Passing the COBIT-2019 exam demonstrates a candidate's knowledge and skills in implementing and managing IT processes and systems using the COBIT framework.

## ISACA COBIT 2019 Foundation Sample Questions (Q93-Q98):

### NEW QUESTION # 93

Which of the following enterprise risk management concepts is MOST important to fully understand prior to finalizing the design of an IT governance system?

- A. The enterprise's risk appetite

- B. The enterprise's risk profile
- C. The enterprise's risk tolerance

**Answer: B**

#### NEW QUESTION # 94

When tailoring a governance system for an enterprise, which of the following is MOST important to consider for an operating environment with a high compliance requirement?

- A. Threat landscape
- B. Enterprise strategy
- C. Geopolitical situation
- D. Enterprise goals

**Answer: A**

Explanation:

Explanation

The threat landscape is a design factor that describes the types and levels of threats that an enterprise faces from internal and external sources that could compromise its information and technology assets. The threat landscape helps to determine the level of security and resilience that an enterprise needs to protect its information and technology assets from unauthorized access, use, disclosure, modification, destruction, or disruption. When tailoring a governance system for an enterprise, one of the most important factors to consider for an operating environment with a high compliance requirement is the threat landscape. The compliance requirement is another design factor that describes the extent and nature of laws, regulations, standards, guidelines, contracts, or agreements that an enterprise must comply with regarding its information and technology activities. The compliance requirement influences the level of control and assurance that an enterprise needs to demonstrate its adherence to the applicable rules and obligations. By considering the threat landscape in relation to the compliance requirement, an enterprise can ensure that its governance system is appropriate for its risk profile and context, and that it can effectively manage the potential impacts of threats on its compliance status<sup>34</sup> References: 3: COBIT 2019 Design Guide: page 41-43 4: COBIT 2019 Design Guide: page 47-48

#### NEW QUESTION # 95

Which of the following describes the COBIT performance model?

- A. The COBIT performance model is a stand-alone model that can be used in conjunction with the COBIT core model.
- B. The COBIT performance model is integrated into the COBIT core model.
- C. The COBIT performance model is unique and not aligned with existing maturity and capability models.

**Answer: B**

Explanation:

Explanation/Reference: [https://community.mis.temple.edu/mis5203sec001sp2019/files/2019/01/COBIT-2019-Framework-Introduction-and-Methodology\\_res\\_eng\\_1118.pdf](https://community.mis.temple.edu/mis5203sec001sp2019/files/2019/01/COBIT-2019-Framework-Introduction-and-Methodology_res_eng_1118.pdf)

#### NEW QUESTION # 96

Which of the following is the MOST essential attribute of the highest process capability level (Level 5)?

- A. Quantitative performance measures
- B. Full achievement of the process's purpose
- C. Pursuit of continuous improvement

**Answer: C**

Explanation:

Explanation

The pursuit of continuous improvement is the most essential attribute of the highest process capability level (Level 5). A process capability level is a measure of how well a process or activity is performed in terms of effectiveness, efficiency, completeness, reliability, etc. A process capability level can range from 0 (incomplete) to 5 (optimizing). Level 5 (optimizing) means that the process continuously improves its performance through both incremental and innovative improvements. The pursuit of continuous

improvement is the most essential attribute of Level 5, as it implies that the process is constantly monitored, evaluated, learned from, and enhanced.14 References: CMMI for Development, Version 1.3, CMMI Institute - Capability Maturity Model Integration

### NEW QUESTION # 97

Which of the following is a CRITICAL requirement when the IT function is strategic and crucial to the success of the business?

- A. Documented IT policies and procedures
- **B. High involvement of IT-related roles in organizational structures**
- C. Highly capable security-related processes and ensured risk optimization

**Answer: B**

Explanation:

Explanation

The high involvement of IT-related roles in organizational structures is a critical requirement when the IT function is strategic and crucial to the success of the business. The IT function is the part of the enterprise that is responsible for planning, delivering, operating, and supporting information and technology services. The IT function can have different levels of strategic importance for the business, depending on the nature, scope, and objectives of the enterprise. When the IT function is strategic and crucial to the success of the business, it means that information and technology are essential for creating value, achieving competitive advantage, enabling innovation, etc. In this case, it is critical to have high involvement of IT-related roles in organizational structures, such as having IT representation at the board level, having clear IT leadership roles and responsibilities, having effective IT governance committees or forums, etc.13 References: COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Framework: Roles, Responsibilities & RACI Charts
