Our Platform-App-Builder guide torrent provides free download and tryout before the purchase and our purchase procedures are safe.

## Salesforce Certified Platform App Builder Sample Questions (Q145-Q150):

### NEW QUESTION # 145

A new custom object called Invoices needs to have an invoice date for the date and time it was invoiced. What field type should be selected for this?

- A. Date
- B. Date/Timestamp
- C. Time

- D. Date/Time

**Answer: D**

#### NEW QUESTION # 146

What type of field can be used to filter a report chart that has been added to page Layout?

- A. Formula field
- B. Standard field
- C. Matching ID field
- D. Name field

**Answer: C**

#### NEW QUESTION # 147

What is a true statement in regard to creating custom report types?

When the primary object is a custom object and is deleted, then the report type and any reports created from it must be deleted manually

- A. Once a report type is saved with a standard or custom primary object, the primary object cannot be changed for the report type
- B. The detail object in a master-detail relationship cannot be added as a secondary object on a custom report type
- C. Any object can be chosen unless the object is not visible to the person creating the report type through security settings
- D. When the primary object is a custom object and is deleted, then the report type and any reports created from it must be deleted manually

**Answer: A**

#### NEW QUESTION # 148

Universal Containers has a custom project evaluations object used by three business teams. Business team managers have requested that project evaluations be tracked and managed independently of each other with different set of custom fields and picklist values. What is minimally required configuration to accomplish this?

- A. With a custom project evaluation object, create separate record types with different picklist values and page layouts for each team. Create and assign separate profiles by team.
- B. Create separate page layouts to determine the fields and picklist values for each user based on the team indicated on their user record. Use field-level security to restrict access to each team's fields.
- C. Create separate custom objects to track project evaluations independently of each other with record types and page layouts. Assign custom objects permissions with three different profiles.
- D. With a custom project evaluation object, create a separate page layout for each team and assign them using a profile. Use permission sets to configure each team's field list and picklist values.

**Answer: B**

#### NEW QUESTION # 149

The case handling process at Universal Containers includes multiple steps including approvals, notifications, and fields updates. To manage and evaluate all of these changes in a single save operation, an app builder wants to use Process Builder and the Advanced option to let the process evaluate a record multiple times has been selected.

Which two options should the app builder avoid to prevent recursion?

Choose 2 answers

- A. The ISCHANGED function
- B. Invocable processes
- C. IF statements
- D. Setting a criteria node to No criteria-just execute the procedure

**Answer: A,B**

Explanation:

### Explanation

The two options that the app builder should avoid to prevent recursion are setting a criteria node to No criteria-just execute the procedure and invocable processes. Setting a criteria node to No criteria-just execute the procedure means that the process will always execute the actions regardless of the record values, which can cause recursion if the process updates the same record that triggered it. Invocable processes are processes that can be invoked from another process or a flow, which can cause recursion if the invocable process updates the same record that triggered the parent process or flow. Option A is incorrect because IF statements are not an option in Process Builder, but rather a function that can be used in formulas or conditions. Option D is incorrect because the ISCHANGED function is not an option in Process Builder, but rather a function that can be used in formulas or conditions to check if a field value has changed.

### NEW QUESTION # 150

• • • • •

During the prolonged review, many exam candidates feel wondering attention is hard to focus. But our Platform-App-Builders real exam is high efficient which can pass the Platform-App-Builders exam during a week. To prevent you from promiscuous state, we arranged our Platform-App-Builders Learning Materials with clear parts of knowledge. Besides, without prolonged reparation you can pass the Platform-App-Builders exam within a week long. Everyone's life course is irrevocable, so missing the opportunity of this time will be a pity.
