Perfect Free DAA-C01 Pdf Guide Supply you Fantastic Reliable Study Notes for DAA-C01: SnowPro Advanced: Data Analyst Certification Exam to Prepare easily

It would be really helpful to purchase SnowPro Advanced: Data Analyst Certification Exam exam dumps right away. If you buy this Snowflake Certification Exams product right now, we'll provide you with up to 1 year of free updates for DAA-C01 authentic questions. You can prepare using these no-cost updates in accordance with the most recent test content changes provided by the DAA-C01 Exam Dumps. The DAA-C01 actual questions we sell also come with a free demo.

Snowflake SnowPro Advanced: Data Analyst Certification Exam Sample Questions (Q50-Q55):

NEW QUESTION # 50

Data clustering is an example of which type of data analysis technique?

- A. Prescriptive analysis
- B. Predictive analysis
- C. Descriptive analysis
- D. Exploratory analysis

Answer: B

NEW QUESTION # 51

You have identified a potentially valuable dataset on the Snowflake Marketplace that provides demographic information by zip code. Your company has customer data in a table 'CUSTOMERS' with columns 'CUSTOMER ID' (INT), 'ZIP CODE' (VARCHAR),

and 'PURCHASE AMOUNT (NUMBER)'. Before subscribing to the Marketplace data, you want to preview the data to ensure it contains the necessary information and assess its quality. What is the recommended and MOST efficient way to preview the data from the Snowflake Marketplace listing?

- A. Use the 'Get Data' button on the Marketplace listing and specify that you only want a small subset of the data, such as data for a specific geographic region. This will create a smaller, more manageable dataset for previewing.
- B. Create a stored procedure that dynamically calls the Marketplace data listing API to fetch a JSON sample and parse the JSON data into a temporary table for previewing.
- C. Contact the data provider directly and request a sample dataset to be delivered to you as a CSV file. Then upload this CSV file to an internal stage and query it to preview the data.
- **D. Utilize the 'Preview Data' tab available directly within the Snowflake Marketplace listing. This tab typically provides a sample of the data, allowing you to inspect the data structure, content, and quality before subscribing.**
- E. Subscribe to the free trial of the Snowflake Marketplace listing, create a database from the shared data, and then sample the demographic data using 'SELECT FROM .. LIMIT 100'.

Answer: D

Explanation:

Option D is the most recommended and efficient way. The 'Preview Data' tab within the Snowflake Marketplace listing is designed precisely for this purpose. It allows you to inspect a sample of the data directly within the Marketplace interface, without requiring you to subscribe or incur costs. Option A requires you to subscribe to the listing, even if it's a free trial, which is an unnecessary step for simply previewing the data. Option B is inefficient and requires manual effort to obtain and load the data. Option C is not a standard feature of the Snowflake Marketplace. Option E is overly complex and inefficient for a simple preview task.

NEW QUESTION # 52

You are analyzing customer order data in Snowflake. A column 'ORDER DATE' is stored as VARCHAR. You notice inconsistencies: some dates are in 'YYYY-MM-DD' format, others in 'MM/DD/YYYY', and some have missing values represented by 'N/A'. You need to standardize the 'ORDER DATE' column into a DATE format and handle missing values. What is the most efficient and robust Snowflake SQL statement to achieve this, ensuring no data is lost and that invalid dates are replaced with NULL?

```
☐ ALTER TABLE orders ADD COLUMN ORDER_DATE_CLEAN DATE; UPDATE orders SET ORDER_DATE_CLEAN = CASE WHEN TRY_TO_DATE(ORDER_DATE) IS NOT NULL THEN TRY_TO_DATE(ORDER_DATE) WHEN TRY_TO_DATE(ORDER_DATE, 'MM/DD/YYYY') IS NOT NULL THEN TRY_TO_DATE(ORDER_DATE, 'MM/DD/YYYY') ELSE NULL END; ALTER TABLE orders DROP COLUMN ORDER_DATE; ALTER TABLE orders RENAME COLUMN ORDER_DATE_CLEAN TO ORDER_DATE;
```

```
☐ CREATE OR REPLACE TEMP TABLE temp_orders AS SELECT CASE WHEN REGEXP_LIKE(ORDER_DATE, '^d{4}-d{2}-d{2}$') THEN TRY_TO_DATE(ORDER_DATE) WHEN REGEXP_LIKE(ORDER_DATE, '^d{2}/d{2}/d{4}$') THEN TRY_TO_DATE(ORDER_DATE, 'MM/DD/YYYY') ELSE NULL END AS ORDER_DATE_CLEAN, EXCEPT (ORDER_DATE) FROM orders; CREATE OR REPLACE TABLE orders AS SELECT FROM temp_orders;
```

```
☐ CREATE OR REPLACE TABLE orders AS SELECT TRY_TO_DATE(ORDER_DATE) AS ORDER_DATE, EXCEPT (ORDER_DATE) FROM orders; UPDATE orders SET ORDER_DATE = NULL WHERE ORDER_DATE = 'N/A';
```

```
☐ ALTER TABLE orders ADD ORDER_DATE_CLEAN DATE; UPDATE orders SET ORDER_DATE_CLEAN = TO_DATE(ORDER_DATE, 'YYYY-MM-DD') WHERE IS_DATE(ORDER_DATE, 'YYYY-MM-DD'); UPDATE orders SET ORDER_DATE_CLEAN = TO_DATE(ORDER_DATE, 'MM/DD/YYYY') WHERE IS_DATE(ORDER_DATE, 'MM/DD/YYYY'); UPDATE orders SET ORDER_DATE_CLEAN = NULL WHERE ORDER_DATE = 'N/A'; ALTER TABLE orders DROP ORDER_DATE; ALTER TABLE orders RENAME ORDER_DATE_CLEAN TO ORDER_DATE;
```

```
☐ CREATE OR REPLACE TABLE orders AS SELECT IF(ORDER_DATE = 'N/A', NULL, TRY_TO_DATE(ORDER_DATE)) AS ORDER_DATE, EXCEPT (ORDER_DATE) FROM orders;
```

- A. Option A
- B. Option B
- C. Option C
- **D. Option E**
- E. Option D

Answer: D

Explanation:

Option B is the most robust and efficient because it uses REGEXP LIKE to validate the date formats before attempting to convert them using TRY_TO_DATE. It also directly creates a temporary table to perform the transformation, minimizing the risk of data loss during the process. Then the old table is replaced with the content of the temp table.

NEW QUESTION # 53

How can automated and repeatable tasks contribute to maintaining reports and dashboards in meeting business requirements?

- **A. Automated tasks ensure consistency and reduce manual effort.**

- B. Repeatable tasks hinder data updates in dashboards.
- C. They limit the scalability of dashboards and reports.
- D. They solely increase the complexity of dashboard management.

Answer: A

Explanation:

Automated tasks ensure consistency and reduce manual effort in maintaining reports and dashboards.

NEW QUESTION # 54

How do Snowsight dashboards enable effective data presentation for business use analyses?

- A. Snowsight doesn't support visual data representation.
- B. Snowsight dashboards rely solely on text-based representations.
- C. Snowsight offers limited data representation options.
- D. They enable diverse data representation for effective analyses.

Answer: D

Explanation:

Snowsight dashboards enable diverse data representation for effective analyses in business use cases.

NEW QUESTION # 55

.....

Customers of FreeCram will also receive updates for 1 year after purchase. A lot of students have prepared from the for the SnowPro Advanced: Data Analyst Certification Exam (DAA-C01) certification test and passed it in a single try. They have rated the SnowPro Advanced: Data Analyst Certification Exam (DAA-C01) as one of the best in the market to prepare for the DAA-C01 exam in minimum time. Try a free demo now and start your journey towards your dream certification!
