

Unique H12-821_V1.0 Learning Guide display the most authentic Exam Questions - VCE4Plus

2026 Latest VCE4Plus H12-821_V1.0 PDF Dumps and H12-821_V1.0 Exam Engine Free Share: https://drive.google.com/open?id=1CvRsR3Dfa5OsVKejTGgK8bjK2_z9o3-h

Moreover, you do not need an active internet connection to utilize VCE4Plus Huawei H12-821_V1.0 practice exam software. It works without the internet after software installation on Windows computers. The VCE4Plus web-based Huawei H12-821_V1.0 Practice Test requires an active internet and it is compatible with all operating systems. You can conveniently test your performance by checking your score each time you use our Huawei H12-821_V1.0 practice exam software.

Huawei H12-821_V1.0 (HCIP-Datacom-Core Technology V1.0) exam is a certification exam designed for professionals who want to prove their proficiency in the core technologies of data communication. H12-821_V1.0 exam is intended to assess the skills and knowledge of candidates in areas such as network architecture, protocols, technologies, and security. The Huawei H12-821_V1.0 Exam is a globally recognized certification that validates the expertise of professionals in the field of data communication.

H12-821_V1.0 Free Dump Download - Reliable H12-821_V1.0 Test Experience

Using H12-821_V1.0 exam prep is an important step for you to improve your soft power. I hope that you can spend a little time

understanding what our study materials have to attract customers compared to other products in the industry. H12-821_V1.0 exam dumps have a higher pass rate than products in the same industry. If you want to pass H12-821_V1.0 Certification, then it is necessary to choose a product with a high pass rate. Our study materials guarantee the pass rate from professional knowledge, services, and flexible plan settings. According to user needs, H12-821_V1.0 exam prep provides everything possible to ensure their success.

Huawei HCIP-Datacom-Core Technology V1.0 Sample Questions (Q164-Q169):

NEW QUESTION # 164

Which description of Route Policy is correct? (Multiple choice)

- A. The relationship between Route-Policy nodes is "or". As long as it passes the filtering of one node, it can pass the Route-Policy.
- B. The filtering rule relationship of the if-match clause is "AND", that is, all i-match clauses of the node must match
- C. A Route-Policy consists of multiple nodes. A section can contain multiple if-match and apply clauses
- D. The if-match clause is used to determine the matching conditions of the node, and the apply clause is used to define the routing behavior through filtering.

Answer: A,B,C,D

NEW QUESTION # 165

Which of the following description about LSA is correct?

- A. The combination of LS sequence number, Link State ID and Advertising Router jointly identifies an LSA
- B. The combination of LS type, Link State ID and LS sequence number jointly identifies an LSA
- C. The combination of LS type, Link State ID and Advertising Router jointly identifies an LSA
- D. The combination of LS type, LS sequence number and Advertising Router together identifies an LSA

Answer: C

NEW QUESTION # 166

By default, the IS-ISLevel-1-2 router will publish the detailed routing information of the Level-2 area to the Level-1 area to ensure that the routers in the Level-1 area can normally access the devices in the backbone area.

- A. FALSE
- B. TRUE

Answer: A

NEW QUESTION # 167

Which of the following descriptions about the Cluster List attribute in BGP is wrong?

- A. When a route is reflected by the reflector, the Cluster_ID of the RR will be added to the Cluster_List attribute of the route
- B. The attribute is an optional transition type
- C. Cluster_List is generated by the route reflector, which consists of a series of Cluster_ID
- D. When RR receives a BGP route carrying the Cluster_List attribute, and the attribute value contains the Cluster_ID of the cluster, RR considers that there is a loop in this route, so it will ignore the update about this route

Answer: B

NEW QUESTION # 168

Which of the following messages are sent when BGP establishes peer relationships?

- A. Keepalive

- B. Hello
- C. Open
- D. Update

Answer: A,C,D

Explanation:

Comprehensive and Detailed in-depth Step-by-Step Explanation:

BGP (Border Gateway Protocol) uses specific message types to establish and maintain peer relationships between routers. The primary BGP messages involved during the establishment and maintenance of peer relationships are:

Open (D):

The Open message is the first message sent after a TCP connection is established between BGP peers.

It is used to exchange parameters such as the AS number, BGP version, hold time, and BGP identifier.

Keepalive (A):

After the Open message exchange, Keepalive messages are sent periodically to maintain the BGP session.

These messages confirm that the connection is still alive.

Update (C):

Update messages are used to exchange routing information after the peer relationship is established.

They contain information about network prefixes and their associated path attributes.

Hello (B):

Hello messages are not used in BGP. They are typically used in protocols like OSPF or IS-IS to establish and maintain neighbor relationships.

Thus, the correct answers are A (Keepalive), C (Update), and D (Open).
