Oracle Financials Cloud: General Ledger 2025 Implementation Professional 認定 1z0-1054-25 試験問題 (Q96-Q101):

質問 #96

Which delivered role can access the full functionality of Functional Setup Manager?

- A. IT Security Manager
- B. Any functional user
- C. Functional Setup Manager Superuser
- **D. Application Implementation Manager**
- E. Application Implementation Consultant

正解: D

解説:

According to Oracle documentation², the delivered role that can access the full functionality of Functional Setup Manager is Application Implementation Manager. Functional Setup Manager is a tool that enables you to manage and perform all of the setup tasks required for an application implementation. Application Implementation Manager is a predefined role that grants access to Functional Setup Manager and all of its features, such as setup tasks, implementation projects, setup export and import, and setup reports. Therefore, option A is correct. Option B is incorrect because Functional Setup Manager Superuser is not a delivered role. Option C is incorrect because IT Security Manager is a role that grants access to security-related tasks, not Functional Setup Manager. Option D is incorrect because any functional user does not have access to Functional Setup Manager by default. Option E is incorrect because Application Implementation Consultant is not a delivered role.

質問 # 98

Budgetary control for accounts 5020 and 5021 has a budget of \$90,000 USD each for the year 2012. The accounts also have balances on obligation of \$10,000 USD for each and an expenditure of \$20,000 USD for each.

A Fund of \$50,000 USD is available for account 5020 only. You have run the Encumbrance Year End Carry Forward process for obligation from the last period of the year 2012 to the first period of year 2013.

Which statement is true?

- A. The Encumbrance Year End Carry Forward process will run for all the accounts to carry forward the general ledger balances.
- B. If you have included 5020 and 5021 in the encumbrance rule, then budget balances \$90,000 USD, obligation \$10,000 USD, and expenditure \$20,000 USD, and the funds available \$50,000 USD will be carried forward.
- C. If you have included 5020 and 5021 in the encumbrance rule, then only the obligation of \$10,000 USD will be carried forward.
- D. If you have included 5020 and 5021 in the encumbrance rule, then obligation \$10,000 USD and expenditure \$20,000 USD only will be carried forward.
- E. If you have included 5020 and 5021 in the encumbrance rule, then budget balances \$90,000 USD, obligation \$10,000 USD, and expenditure \$20,000 USD only will be carried forward.

正解: B

質問 # 99

In which two ways can your users personalize the Springboards and Work Areas to suit their individual working styles? (Choose two.)

- A. Users have very little control configuring their Springboards and Work Areas; they can only resize columns
- B. They can have the System Administrator configuring pages for them using Page Composer
- C. They can use "+" under the Apps section of the News Feed homepage
- D. They can format certain tables by hiding and showing columns, moving columns, and resizing columns

正解: C、D

解説:

According to Oracle documentation², your users can personalize the Springboards and Work Areas to suit their individual working styles in these two ways: They can format certain tables by hiding and showing columns, moving columns, and resizing columns, and they can use "+" under the Apps section of the News Feed homepage. Springboards and Work Areas are user interface components that enable users to access tasks and information relevant to their roles. Users can customize these components by adding or removing tiles, changing layouts, filtering data, and formatting tables. Therefore, options A and D are correct. Option B is incorrect because users have more control over configuring their Springboards and Work Areas than just resizing columns. Option C is incorrect because users do not need to have the System Administrator configuring pages for them using Page Composer.

質問 # 100

You are creating values for the chart of account value set that you are planning to use for the account segment within your Chart of Accounts. You are not able to assign an Account Type.

What is the reason for this?

- A. You are creating values before assigning the value set to the structure.
- B. The Account Type qualifier has not been enabled when defining the value set.
- C. You have not set the Allow Budgeting attribute for the value set.
- D. You have not set the Allow Posting attribute for the value set.

正解: B
