## Scaled Agile SAFe-Agilist Exam | Reliable SAFe-Agilist Test Bootcamp - Best Provider for SAFe-Agilist: SAFe 6 Agilist - Leading SAFe (SA) (6.0) Exam

Though there are three different versions of our SAFe-Agilist practice guide to cater to all needs of our worthy customers: the PDF, Software and APP online. I love the Software version the most. The software version of our SAFe-Agilist exam questions can be used in the Windows system, which is designed by the experts from our company. The functions of the software version are very special. For example, the software version of our SAFe-Agilist Learning Engine can simulate the real exam environment.

### Scaled Agile SAFe 6 Agilist - Leading SAFe (SA) (6.0) Sample Questions (Q35-Q40):

#### NEW QUESTION # 35

What triggers the need for a Value Stream?

- A. Spike request
- B. Epic request
- C. User Story request
- **D. Feature request**

**Answer: D**

Explanation:

Explanation

According to the SAFe Agilist 6.0 domain of Lean Thinking, a value stream is triggered by a demand for some value, such as a new feature, a change request, or a defect fix<sup>1</sup>. A feature is a service that fulfills a stakeholder need<sup>2</sup>. Therefore, a feature request is a valid trigger for a value stream.

A spike request is a type of exploration enabler that addresses technical uncertainty or risk<sup>3</sup>. A user story request is a type of backlog item that represents an end user goal or function<sup>4</sup>. These are not triggers for a value stream, but rather work items that flow through a value stream.

#### NEW QUESTION # 36

An Enterprise has just adopted the SAFe Implementation Roadmap and is in the process of training executives, managers, and leaders. What is their next step?

- A. Train the leaders in Portfolio and Product Management to solve problems before fixing symptoms
- B. Train Lean-Agile change agents to push out the roadmap and build consensus
- C. Perform process mapping on the current state
- **D. Identify Value Streams and Agile Release Trains to start alignment of the organization**

**Answer: D**

#### NEW QUESTION # 37

What is an example of applying cadence and synchronization in SAFe?

- A. Creating cross-functional teams
- B. Using a Portfolio Kanban system
- **C. Conducting a PI Planning meeting**
- D. Allocating budgets to Agile Release Trains

**Answer: C**

#### NEW QUESTION # 38

What is found on an ART planning board?

- A. User Stories
- B. EPics

- C. Tasks
- **D. Features**

**Answer: D**

Explanation:

Explanation

Features are found on an ART planning board. An ART planning board is a tool that helps teams visualize and manage the work items for an Agile Release Train (ART). An ART is a long-lived team of Agile teams that delivers value in a regular cadence.

Features are high-level descriptions of system behaviors that provide business value to a stakeholder. Features are derived from epics and decomposed into user stories or enablers.

Features are prioritized by business value using Weighted Shortest Job First (WSJF) and planned for Program Increments (PIs) by the ART teams. References: Organizing Around Value with ARTs, ART Planning Board

### NEW QUESTION # 39

Why do Business Owners assign business value to team PI Objectives?

- A. To determine the highest value using WSJF
- B. To override the decisions made in WSJF prioritization
- **C. To provide guidance on the business value of the team objectives**
- D. To ensure the teams do not work on architectural Enablers

**Answer: C**

Explanation:

During the PI Planning simulation, the workbook details that:

"In the second team breakout, Business Owners circulate and assign business value to PI Objectives from low (1) to high (10)...

This reflects the importance of the objectives and helps prioritize based on business impact." The purpose is to guide teams in understanding what matters most to the business.

### NEW QUESTION # 40

.....
