

JN0-637 Testking | JN0-637 Real Dump

DOWNLOAD the newest TestkingPDF JN0-637 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1qRTboB-muOw98yv6JoP5oe-1A3ev4wk>

These Security, Professional (JNCIP-SEC) (JN0-637) practice exams contain all the JN0-637 questions that clearly and completely elaborate on the difficulties and hurdles you will face in the final Security, Professional (JNCIP-SEC) (JN0-637) exam. Security, Professional (JNCIP-SEC) (JN0-637) practice test is customizable so that you can change the timings of each session. TestkingPDF desktop Juniper JN0-637 Practice Test questions software is only compatible with windows and easy to use for everyone.

Juniper JN0-637 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Advanced IPsec VPNs: Focusing on networking professionals, this part covers advanced IPsec VPN concepts and requires candidates to demonstrate their skills in real-world applications.
Topic 2	<ul style="list-style-type: none">Multinode High Availability (HA): In this topic, aspiring networking professionals get knowledge about multinode HA concepts. To pass the exam, candidates must learn to configure or monitor HA systems.
Topic 3	<ul style="list-style-type: none">Layer 2 Security: It covers Layer 2 Security concepts and requires candidates to configure or monitor related scenarios.
Topic 4	<ul style="list-style-type: none">Advanced Network Address Translation (NAT): This section evaluates networking professionals' expertise in advanced NAT functionalities and their ability to manage complex NAT scenarios.
Topic 5	<ul style="list-style-type: none">Troubleshooting Security Policies and Security Zones: This topic assesses the skills of networking professionals in troubleshooting and monitoring security policies and zones using tools like logging and tracing.
Topic 6	<ul style="list-style-type: none">Logical Systems and Tenant Systems: This topic of the exam explores the concepts and functionalities of logical systems and tenant systems.

Topic 7	<ul style="list-style-type: none"> Automated Threat Mitigation: This topic covers Automated Threat Mitigation concepts and emphasizes implementing and managing threat mitigation strategies.

JN0-637 Real Dump | Dumps JN0-637 Collection

We will be happy to assist you with any questions regarding our products. Our JN0-637 practice exam TestkingPDF helps to prepare applicants to practice time management, problem-solving, and all other tasks on the standardized JN0-637 Exam and lets them check their scores. The JN0-637 results help students to evaluate their performance and determine their readiness without difficulty.

Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q71-Q76):

NEW QUESTION # 71

You are asked to configure tenant systems.

Which two statements are true in this scenario? (Choose two.)

- A. Tenant systems have their own configuration database.
- B. After successful configuration, the changes are merged into the primary database for each tenant system.
- C. You can commit multiple tenant systems at a time.
- D. A tenant system can have only one administrator.

Answer: A,C

Explanation:

Each tenant system maintains its own configuration database, isolating configurations from others, enhancing security and operational efficiency. Junos OS supports multiple concurrent commit operations across tenant systems. Further details are covered in the Juniper Tenant System Guide.

When configuring tenant systems on an SRX device, the following principles apply:

* Tenant Systems Have Their Own Configuration Database (Answer C): Each tenant system has its own isolated configuration database, ensuring that changes made in one tenant system do not affect others. This allows for multi-tenant environments where different tenants can have independent configurations.

* Commit Multiple Tenant Systems Simultaneously (Answer D): The system allows for multiple tenant systems to be committed at the same time, simplifying management when working with multiple tenants. This is particularly useful in large environments where multiple logical systems or tenants need updates simultaneously.

NEW QUESTION # 72

Exhibit:

```

user@srx> show security dynamic-address category-name CC
No.      IP-start      IP-end      Feed      Address
1        1.93.10.119   1.93.10.119 CC/1      10-10-10-10
2        1.93.17.81    1.93.17.81  CC/1      10-10-10-10
6        1.93.52.33    1.93.52.33  CC/1      10-10-10-10
3        1.234.4.71    1.234.4.71  CC/1      10-10-10-10
4        1.234.4.72    1.234.4.72  CC/1      10-10-10-10
5        2.30.157.51   2.30.157.51 CC/1      10-10-10-10

```

Referring to the exhibit, which two statements are correct?

- A. All of the entries are Dshield entries
- B. All of the entries are command and control entries.
- C. All of the entries are a threat level 8
- D. All of the entries are a threat level 10.

Answer: A,B

Explanation:

Referring to the exhibit, the following statements are correct:

B) All of the entries are command and control entries. Command and control entries are dynamic addresses that represent the IP addresses of servers that are used by malware to communicate with infected hosts. The SRX Series device can block or log the traffic to or from these IP addresses based on the security policies. The exhibit shows that all of the entries have the category DC/1, which stands for command and control.

C) All of the entries are Dshield entries. Dshield is a feed source that provides a list of IP addresses that are associated with malicious activities, such as scanning, spamming, or attacking. The SRX Series device can download the Dshield feed and use it to populate the dynamic address entries. The exhibit shows that all of the entries have the feed dshield, which indicates that they are from the Dshield feed source.

The other statements are incorrect because:

A) All of the entries are not a threat level 8, but a threat level 10. The threat level is a numeric value that indicates the severity of the threat associated with a dynamic address entry. The higher the threat level, the more dangerous the threat. The SRX Series device can use the threat level to prioritize the actions for the dynamic address entries. The exhibit shows that all of the entries have the cc CN, which stands for country code China. According to the Juniper documentation, the country code China has a threat level of 10, which is the highest.

D) All of the entries are not a threat level 10, but they are. See the explanation for option A.

You are using traceoptions to verify NAT session information on your SRX Series device. Referring to the exhibit, which two statements are correct? (Choose two.)

- A. This packet is part of an existing session.
- B. The SRX device is changing the source address on this packet from
- C. This is the first packet in the session
- D. The SRX device is changing the destination address on this packet 10.0.1.1 to 172.20.101.10.

Answer: C,D

NEW QUESTION # 74

You opened a support ticket with JTAC for your Juniper ATP appliance. JTAC asks you to set up access to the device using the

reverse SSH connection.

Which three settings must be configured to satisfy this request? (Choose three.)

- A. Enable remote support.
- B. Enable JTAC remote access
- C. Create a temporary root account.
- D. Create a temporary admin account.
- E. Enable a JATP support account.

Answer: A,B,E

Explanation:

Enable JTAC remote access - This is typically necessary to allow JTAC personnel to access the device.

Enabling this feature often opens a secure channel for JTAC to connect to the device.

Enable a JATP support account - For the Juniper ATP appliance, enabling a support account specific to the ATP (Advanced Threat Prevention) platform would be necessary for JTAC to perform the support activities.

Enable remote support - This setting is required to allow remote support connections into the device.

Enabling remote support typically involves configuring the device to accept incoming connections from JTAC.

NEW QUESTION # 75

Exhibit:

```
user@srx> show ethernet-switching global-information
Global Configuration:
MAC aging interval      : 300
MAC learning            : Enabled
MAC statistics          : Disabled
MAC limit Count         : 65536
MAC limit hit           : Disabled
MAC packet action drop  : Disabled
MAC+IP aging interval  : IPv4 - 1200 seconds
                       : IPv6 - 1200 seconds
MAC+IP limit Count      : 65536
MAC+IP limit reached    : No
LE aging time           : 1200
LE VLAN aging time     : 1200
Global Mode             : Transparent bridge
RE state                : Master
```

Referring to the exhibit, which two statements are correct? (Choose two.)

- A. The device can pass Layer 2 and Layer 3 traffic at the same time.
- B. You can secure inter-VLAN traffic with a security policy on this device.
- C. You cannot secure intra-VLAN traffic with a security policy on this device.
- D. The device cannot pass Layer 2 and Layer 3 traffic at the same time.

Answer: A,B

Explanation:

The exhibit provides information about an SRX Series device operating in transparent mode (Layer 2) and Layer 3 routing at the same time.

The SRX device can secure inter-VLAN traffic because it supports security policies for Layer 3 traffic between different VLANs. In this case, traffic moving between different VLANs (i.e., Layer 3 traffic) can be processed and controlled using security policies.

The SRX device can handle both Layer 2 and Layer 3 traffic simultaneously. In mixed mode, the device is capable of switching traffic at Layer 2 (intra-VLAN) while also routing traffic at Layer 3 (inter-VLAN). This is evident from the global configuration showing transparent bridge mode and Layer 3 interfaces.

NEW QUESTION # 76

.....

The browser-based version has all features of the desktop JN0-637 practice exam. You don't need special plugins or software installations to operate the web-based Security, Professional (JNCIP-SEC) (JN0-637) practice exam. This Security, Professional (JNCIP-SEC) (JN0-637) practice test is compatible with every browser such as MS Edge, Chrome, Internet Explorer, Firefox, Opera, and Safari. TestkingPDF's web-based JN0-637 practice exam promotes self-assessment and self-study.
