There will be various opportunities waiting for you. You take the initiative. It is up to you to make a decision. We only live once. Don't postpone your purpose and dreams.

## CSI Canadian Securities Course Exam2 Sample Questions (Q164-Q169):

### NEW QUESTION # 164

What is the objective of a relative value strategy?

- A. To assume a net long position by combining both long and short positions on a basket of securities
- B. To exploit market price inefficiencies by simultaneously taking matched long and short positions
- C. To eliminate market risk by combining securities with perfect negative correlation
- D. To take long positions in convertible bond securities paired with long positions in equities

**Answer: B**

### NEW QUESTION # 165

How are investment dealers unique participants in the institutional market?

- A. They manage pools of assets on behalf of beneficiaries.
- **B. They act on both the buy side and sell side.**
- C. They produce research reports.
- D. They manage a firm's financial assets in support of a company's business activities.

**Answer: B**

Explanation:

Investment dealers play a unique role in the institutional market due to their dual capability of operating on both the buy side and the sell side:

\* **The Buy Side** Investment dealers assist institutional investors like pension funds, mutual funds, and hedge funds in acquiring securities to meet their investment objectives. These clients aim to optimize returns on their invested assets, and the dealers provide them with access to securities markets, investment advice, and execution services.

\* **The Sell Side** On the sell side, investment dealers facilitate the issuance of new securities. They underwrite and distribute these securities, providing liquidity to the market. They also produce research reports and provide trade execution services to institutional and retail clients. This dual operation is critical for maintaining market efficiency and ensuring the smooth functioning of capital markets.

This dual-role capacity makes investment dealers pivotal in bridging gaps between the needs of securities issuers and institutional investors. They enhance market liquidity, efficiency, and transparency through their intermediary functions.

\* Canadian Securities Course, Volume 2, Chapter 27: Working with the Institutional Client.

#### **NEW QUESTION # 166**

What type of risk were mortgage-backed securities designed to address?

- A. Interest rate
- B. Liquidity
- **C. Prepayment**
- D. Rollover

**Answer: C**

Explanation:

Mortgage-Backed Securities (MBS) are designed to address prepayment risk, which arises when borrowers pay off their mortgages earlier than expected. Prepayments reduce the interest income investors receive and can affect the expected return on the security.

\* **Why Prepayment Risk is Addressed:**

\* Prepayment often occurs when interest rates decline, as borrowers refinance their mortgages. This leaves MBS investors reinvesting at lower yields, which impacts returns.

\* Structuring MBS helps mitigate prepayment risk through mechanisms like tranches in Collateralized Mortgage Obligations (CMOs).

\* **Explanation of Options:**

\* A. Liquidity: Incorrect. MBS provides liquidity to lenders but is not designed to address liquidity risk directly.

\* B. Interest Rate: Incorrect. MBS investors are still exposed to interest rate risk as rates impact prepayment behavior.

\* C. Rollover: Incorrect. Rollover risk applies to short-term debt securities, not MBS.

\* D. Prepayment: Correct. MBS structures are specifically designed to mitigate the impact of prepayments on investors.

References:

\* CSC Volume 2, Chapter 23: Risks of structured products, particularly prepayment risks in MBS.

#### **NEW QUESTION # 167**

What is the best description of growth-style investment managers?

- A. Managers focus on identifying the current phase of the economic cycle, the direction the economy is headed in, and the various sectors affected
- B. Managers are usually concerned with quarterly portfolio fluctuations
- **C. Managers deliver long-term total return mostly through capital appreciation**
- D. Managers buy discounted stocks that should eventually rise in price by screening stocks for cheap fundamentals

**Answer: C**

### NEW QUESTION # 168

What is a characteristic of the FTSE Canada Universe Bond Index?

- A. It represents a full cross-section of government and corporate bonds.
- B. It Includes Canadian investment-grade bonds with a term to maturity of one year or less.
- C. It is an equal-weighted bond Index with each bond representing the same weight within the index.
- D. It measures the total price return on bonds including realized and unrealized gains

**Answer: A**

Explanation:

The FTSE Canada Universe Bond Index represents a comprehensive cross-section of investment-grade government and corporate bonds denominated in Canadian dollars. It includes bonds with a term to maturity of one year or more and excludes high-yield (non-investment-grade) bonds.

\* A. It measures the total price return on bonds including realized and unrealized gains: The index does not account for realized gains; it tracks price movements and interest income.

\* C. It includes Canadian investment-grade bonds with a term to maturity of one year or less: Bonds in this index must have a term to maturity of at least one year, not less.

\* D. It is an equal-weighted bond index with each bond representing the same weight within the index:

The FTSE Canada Universe Bond Index is capitalization-weighted, not equal-weighted.

### NEW QUESTION # 169

.....

Before and after our clients purchase our CSC2 quiz prep we provide the considerate online customer service. The clients can ask the price, version and content of our CSC2 exam practice guide before the purchase. They can consult how to use our software, the functions of our CSC2 Quiz prep, the problems occur during in the process of using our CSC2 study materials and the refund issue.
