## 시험준비에 가장 좋은 EDGE-Expert완벽한 덤프문제 최신 덤프모음집

PassTIP는 여러분이EDGE 인증EDGE-Expert인증시험 패스와 추후사업에 모두 도움이 되겠습니다. PassTIP제품을 선택함으로 여러분은 시간도 절약하고 돈도 절약하는 일석이조의 득을 얻을수 있습니다. 또한 구매후 일년무료 업데이트 버전을 받을수 있는 기회를 얻을수 있습니다. EDGE 인증EDGE-Expert 인증시험패스는 아주 어렵습니다. 자기에 맞는 현명한 학습자료 선택은 성공의 지름길을 내딛는 첫발입니다. 완벽한 자료만이 시험에서 성공할수 있습니다. PassTIP시험문제와 답이야 말로 완벽한 자료이죠. PassTIP EDGE 인증EDGE-Expert인증시험자료는 100% 패스보장을 드립니다.

## 최신 GBCI EDGE EDGE-Expert 무료샘플문제 (Q48-Q53):

### 질문 # 48

Client has provided the specification as per the image for low flow shower heads. What is the flow rate for shower heads that should have been entered to EDGE software?

- A. 0
- **B. 1**
- C. 3,590
- D. 1,315

정답: B

설명:

According to the CBCI EDGE curriculum, when entering plumbing fixture data into the EDGE software, the value required is the

actual flow rate of the fixture in liters per minute, not the product code, price, or any other specification number shown in supplier documentation.

From the specification image, the overhead shower is described as having a single flow rate of 6 liters per minute. Other numbers visible in the specification, such as 1,315 or 3,590, represent product codes or pricing information, not water flow rates. The 4 liters per minute value in the image applies to a wall mixer component and not to the shower head itself.

In EDGE, water savings for showers are calculated based on the flow rate combined with default usage assumptions. Therefore, the correct value to input for a low-flow shower head is its rated flow in liters per minute. Since the overhead shower shown has a flow rate of 6 liters per minute, that is the value that should be entered into the EDGE software.

Accurate entry of fixture flow rates is essential because it directly affects the calculated percentage reduction in water consumption compared to the baseline case.

#### 질문 # 49

The Base Case for utility costs:

- A. Includes the cost of virtual energy.
- B. Includes the cost of virtual energy only in homes.
- C. Excludes the cost of virtual energy only in homes.
- D. Excludes the cost of virtual energy.

정답: A

#### 설명:

In EDGE, the Base Case is a standardized benchmark used to calculate utility cost savings, reflecting typical resource consumption for a building in its location and typology. The term "virtual energy" in EDGE refers to the energy required for heating, cooling, lighting, and other systems, modeled as if the building operates under typical conditions without efficiency measures. The EDGE User Guide explains how utility costs are calculated: "The Base Case for utility costs includes the cost of virtual energy, which represents the modeled energy consumption for the building type in the absence of efficiency measures, alongside water consumption, using local tariffs to estimate financial impacts" (EDGE User Guide, Section 2.3: Using the EDGE App). Option B, includes the cost of virtual energy, aligns with this approach, as the Base Case accounts for all modeled energy use to establish a baseline for savings. Option A (excludes the cost of virtual energy) is incorrect, as virtual energy is a core component of the Base Case: "Virtual energy in EDGE is the theoretical energy use calculated for the Base Case, including heating, cooling, and lighting, and its cost is always included in utility cost calculations" (EDGE Methodology Report Version 2.0, Section 4.4: Cost Savings Calculations). Option C (excludes the cost of virtual energy only in homes) and Option D (includes the cost of virtual energy only in homes) are also incorrect, as the treatment of virtual energy is consistent across all typologies: "The Base Case methodology, including the inclusion of virtual energy costs, applies uniformly to all building types in EDGE, whether homes, hotels, or offices, to ensure a fair comparison of savings" (EDGE User Guide, Section 2.3: Using the EDGE App). The EDGE Methodology Report further clarifies: "Utility costs in the Base Case are derived from virtual energy and water consumption, reflecting typical usage patterns for the building type and location, ensuring that savings calculations are comprehensive and include all relevant energy demands" (EDGE Methodology Report Version 2.0, Section 4.4: Cost Savings Calculations). This consistent inclusion of virtual energy costs across all typologies makes Option B the correct answer.

Reference: EDGE User Guide Version 2.1, Section 2.3: Using the EDGE App; EDGE Methodology Report Version 2.0, Section 4.4: Cost Savings Calculations.

#### 질문 # 50

Which of the following BEST describes an EDGE Expert?

- A. A consultant who can issue a preliminary EDGE certificate
- B. An individual accredited by the EDGE Operations and Management Team who can serve as a consultant
- C. An individual who can serve as both an auditor and a consultant upon EDGE Committee approval
- D. An individual accredited by the EDGE Certifier who can serve as a consultant

정답: D

#### 설명:

The role of an EDGE Expert is well-defined within the EDGE framework to clarify their responsibilities and qualifications. The EDGE Expert and Auditor Protocols provide a precise description: "An EDGE Expert is an individual accredited by the EDGE Certifier (such as GBCI or other authorized certification bodies) who can serve as a consultant to project teams, advising on the selection of green building measures, preparing the self-assessment in the EDGE software, and guiding the project toward certification" (EDGE Expert and Auditor Protocols, Section 2.1: Roles of EDGE Expert). Option B, an individual accredited by the

EDGE Certifier who can serve as a consultant, directly matches this definition. Option A (a consultant who can issue a preliminary EDGE certificate) is incorrect, as Experts do not issue certificates: "Only the EDGE Certification Provider can issue a preliminary certificate, not the EDGE Expert" (EDGE Certification Protocol, Section 3.3: Certification Decision). Option C (an individual who can serve as both an auditor and a consultant upon EDGE Committee approval) is also incorrect, as this violates conflict-of-interest rules: "An individual cannot serve as both an EDGE Expert and Auditor on the same project, even with committee approval, to avoid conflicts of interest" (EDGE Expert and Auditor Protocols, Section 2.3: Conflict of Interest). Option D (an individual accredited by the EDGE Operations and Management Team) is wrong, as accreditation is handled by the Certifier, not the Operations team: "The EDGE Operations and Management Team oversees the program, while accreditation of Experts is managed by the EDGE Certifier" (EDGE Certification Protocol, Section 1.3: Program Structure). The EDGE User Guide further supports this: "EDGE Experts are accredited professionals who consult on projects, having passed the EDGE Expert exam administered through the Certifier" (EDGE User Guide, Section 6.4: Working with EDGE Experts). Thus, Option B best describes an EDGE Expert. Reference:EDGE Expert and Auditor Protocols, Section 2.1: Roles of EDGE Expert, Section 2.3: Conflict of Interest; EDGE Certification Protocol, Section 3.3: Certification Decision, Section 1.3: Program Structure; EDGE User Guide Version 2.1, Section 6.4: Working with EDGE Experts.

### 질문 # 51

Which of the following does NOT contribute to an EDGE Auditor maintaining their Auditor status?

- A. Retaking the auditor exam
- B. Studying the EDGE user guides as and when they are updated.
- C. Attending refresher training.
- D. Performing at least one project site audit every two years.

정답: A

#### 설명:

Maintaining EDGE Auditor status involves specific requirements to ensure ongoing competence. The EDGE Expert and Auditor Protocols outline these requirements: "To maintain their status, EDGE Auditors must perform at least one project site audit every two years, attend refresher training as required by IFC, and stay updated by studying the EDGE user guides and protocols as they are revised" (EDGE Expert and Auditor Protocols, Section 5.1: Maintaining Auditor Status). Option A (performing at least one project site audit every two years) is explicitly required to demonstrate active engagement. Option B (studying the EDGE user guides as updated) is also necessary to stay current with program changes. Option D (attending refresher training) is mandated to ensure continued education. However, Option C (retaking the auditor exam) is not a requirement for maintaining status: "Once certified, EDGE Auditors are not required to retake the exam to maintain their status, though they may need to retake it if their certification lapses or if significant program changes occur" (EDGE Expert and Auditor Protocols, Section 5.2: Recertification Conditions). Since the question focuses on maintaining status, not recertification after lapse, retaking the exam is not a standard requirement. Thus, retaking the auditor exam (Option C) does not contribute to maintaining Auditor status. Reference:EDGE Expert and Auditor Protocols, Section 5.1: Maintaining Auditor Status, Section 5.2: Recertification Conditions.

### 질문 # 52

A hotel achieved EDGE Certification a year ago. The EDGE Client wishes to maintain its EDGE Certification. What is required to maintain the EDGE Certification of the hotel?

- A. The EDGE Auditor must verify EDGE measures with a site visit every three years.
- B. The EDGE Client must perform a self-assessment every year.
- C. When alterations are made to the hotel, the EDGE Auditor must verify EDGE measures with supporting documentation.
- D. There are no requirements to maintain EDGE Certification.

정답: D

#### 설명:

According to the CBCI EDGE certification framework, EDGE Certification is awarded based on verified design and as-built performance at the time of project completion. Once a project has successfully passed the design audit and site audit, and certification is issued, there is no requirement for periodic renewal or ongoing recertification to maintain the status. EDGE differs from operational performance rating systems that require annual reporting or periodic reassessment. The EDGE system confirms compliance at the point of certification by verifying that the energy, water, and materials efficiency measures modeled in the software have been properly implemented. After certification, the certificate remains valid without mandatory annual self-assessments, recurring site visits, or scheduled third-

party re-verification.

If substantial renovations or changes are made in the future and the owner seeks certification for those changes, a new certification process may be required. However, to maintain an already awarded EDGE Certification under normal circumstances, no additional actions are required. Therefore, the correct answer is that there are no requirements to maintain EDGE Certification.
