

# Exam NCA-6.5 Dumps, NCA-6.5 Practice Braindumps

P.S. Free 2026 Nutanix NCA-6.5 dumps are available on Google Drive shared by Prep4SureReview:  
[https://drive.google.com/open?id=1jgtAwJ5b3fLDzRN8gffHiW7-L9XQ\\_xJiO](https://drive.google.com/open?id=1jgtAwJ5b3fLDzRN8gffHiW7-L9XQ_xJiO)

The NCA-6.5 exam questions formats are PDF dumps files, desktop practice test software, and web-based practice test software. All these NCA-6.5 exam questions format hold some common and unique features. Such as NCA-6.5 PDF dumps file is the PDF version of Nutanix Certified Associate (NCA) v6.5 exam exam dumps that works Prep4SureReview all operating systems and devices. Whereas the other two NCA-6.5 Practice Test questions formats are concerned, both are the mock NCA-6.5 exam. Both will give you a real-time Nutanix Certified Associate (NCA) v6.5 exam exam preparation environment and you get experience to attempt the NCA-6.5 exam preparation experience before the final exam.

The NCA-6.5 certification exam covers a variety of topics, including Nutanix cluster architecture, installation, configuration, and management, virtualization, storage management, networking, security, and troubleshooting. NCA-6.5 exam consists of 60 multiple-choice questions and has a time limit of 90 minutes.

The NCA-6.5 certification exam is intended for IT professionals who have a foundational understanding of virtualization, storage, and networking concepts. Candidates for NCA-6.5 exam should have experience with Nutanix solutions, including deploying and managing Nutanix clusters and virtual machines. NCA-6.5 exam consists of 60 multiple-choice questions and has a time limit of 90 minutes. Upon passing the exam, candidates will be awarded the Nutanix Certified Associate (NCA) v6.5 certification, which is valid for two years. The NCA-6.5 Certification is an excellent way for IT professionals to demonstrate their expertise in Nutanix solutions and advance their careers in the IT industry.

The NCA-6.5 Certification Exam is a vendor-neutral certification that is recognized by a wide range of companies and organizations. Nutanix Certified Associate (NCA) v6.5 exam certification is designed to provide IT professionals with the skills and knowledge they need to succeed in the rapidly evolving field of virtualization and cloud computing. Nutanix Certified Associate (NCA) v6.5 exam certification is also designed to help IT professionals stay up-to-date with the latest trends and technologies in the industry.

## Nutanix NCA-6.5 Practice Braindumps & Test NCA-6.5 Topics Pdf

Do you want to find a high efficiency way to prepare for NCA-6.5 exam test? As we all know, high efficiency will produce unbelievable benefits. With our Nutanix NCA-6.5 study pdf, you can make full use of your spare time. If you are tired of screen reading, you can print NCA-6.5 Pdf Dumps into papers. You take your spare time to prepare and study. You will get your NCA-6.5 exam certification with less time investment. Come on, everyone, Choose NCA-6.5 test dumps, you will succeed.

## Nutanix Certified Associate (NCA) v6.5 exam Sample Questions (Q50-Q55):

**NEW QUESTION # 50**  
Refer to the exhibit.

What is true about the network uplink ports?

- A. They are configured in Active-Backup mode.
- **B. All are connected, but only two are carrying traffic.**
- C. They are configured in Active-Active mode.
- D. One is connected at 1GbE and the other is 10GbE.

**Answer: B**

Explanation:

In Nutanix, all the network uplink ports are connected, but only two of them are carrying traffic at any given time. This is done to provide redundancy and failover in case one of the ports fails. The two ports that are carrying traffic are chosen based on the link aggregation policy configured. The link aggregation policy can be configured to use either Active-Active or Active-Backup mode. In Active-Active mode, both ports are active and carrying traffic, while in Active-Backup mode, only one port is active and carrying traffic, the other port is on standby. #### NEW QUESTION # 51

Which address allows external connections to Nutanix storage presented by the Volumes feature?

- A. IPMI IP
- B. Prism Central IP
- **C. Data Services IP**
- D. Prism Central IP

**Answer: C**

Explanation:

The Data Services IP address is the address that allows external connections to Nutanix storage presented by the Volumes feature. This address is used to access the storage from external sources and is used for replication and external snapshotting. Reference: [https://portal.nutanix.com/page/documents/details?targetId=Prism-Admin-Guide-v5\\_6:pr-storage-storage-networks-c.html](https://portal.nutanix.com/page/documents/details?targetId=Prism-Admin-Guide-v5_6:pr-storage-storage-networks-c.html)

### NEW QUESTION # 52

In an AHV five-node cluster, an SSD fails within a node that has two SSDs and four HDDs installed. What will happen to the cluster environment?

- A. VMs will be live migrated to other hosts until metadata rebuild is finished.
- **B. CVM on the impacted node reboots.**
- C. Host goes down and VMs will be powered on elsewhere.
- D. Cluster goes in read-only mode.

**Answer: B**

Explanation:

When an SSD fails within a node, the CVM on that node will reboot to maintain the health of the cluster. The CVM is responsible for managing the storage and virtualization components of the cluster, and a reboot is necessary to ensure that the cluster continues to function properly. The VMs running on that host will not be affected and continue to run, but the CVM will be unavailable for a short period of time until the reboot is completed. The Cluster continues to operate in a healthy state and doesn't go in read-only mode or cause any host to go down. Reference: [https://portal.nutanix.com/page/documents/details?targetId=Web-Console-Guide-Prism-v5\\_11:wc-monitoring-cluster-health\\_wc-monitoring-cluster-health.html](https://portal.nutanix.com/page/documents/details?targetId=Web-Console-Guide-Prism-v5_11:wc-monitoring-cluster-health_wc-monitoring-cluster-health.html)

### NEW QUESTION # 53

After starting an LCM update from Prism Element, on which dashboard can the progress be monitored?

- A. Analysis
- B. Health
- C. Alerts
- **D. Tasks**

**Answer: D**

### NEW QUESTION # 54

Which IP address can be used to directly access Prism Element?

- A. Foundation VM IP address
- B. IP address of any Prism Central VM
- C. AHV host br0 IP address
- **D. IP address of any CVM in the cluster**

**Answer: D**

Explanation:

Prism Element is the management interface for Nutanix clusters and it can be accessed through the IP address of any CVM (Controller Virtual Machine) in the cluster. The CVM is a virtual machine that runs on each Nutanix node and is responsible for managing the storage and compute resources of the node. Each CVM has a unique IP address, and any of these IP addresses can be used to directly access Prism Element.

Accessing Prism Element through the IP address of a CVM allows the administrator to manage the cluster, including configuring storage, creating and managing virtual machines, and monitoring the health of the cluster.

It's important to note that Prism Central is a separate application and it doesn't have the same functions as Prism Element, it's mainly used for multi-cluster management.

You can find more information on this topic in the Nutanix Administrator Guide, which is available on the Nutanix support website [https://portal.nutanix.com/#/page/docs/details?targetId=Admin-Guide-Prism-v5\\_24:Admin-Guide-Prism-v5\\_24](https://portal.nutanix.com/#/page/docs/details?targetId=Admin-Guide-Prism-v5_24:Admin-Guide-Prism-v5_24)

### NEW QUESTION # 55

.....

To keep constantly update can be walk in front, which is also our Prep4SureReview's idea. Therefore, we regularly check NCA-6.5 exam to find whether has update or not. Once the update comes out, we will inform our customers who are using our products so

that they can have a latest understanding of NCA-6.5 Exam. All the update service is free during one year after you purchased our NCA-6.5 exam software.
