NEW QUESTION # 224

What can a cross-object formula reference?

- A. Records of the same Object
- **B. Parent Only**
- C. Child Only
- D. Both Parent and Child objects

Answer: B

Explanation:

Cross-object formulas are formulas that span two related objects and reference merge fields on those objects.

Cross-object formulas can reference merge fields from a master ("parent") object if an object is on the detail side of a master-detail relationship. Cross-object formulas also work with lookup relationships. You can reference fields from objects that are up to 10 relationships away. Cross-object formulas are available anywhere formulas are used except when creating default values.

NEW QUESTION # 225

The DreamHouse Realty (DR) service manager has asked for some improvements in case management to enforce process compliance so that cases are unable to be reverted to an earlier case status, and to ensure that certain fields are required when specific case criteria are met.

What solution should an app builder implement to meet these requirements?

- A. Activities Component
- B. Process Builder
- C. Workflow Rules
- **D. A Validation Rules**

Answer: D

NEW QUESTION # 226

- A. When the second trigger is saved a Imminent Loop Error message will be displayed and the workflow rule update will not save
- B. The updates create a loop and the org be blocked until the admin resolves the issue
- **C. The updates create a loop and the org limits for workflow time triggers per hour will likely be violated**
- D. Loop is allowed to run 25 times within one hour. If it does not end on its own the process will be stopped by R&D

Answer: C

NEW QUESTION # 227

What are the limitations of Schema Builder when creating a custom object?

- A. Relationships can be made to any custom objects, but any relationships to standard objects should be built in Lightning Object Manager.
- B. Custom fields can be added to any custom objects, excluding formula field types.
- C. "Save" should be clicked each time a new object, field, or relationship is created.
- **D. Fields and relationships can be created, but they will be unable to add the fields to the page layout from the canvas.**

Answer: D

Explanation:

Schema Builder allows users to create custom objects, fields, and relationships using a drag-and-drop interface. However, one of

the limitations of Schema Builder is that fields and relationships can be created, but they will be unable to add the fields to the page layout from the canvas. Users will need to go to the Lightning Object Manager or Setup to edit the page layout and add the fields.
