The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q108-Q113):

NEW QUESTION # 108

Consider the following business capability map. where cells of a model are given different colors to represent maturity levels (note the letters G, R, Y, P also denote the colors used = Green, Red, Yellow and Purple):

Which of the following best describes this technique?

- A. Perspective Analysis
- B. Gap Analysis
- **C. Heat Mapping**
- D. Capability Mapping

Answer: C

Explanation:

The technique shown in the example is called heat mapping. It is a technique that can be used to show a range of different perspectives on a business capability map, such as maturity, effectiveness, performance, and value or cost contribution of each capability to the business. Different attributes determine the colors of each capability on the business capability map. Heat mapping can help to identify strengths, weaknesses, opportunities, and threats in the business architecture.

NEW QUESTION # 109

Please consider the following statement.

They govern the architecture process, affecting the development, maintenance, and use of the Enterprise Architecture.

What does this describe?

- A. Architecture Frameworks
- B. Stakeholders' requirements
- C. ADM Techniques
- **D. Architecture Principles**

Answer: D

Explanation:

Architecture Principles in TOGAF govern the architecture process, influencing the development, maintenance, and use of the Enterprise Architecture. Here's a detailed explanation:

* Definition:

* Architecture Principles: These are the fundamental rules and guidelines that inform and support the way in which an organization sets about fulfilling its mission. They affect all phases of the architecture process.

* Role in TOGAF:

* Guidance and Governance: Architecture Principles provide the foundation for making architecture-related decisions. They guide the development, maintenance, and usage of all architecture artifacts.

* Consistency and Alignment: They ensure that all architecture activities are consistent with the overall business strategy and objectives, providing alignment across different architecture domains.

* TOGAF ADM Phases:

* Preliminary Phase: This phase includes the establishment of architecture principles that will guide the entire architecture effort.

* Phase A: Architecture Vision: During this phase, the architecture principles are used to create the vision and scope of the architecture project, ensuring it aligns with the organization's goals.

* Examples of Architecture Principles:

* Business Principles: These might include ensuring that business processes are customer-focused.

* Data Principles: Principles ensuring data accuracy and availability.

* Application Principles: Guidelines for application interoperability and usability.

* Technology Principles: Standards for technology choices and infrastructure management.

In summary, architecture principles govern the architecture process, affecting its development, maintenance, and use, thereby ensuring alignment with business goals and consistency in architectural decisions.

NEW QUESTION # 110

Complete the sentence. The TOGAF standard covers the development of four architecture domains. Business. Data. Technology and _____.

- A. Transition
- **B. Application**
- C. Capability
- D. Segment

Answer: B

Explanation:

The TOGAF standard covers the development of four architecture domains: Business, Data, Technology, and Application. The Application Architecture domain defines the applications required to process the data and support the business functions.

The TOGAF standard describes the development of four architecture domains, which are considered its pillars. These are Business, Data, Technology, and Application. The Application Architecture domain provides a blueprint for the individual application systems to be deployed, their interactions, and their relationships to the core business processes of the organization.

NEW QUESTION # 111

Which of the following best describes a TOGAF business scenario?

- A. A use-case providing detailed descriptions.
- **B. A technique to elaborate an architecture effort.**
- C. A method to develop a business model.
- D. A business case.

Answer: B

Explanation:

A TOGAF business scenario is a technique that can be used to fully understand the requirements of information technology and align it with business needs¹. It is not a business case, which is a document that provides justification for a proposed project or initiative⁶. It is not a method to develop a business model, which is a description of how an organization creates, delivers, and captures value for its stakeholders⁷. It is not a use-case, which is a description of how a system interacts with external actors to achieve a specific goal.

A TOGAF business scenario is a technique that helps to derive architecture requirements by describing a business process, application, or set of activities. It includes detailing the actors, roles, goals, business policies, business processes, and the environment in which the scenario takes place. Business scenarios are used within TOGAF to ensure that the architecture has a clear link to the business requirements.

NEW QUESTION # 112

Consider the diagram.

What are the items labelled A, B and C?

- A. A-Enterprise Strategic Architecture, B-Segment Architecture, C-Solutions Architecture
- B. A-Enterprise Architecture, B-Architecture Building Blocks, C-Solutions Building Blocks
- C. A-Architecture Vision, B-Business Architecture, C-Information Systems Architecture
- **D. A-Enterprise Continuum, B-Architecture Continuum, C-Solutions Continuum**

Answer: D

Explanation:

The diagram shows the Enterprise Continuum, which is a view of the Architecture Repository that provides methods for classifying architecture and solution artifacts as they evolve from generic Foundation Architectures to Organization-Specific Architectures⁴. The Enterprise Continuum comprises two complementary concepts: the Architecture Continuum and the Solutions Continuum. The Architecture Continuum shows the relationships among foundational frameworks, common system architectures, industry architectures, and enterprise architectures⁴. The Solutions Continuum shows the relationships among foundational solutions, common system solutions, industry solutions, and enterprise solutions⁴.
