouped by that field, to understand its data variability.
- C. Run a report which shows the last time the key fields were updated.
- D. Run a report that shows the percentage of blanks for the important fields.

Answer: C,D

NEW QUESTION # 38

Universal Containers (UC) has implemented Sales Cloud and it has been noticed that Sales reps are not entering enough data to run insightful reports and dashboards. UC executives would like to monitor and measure data quality metrics. What solution addresses this requirement?

- A. Export the data to an enterprise data warehouse and use BI tools for data quality.
- B. Use third-party AppExchange tools to monitor and measure data quality.
- C. Use custom objects and fields to calculate data quality.
- D. Generate reports to view the quality of sample data.

Answer: B

Explanation:

Using third-party AppExchange tools to monitor and measure data quality can address the requirement of UC executives by providing features such as data cleansing, deduplication, validation, enrichment, and scoring. These tools can help improve the accuracy, completeness, and consistency of the data entered by sales reps .

NEW QUESTION # 39

Which API should a data architect use if exporting 1 million records from Salesforce?

- A. Bulk API
- B. Streaming API
- C. SOAP API
- D. REST API

Answer: A

Explanation:

Using Bulk API to export 1 million records from Salesforce is the best option. Bulk API is a RESTful API that allows you to perform asynchronous operations on large sets of data. You can use Bulk API to create, update, delete, or query millions of records in batches. Bulk API is optimized for performance and scalability, and it can handle complex data loading scenarios.

NEW QUESTION # 40

A company has 12 million records, and a nightly integration queries these records.

Which two areas should a Data Architect investigate during troubleshooting if queries are timing out? (Choose two.)

- A. Make sure the query doesn't contain NULL in any filter criteria.
- B. Modify the integration users' profile to have View All Data.
- C. Create a formula field instead of having multiple filter criteria.
- D. Create custom indexes on the fields used in the filter criteria.

Answer: A,D

Explanation:

Making sure the query does not contain NULL in any filter criteria can avoid full table scans and leverage indexes more efficiently. Queries with NULL filters are not selective and can cause performance issues. Creating custom indexes on the fields used in the filter criteria can also enhance the query performance by reducing the number of records to scan.

NEW QUESTION # 41

To avoid creating duplicate Contacts, a customer frequently uses Data Loader to upsert Contact records into Salesforce. What

common error should the data architect be aware of when using upsert?

- A. Errors with duplicate external Id values within the same CSV file.
- B. Errors when a duplicate Contact name is found cause upsert to fail.
- C. Errors with using the wrong external Id will cause the load to fail.
- D. Errors with records being updated and inserted in the same CSV file.

Answer: A

Explanation:

Data Loader uses external Id fields to match records in the CSV file with records in Salesforce during an upsert operation. If the CSV file contains duplicate external Id values within the same file, Data Loader will throw an error saying "Duplicate Id Specified" and will not process those records. Therefore, it is important to ensure that the CSV file does not have any duplicate external Id values before using Data Loader to upsert records.

NEW QUESTION # 42

.....

As we all know, if everyone keeps doing one thing for a long time, as time goes on, people's attention will go from rising to falling. Experiments have shown that this is scientifically based and that our attention can only play the best role in a single period of time. In reaction to the phenomenon, therefore, the Data-Architect test material is reasonable arrangement each time the user study time, as far as possible let users avoid using our latest Data-Architect Exam Torrent for a long period of time, it can better let the user attention relatively concentrated time efficient learning. The Data-Architect practice materials in every time users need to master the knowledge, as long as the user can complete the learning task in this period, the Data-Architect test material will automatically quit learning system, to alert users to take a break, get ready for the next period of study.
