

# SMI300XE 100% Correct Answers & Valid SMI300XE Braindumps

## Guidewire Configuration Exam Questions With 100% Correct Answers 2024/2025 (Graded A+)

Data Model Entities - Correct Answer-High-level business objects used by the guidewire application. They are the root Entities for PCF files, Gosu Rules and other data related areas.

Typelist - Correct Answer-A predefined list of possible values for a field within the application.

Supertype Entities - Correct Answer-When multiple entities have a common set of fields then they could be organized into a hierarchy, with supertype entity's fields and methods being inherited by subtype entities.

Subtype Entities - Correct Answer-Inherits fields from the supertypes. Data from the subtype is stored in its supertypes table.

The Data Dictionary - Correct Answer-Documents the entity and the typelist in the guidewire application. It has three main sections Entities, Typelists and all fields.

Guidewire Product Architecture - Correct Answer-Data tier(Data Model), Application tier(Gosu and Java Classes) and Presentation tier(PCF Files)

Guidewire Platform - Correct Answer-A layer of configuration technology that includes the functionality needed to define a Guidewire application using Data Model entities, PCF files and application logic to manage users.

Typecodes - Correct Answer-Stored as rows in the typelist table.

Typekeys - Correct Answer-Stored as foreign key columns in the entity table.

Typefilters - Correct Answer-Causes the typelist to display only a subset of the typecodes for that typelist.

ForeignKey - Correct Answer-Pointer to a single instance of some other entity that is maintained by code during runtime.

one-to-one - Correct Answer-Element defines a single valued association to another entity that has a one-to-one cardinality. Can be used in place of ForeignKey column.

many-to-many - Correct Answer-Requires an entity of type versionable that represents the many-to-many relationship. Accessed by adding an Array to one or both entities in the relationship.

## Valid SMI300XE Braindumps & Real SMI300XE Exam Questions

We now live in a world which needs the talents who can combine the practical abilities and knowledge to apply their knowledge into

the practical working conditions. To prove that you are that kind of talents you must boost some authorized and useful certificate and the test SMI300XE certificate is one kind of these certificate. Most important of all, as long as we have compiled a new version of the SMI300XE Exam Questions, we will send the latest version of our SMI300XE exam questions to our customers for free during the whole year after purchasing. Our product can improve your stocks of knowledge and your abilities in some area and help you gain the success in your career.

## Supermicro MI300X Expert (SMI300XE) Certification Exam Sample Questions (Q31-Q36):

### NEW QUESTION # 31

How many GPUs can be missing or undetected by the system to successfully execute the ROCm software commands?

- **A. 0**
- B. 1
- C. None
- D. 2

**Answer: A**

Explanation:

The ROCm software requires at least one GPU to function. It can still operate with up to 2 missing GPUs, but if 3 or more GPUs are missing, ROCm commands will fail.

- \* Option A (Incorrect): ROCm fails if 3 GPUs are missing.
- \* Option B (Incorrect): The software can function with more than 1 GPU missing.
- \* Option C (Correct): ROCm can still execute commands if only 1 or 2 GPUs are missing.
- \* Option D (Incorrect): At least 1 GPU must be detected for ROCm to work.

### NEW QUESTION # 32

What information is shown in the IPMI storage monitoring section?

- **A. Attached storage devices**
- B. Severity of health events
- C. The motherboard
- D. Overheating issues

**Answer: A**

Explanation:

The IPMI storage monitoring section provides information about attached storage devices.

- \* Option A (Incorrect): IPMI does not display motherboard details in this section.
- \* Option B (Incorrect): Overheating issues are logged separately in the event logs.
- \* Option C (Correct): IPMI storage monitoring tracks attached storage devices.
- \* Option D (Incorrect): Severity of health events is found in system logs, not storage monitoring.

### NEW QUESTION # 33

Which two situations could occur if you forcefully shift the release lever without first unlocking the red lock? (Choose 2 answers.)

- A. The power supply unit can no longer be secured into the tray.
- **B. The power supply unit will fail.**
- **C. You could permanently damage the lock on the power supply unit.**
- D. All the answers are correct.

**Answer: B,C**

Explanation:

For Supermicro MI300X GPU systems, removing the power supply unit (PSU) improperly can lead to serious issues.

- \* Why the red lock exists?
- \* The red locking mechanism ensures that the PSU is properly secured in the system.
- \* Before disengaging the PSU, the red lock must first be unlocked to avoid damage.

- \* If you forcefully shift the release lever without unlocking the red lock:
- \* B: The power supply unit will fail# If the PSU is removed improperly, it can cause internal damage to power connectors, resulting in PSU failure or improper functioning.
- \* C: You could permanently damage the lock on the power supply unit# The locking mechanism is designed for smooth disengagement. Forcefully shifting the lever can break or warp the lock, making it impossible to secure the PSU back in place.
- \* Incorrect Answers Explained:
- \* A (All answers are correct)# This is incorrect because not all answers are valid.
- \* D (The PSU can no longer be secured into the tray)# This happens only if the lock is damaged, which is covered under option C.

Supermicro's official documentation clearly states that unlocking the red lock first is a critical step before removing or replacing the PSU.

#### NEW QUESTION # 34

If you need to replace a failed GPU in an MI300X system, what must you do to gain access to the GPUs in the system?

- A. Use the LSPCI command.
- **B. Remove the GPU tray.**
- C. Configure the SCC.
- D. Update the AMD command.

**Answer: B**

Explanation:

To access and replace a failed GPU in the MI300X system, you must remove the GPU tray.

- \* Option A (Incorrect): Updating AMD commands does not physically grant access to GPUs.
- \* Option B (Incorrect): LSPCI is used to list PCI devices, not to physically access the GPUs.
- \* Option C (Incorrect): SCC configuration is unrelated to physical GPU replacement.
- \* Option D (Correct): Removing the GPU tray is the only way to physically access and replace GPUs.

#### NEW QUESTION # 35

When working on the GPU tray, where should you place it to ensure a safe work environment?

- A. On a cardboard box that may or may not support the weight of the tray
- B. On top of the chassis
- C. On the floor where everyone is walking by
- **D. A flat surface**

**Answer: D**

Explanation:

m
