Just hold the supposition that you may fail the exam even by the help of our C\_SIGDA\_2403 Study Tool, we can give full refund back or switch other versions for you to relieve you of any kind of losses. What is more, we offer supplementary content like updates for one year after your purchase.

## SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q55-Q60):

### NEW QUESTION # 55

Which components are included to configure ETL data pipelines in SAP Signavio Process Intelligence?Note:  
There are 3correct answers to this question.

- A. Data Relation Management
- B. Data Integration Management
- C. Data Model Management
- D. Data Object Management

- E. Data Source Management

**Answer: B,C,E**

Explanation:

Configuring ETL (Extract, Transform, Load) data pipelines in SAP Signavio Process Intelligence involves several components, including Data Source Management, Data Model Management, and Data Integration Management. Data Source Management is crucial for defining and managing the origin of the data that will be processed. Data Model Management allows for the structuring and definition of how data is organized, related, and stored, making it easier to analyze and understand. Data Integration Management involves the mechanisms and processes for importing, cleaning, and consolidating data from various sources into a coherent and usable format. Together, these components form the backbone of ETL data pipelines, enabling effective data processing and analysis. Data Relation Management and Data Object Management, as specified, are not standard terms used within the context of SAP Signavio's ETL configuration. #### NEW QUESTION # 56

How does the splitting Inclusive Gateway (OR) work? Note: There are 2 correct answers to this question.

- A. It triggers a few of all possible outgoing sequence flows, if several conditions apply.
- B. It triggers one outgoing sequence flow, if a condition applies.
- C. It triggers only one of all outgoing sequence flows, if all conditions apply.
- D. It triggers all outgoing sequence flows, if only one condition applies.

**Answer: A,B**

Explanation:

The Inclusive Gateway (OR) in BPMN operates as follows:

\* Option C (It triggers a few of all possible outgoing sequence flows, if several conditions apply): The Inclusive Gateway can activate one or more of its outgoing sequence flows simultaneously, based on the evaluation of conditions. If multiple conditions are met, multiple paths can be triggered, allowing for a flexible process flow that can accommodate various scenarios.

\* Option D (It triggers one outgoing sequence flow, if a condition applies): Even though an Inclusive Gateway can trigger multiple paths, it can also trigger just one path if only one condition applies. This versatility makes the Inclusive Gateway suitable for complex decision-making processes where the number of paths taken can vary.
