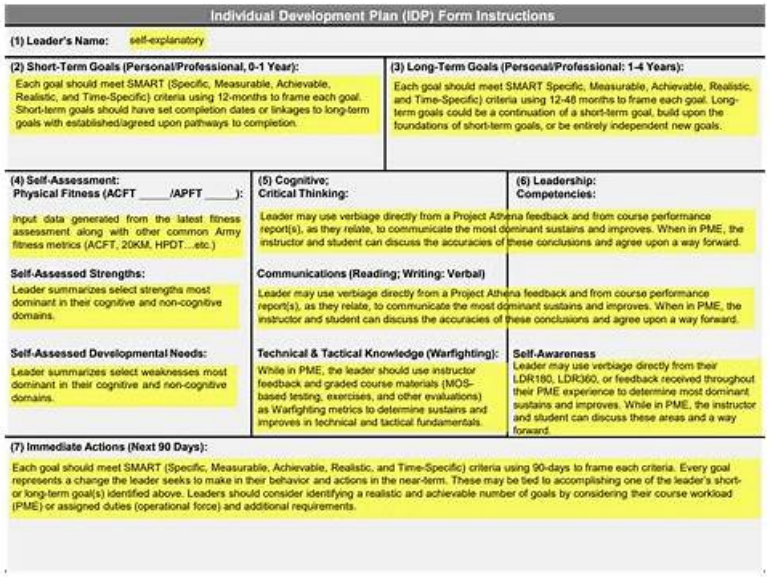
Test IDP Guide | IDP Braindump Pdf



Individual Development Plan (IDP) Form Instructions

(1) Leader's Name: self-explanatory

(2) Short-Term Goals (Personal/Professional, 0-1 Year):
Each goal should meet SMART (Specific, Measurable, Achievable, Realistic, and Time-Specific) criteria using 12-months to frame each goal. Short-term goals should have set completion dates or linkages to long-term goals with established/agreed upon pathways to completion.

(3) Long-Term Goals (Personal/Professional: 1-4 Years):
Each goal should meet SMART Specific, Measurable, Achievable, Realistic, and Time-Specific) criteria using 12-48 months to frame each goal. Long-term goals could be a continuation of a short-term goal, build upon the foundations of short-term goals, or be entirely independent new goals.

(4) Self-Assessment:
Physical Fitness (ACFT _____/APFT _____):
Input data generated from the latest fitness assessment along with other common Army fitness metrics (ACFT, 20KM, HPDT…etc.)

Self-Assessed Strengths:
Leader summarizes select strengths most dominant in their cognitive and non-cognitive domains.

Self-Assessed Developmental Needs:
Leader summarizes select weaknesses most dominant in their cognitive and non-cognitive domains.

(5) Cognitive;
Critical Thinking:
Leader may use verbiage directly from a Project Athena feedback and from course performance report(s), as they relate, to communicate the most dominant sustains and improves. When in PME, the instructor and student can discuss the accuracies of these conclusions and agree upon a way forward.

Communications (Reading; Writing: Verbal)
Leader may use verbiage directly from a Project Athena feedback and from course performance report(s), as they relate, to communicate the most dominant sustains and improves. When in PME, the instructor and student can discuss the accuracies of these conclusions and agree upon a way forward.

Technical & Tactical Knowledge (Warfighting):
While in PME, the leader should use instructor feedback and graded course materials (MOS-based testing, exercises, and other evaluations) as Warfighting metrics to determine sustains and improves in technical and tactical fundamentals.

(6) Leadership:
Competencies:

Self-Awareness
Leader may use verbiage directly from their LDR180, LDR360, or feedback received throughout their PME experience to determine most dominant sustains and improves. While in PME, the instructor and student can discuss these areas and a way forward.

(7) Immediate Actions (Next 90 Days):
Each goal should meet SMART (Specific, Measurable, Achievable, Realistic, and Time-Specific) criteria using 90-days to frame each criteria. Every goal represents a change the leader seeks to make in their behavior and actions in the near-term. These may be tied to accomplishing one of the leader's short- or long-term goal(s) identified above. Leaders should consider identifying a realistic and achievable number of goals by considering their course workload (PME) or assigned duties (operational force) and additional requirements.

Our company is a professional certificate test materials provider, and we are in the leading position in providing valid and effective exam materials. IDP exam braindumps are high quality, and it also contain certain questions and answers, and it will be enough for you to pass the exam. Besides, in order to let you have a deeper understanding of what you are going to buy, we offer you free demo to have a try before buying IDP Training Materials. We offer you free update for 365 days after purchasing, and the update version will be sent to your email address automatically.

For your convenience, ActualTorrent has prepared authentic CrowdStrike IDP Exam study material based on a real exam syllabus to help candidates go through their exams. Candidates who are preparing for the CrowdStrike exam suffer greatly in their search for preparation material.

IDP Braindump Pdf | Printable IDP PDF

As job seekers looking for the turning point of their lives, it is widely known that the workers of recruitment is like choosing apples---viewing resumes is liking picking up apples, employers can decide whether candidates are qualified by the IDP appearances, or in other words, candidates' educational background and relating IDP professional skills. They develop the IDP exam guide targeted to real exam. The wide coverage of important knowledge points in our IDP latest braindumps would be greatly helpful for you to pass the exam.

CrowdStrike IDP Exam Syllabus Topics:

Topic	Details
Topic 1	• User Assessment: Examines user attributes, differences between users • endpoints • entities, risk baselining, risky account types, elevated privileges, watchlists, and honeytoken accounts.
Topic 2	• Identity Protection Tenets: Examines Falcon Identity Protection's architecture, domain traffic inspection, EDR complementation, human vulnerability protection, log-free detections, and identity-based attack mitigation.
Topic 3	• Risk Assessment: Covers entity risk categorization, risk and event analysis dashboards, filtering, user risk reduction, custom insights versus reports, and export scheduling.

Topic 4	• Configuration and Connectors: Addresses domain controller monitoring, subnet management, risk settings, MFA and IDaaS connectors, authentication traffic inspection, and country-based lists.
Topic 5	• Zero Trust Architecture: Covers NIST SP 800-207 framework, Zero Trust principles, Falcon's implementation, differences from traditional security models, use cases, and Zero Trust Assessment score calculation.
Topic 6	• GraphQL API: Covers Identity API documentation, creating API keys, permission levels, pivoting from Threat Hunter to GraphQL, and building queries.

CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q48-Q53):

NEW QUESTION # 48
The configuration of the Azure AD (Entra ID) Identity-as-a-Service connector requires which three pieces of information?

- A. Tenant Domain, Token, Configuration File
- B. Tenant Domain, Application ID, Scope
- C. Tenant Domain, Client Secret, User Identifier
- D. Tenant Domain, Application ID, Application Secret

Answer: D

Explanation:
To integrate Falcon Identity Protection withAzure AD (Entra ID)as an Identity-as-a-Service (IDaaS) provider, specific application-level credentials are required. According to the CCIS curriculum, the connector configuration requiresTenant Domain,Application (Client) ID, andApplication Secret.
These values are generated when registering an application in Azure AD and are used to authenticate Falcon Identity Protection securely via OAuth-based API access. This method ensures least-privilege access and allows the connector to ingest cloud authentication activity and apply SSO-related policy enforcement.
Other options list incomplete or incorrect credential combinations. Therefore,Option Dis the correct and verified answer.

NEW QUESTION # 49
Falcon Identity Protection monitors network traffic to build user behavioral profiles to help identify unusual user behavior. How can this be beneficial to create a Falcon Fusion workflow?

- A. Falcon Fusion is not identity based
- B. Falcon Fusion works with your IT policy enforcement through the use of identity and behavioral analytics
- C. Falcon Fusion will only send emails to the user
- D. Falcon Fusion will only work with certain users

Answer: B

Explanation:
Falcon Identity Protection continuously inspects authentication traffic and network behavior to establish behavioral baselines for users and accounts. These baselines enable the platform to detect deviations that indicate potential compromise, misuse, or insider threat activity. This behavioral intelligence directly enhances the effectiveness ofFalcon Fusion workflows.
Falcon Fusion leveragesidentity and behavioral analyticsas decision points within workflows, allowing automated actions to be triggered when abnormal behavior is detected. For example, a workflow can automatically enforce MFA, notify administrators, isolate risky sessions, or initiate remediation when a user deviates from their established baseline.
The CCIS curriculum highlights that Falcon Fusion is designed tointegrate identity risk signals with IT policy enforcement, enabling Zero Trust-aligned automation. This capability goes far beyond simple notifications and supports coordinated responses across security and IT teams.
Options A, B, and C are incorrect because Falcon Fusion is fully identity-aware, applies broadly across users and entities, and supports a wide range of actions beyond email notifications. Therefore,Option Daccurately describes how behavioral profiling strengthens Falcon Fusion workflows.

NEW QUESTION # 50
Which of the following users would most likely have aHIGHrisk score?

- A. User that has not logged in recently and is marked as Stale
- B. User that recently logged in from a shared endpoint
- C. User that is a member of the Domain Admins group
- D. Privileged user with a Compromised Password

Answer: D

Explanation:
Falcon Identity Protection calculates user risk scores based on a combination ofprivilege level,credential exposure, andbehavioral indicators. According to the CCIS curriculum, aprivileged user with a compromised passwordrepresents one of the highest-risk identity scenarios.
Privileged accounts-such as administrators or service accounts with elevated access-already pose increased risk due to their access scope. When Falcon detects that such an account's credentials have been compromised, the risk escalates significantly because attackers can immediately gain high-impact access without further escalation.
The other options do not inherently represent the same level of risk:
* Logging in from a shared endpoint may increase risk but is context-dependent.
* Stale users are risky but typically lower risk than active compromised credentials.
* Domain Admin group membership alone does not imply compromise.
Becausecredential compromise combined with privilegedramatically increases attack potential,Option Bis the correct and verified answer.

NEW QUESTION # 51
Considering the following example, what MITRE ATT&CK tactic would you use to complete the workflow?

- A. Lateral Movement
- B. Privilege Escalation
- C. Initial Access
- D. Credential Access

Answer: A

Explanation:
The provided Falcon Fusion SOAR workflow example shows a trigger based on anIdentity Detection, followed by conditions and actions that search for recently logged-in users and related entities across endpoints. According to the CCIS curriculum, this type of workflow aligns with theLateral Movementtactic in the MITRE ATT&CK framework.
Lateral Movement involves an attacker moving from one system or account to another after initial access has been achieved. The workflow's logic-correlating identity detections with additional users and endpoints- supports identifying and responding to movement across the environment using compromised or abused credentials.
The other tactics do not best fit this scenario:
* Initial Access occurs earlier in the attack chain.
* Credential Access focuses on obtaining credentials.
* Privilege Escalation centers on increasing access rights.
Because the workflow is designed to detect and respond tomovement between systems and identities, Option C (Lateral Movement)is the correct and verified answer.

NEW QUESTION # 52
Which of the following IDaaS connectors will allow Identity to ingest cloud activity along with applying SSO Policy?

- A. SAML
- B. Okta SSO
- C. ADFS
- D. Azure NPS

Answer: B

Explanation:

Falcon Identity Protection integrates withIdentity-as-a-Service (IDaaS)providers to ingest cloud authentication activity and enforce identity-based policies. According to the CCIS curriculum,Okta SSOis a supported IDaaS connector that enables Falcon to ingestcloud authentication eventswhile also applying Single Sign-On (SSO) policies.
Okta SSO provides rich identity telemetry, including login attempts, device context, and authentication outcomes. This data allows Falcon Identity Protection to correlate on-premises and cloud-based identity activity, extending identity risk analysis beyond Active Directory.
The other options are incorrect:
* ADFSis an on-premises federation service, not a cloud IDaaS.
* Azure NPSis used for RADIUS-based MFA, not SSO ingestion.
* SAMLis a protocol, not an IDaaS connector.
Because Okta SSO provides both cloud activity ingestion and SSO enforcement,Option Bis the correct and verified answer.

NEW QUESTION # 53
......

It is known to us that more and more companies start to pay high attention to the IDP certification of the candidates. Because these leaders of company have difficulty in having a deep understanding of these candidates, may it is the best and fast way for all leaders to choose the excellent workers for their company by the IDP Certification that the candidates have gained. There is no doubt that the IDP certification has become more and more important for a lot of people. And with our IDP exam questions. you can get the IDP certification easily.
