### PRINCE2 7 Foundation written Exam Sample Questions (Q102-Q107):

#### NEW QUESTION # 102

Which is a type of issue?

- A. A request for change
- B. A risk with an estimated high impact
- C. An Exception Report
- D. A lesson

**Answer: A**

Explanation:

In the PRINCE2 framework, a type of issue that can commonly occur is a request for change. This refers to a proposal for a change or modification to any aspect of the project, which may involve changes to the project's baseline aspects such as scope, product descriptions, quality criteria, or timeframes. #### NEW QUESTION # 103

Which statement is CORRECT about the customer and suppliers of a project in a commercial environment?

- A. Both parties must apply the same external governance to the project
- B. Each party may have their own business case for undertaking the project
- C. The risk appetite should be collaboratively set before the project starts
- D. Management systems need to be unified for successful project delivery

**Answer: B**

Explanation:

In a commercial environment, it is common for each party involved in a project—namely the customer and suppliers—to have their own business case. This reflects their individual motives, expected benefits, and investment rationale for undertaking the project. Each party's business case addresses their specific strategic, commercial, and operational needs. References: = PRINCE2 7 Foundation handbook and online resources

#### NEW QUESTION # 104

How should the 'progress' practice be used?

- A. To predict whether the benefits will exceed the costs
- B. To identify opportunities that may make the project more successful
- C. To deliver change which will benefit people in their day-to-day work
- D. To define how the products will be delivered to enable control

**Answer: A**

Explanation:

The 'progress' practice in PRINCE2 should be used to monitor and control the performance of the project against its plans and the project's overall direction. This includes predicting whether the benefits will exceed the costs, which is crucial for evaluating the project's ongoing viability and justifying the continuation of the project based on its forecasted value to the organization.
