SAP Certified Associate - Validating Business Transformation Sample Questions (Q30-Q35):

NEW QUESTION # 30
What is the significance of data privacy compliance in a clean core strategy?

- A. It focuses on data duplication
- B. It allows unrestricted access to all data
- C. It ensures data is stored and processed only for justifiable purposes
- D. It eliminates the need for data archiving

Answer: C

Explanation:
Data privacy compliance is an essential element of SAP's clean core strategy because it ensures that an organization manages data responsibly and in accordance with legal and regulatory requirements. In a clean core environment, systems must support standardized handling of personal, sensitive, and business-critical data. This includes ensuring that data is collected, stored, accessed, and processed only for valid business purposes that comply with regulations such as GDPR or local data protection laws. Maintaining proper data privacy also reduces risk during upgrades and transformations. Clean core principles emphasize minimizing custom data handling logic, which reduces the chances of unauthorized access or non- compliant processing. By adhering to standardized data frameworks and extension patterns, organizations limit the potential for data misuse and maintain clear control over data lineage and retention policies.
Options A and D contradict privacy best practices-unrestricted access and eliminating archiving would create major compliance issues. Option C addresses operational concerns but is unrelated to privacy.
Therefore, the correct significance is that data privacy compliance ensures data is processed lawfully, purposefully, and responsibly within a clean core ecosystem.

NEW QUESTION # 31

What is used to run fit-to-standard workshops during the design phase?

- **A. Best practice content**
- B. Template Roadmaps
- C. Simplification lists
- D. Compatibility lists

Answer: A

NEW QUESTION # 32

What does SAP LeanIX use to represent applications and capabilities?

- A. Survey Database
- **B. Fact Sheets**
- C. Linked Lists
- D. Forms

Answer: B

Explanation:
Fact Sheets are the core building blocks in SAP LeanIX. Each Fact Sheet holds information about a specific entity, such as an application, business capability, interface, or technology component. These structured profiles include lifecycle data, ownership, dependencies, and relationships. Using Fact Sheets ensures a standardized representation of architectural components, enabling transparency and accurate transformation planning.

NEW QUESTION # 33
