## 100% 합격보장 가능한 C\_S4CPB\_2508 높은 통과율 시험 공부 공부문제

DumpTOP에서는 전문 SAP C\_S4CPB\_2508 인증 시험을 겨냥한 덤프 즉 문제와 답을 제공합니다. 여러분이 처음 SAP C\_S4CPB\_2508 인증 시험 준비라면 아주 좋은 덤프입니다. DumpTOP에서 제공되는 덤프는 모두 실제 시험과 아주 유사한 덤프들입니다. SAP C\_S4CPB\_2508 인증 시험 패스는 보장합니다. 만약 떨어지셨다면 우리는 덤프 비용 전액을 환불해드립니다.

### 최신 SAP Certified Associate C\_S4CPB\_2508 무료 샘플 문제 (Q47-Q52):

#### 질문 # 47

When using the Local SAP S/4HANA Database Schema migration approach, what is the maximum file size?

Note: There are 2 correct answers to this question.

- A. 160 MB per ZIP file
- B. 160 MB per file
- C. 100 MB per ZIP file
- D. 100 MB per file

정답: A,B

#### 설명:

When using the Local SAP S/4HANA Database Schema migration approach, you can upload multiple XML files at once by using a ZIP file. The total maximum permitted size for the XML files in the ZIP file is 160 MB. The limit for the ZIP file is also 160 MB. Therefore, the maximum file size is 160 MB per ZIP file and 160 MB per file. #### 질문 # 48

Where can you find packaged integration content if there is no SAP Best Practices content available?

- A. SAP Fiori Apps Reference Library
- B. SAP BTP Cockpit
- C. SAP Business Accelerator Hub
- D. SAP Extensibility Explorer

정답: C

#### 질문 # 49

If a customer wants to develop their own custom application and integrate it with SAP S/4HANA Cloud Public Edition, what tools would you recommend to develop the app? Note: There are 2 correct answers to this question.

- A. SAP Business Application Studio
- B. SAP HANA Cloud
- C. SAP Build
- D. SAP Cloud Portal Service

정답: A,C

설명:

SAP Business Application Studio and SAP Build are two tools that enable customers to develop their own custom applications and integrate them with SAP S/4HANA Cloud Public Edition. SAP Business Application Studio is a cloud-based development environment that offers both low-code and full-stack development capabilities. It supports various SAP technologies and frameworks, such as SAP Fiori, SAPUI5, SAP Cloud Application Programming Model, and SAP Cloud SDK. SAP Build is a cloud-based prototyping and user research tool that helps customers to design and test user interfaces for their applications. It provides a drag- and-drop interface, a library of UI components, and integration with SAP Web IDE and SAP Fiori Launchpad. Both tools are part of the SAP Extension Suite, which provides a range of services and capabilities to extend SAP applications and processes. 질문 # 50

Which tasks are mandatory before you can migrate data for a specific object? Note: There are 2 correct answers to this question.

- A. Predecessor objects have been migrated
- B. You select the same migration method previously used for other objects
- C. Permission to migrate the data has been assigned
- D. All previous migration projects are in the "Finished" status

정답: A,C

설명:

Before you can migrate data for a specific object, you need to ensure that the following tasks are completed:

\* Predecessor objects have been migrated: Some migration objects depend on other migration objects that need to be migrated first. For example, before you can migrate sales orders, you need to migrate customers, products, and pricing conditions. You can check the dependencies of migration objects in the Migration Cockpit or in the Migration Object Modeler<sup>12</sup>.

\* Permission to migrate the data has been assigned: In addition to having permission to access the Migrate Your Data app, you need permission to migrate each type of data. This is because the Migration Cockpit tool uses the same APIs and technical checks that would be done if you were to create a new data value through the respective application. For example, if you need to create a new bank record in your system, you would use the application, Manage Banks - Master Data. The app would present you with several fields capturing information about the new bank to create the record in your system. Now if you need to create 1,000 banks, it wouldn't be feasible to create each through the Manage Banks - Master Data app one-by-one. Therefore, you need to have the permission to use the Manage Banks - Master Data app in order to migrate bank data using the Migration Cockpit<sup>3</sup>.

The other tasks are not mandatory before you can migrate data for a specific object. You can select different migration methods for different objects, depending on your source system and data format. You can also have multiple migration projects in progress at the same time, as long as they do not contain the same migration objects<sup>4</sup>.
